

# New NCP-CI-Azure Exam Preparation | Valid Dumps NCP-CI-Azure Pdf

BONUS!!! Download part of TestSimulate NCP-CI-Azure dumps for free: [https://drive.google.com/open?id=1PSNjqsKW3dnRWM0lpkd\\_DOd5\\_5vCXhwu](https://drive.google.com/open?id=1PSNjqsKW3dnRWM0lpkd_DOd5_5vCXhwu)

With the rapid development of society, people pay more and more attention to knowledge and skills. So every year a large number of people take NCP-CI-Azure tests to prove their abilities. But even the best people fail sometimes. In addition to the lack of effort, may also not make the right choice. A good choice can make one work twice the result with half the effort, and our NCP-CI-Azure study materials will be your right choice. Since inception, our company has been working on the preparation of NCP-CI-Azure learning guide, and now has successfully helped tens of thousands of candidates around the world to pass the exam. As a member of the group who are about to take the NCP-CI-Azure exam, are you worried about the difficulties in preparing for the exam? Maybe this problem can be solved today, if you are willing to spend a few minutes to try our NCP-CI-Azure actual exam.

Learning at electronic devices does go against touching the actual study. Although our NCP-CI-Azure exam dumps have been known as one of the world's leading providers of exam materials, you may be still suspicious of the content. Therefore, we especially provide several demos for future reference and we promise not to charge you of any fee for those downloading. Then you will know whether it is suitable for you to use our NCP-CI-Azure Test Questions. There are answers and questions provided to give an explicit explanation. We are sure to be at your service if you have any downloading problems'

**Nutanix Certified Professional - Cloud Integration - Azure (NCP-CI-Azure v6.7) exam test engine & NCP-CI-Azure exam prep material & Nutanix**

## Certified Professional - Cloud Integration - Azure (NCP-CI-Azure v6.7) practice questions

With all of these NCP-CI-Azure study materials, your success is 100% guaranteed. Moreover, we have Demos as freebies. The free demos give you a prove-evident and educated guess about the content of our NCP-CI-Azure practice materials. As long as you make up your mind on this exam, you can realize their profession is unquestionable. And their profession is expressed in our NCP-CI-Azure training prep thoroughly. They are great help to pass the NCP-CI-Azure exam and give you an unforgettable experience.

### Nutanix NCP-CI-Azure Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• <b>Planning an NC2 on Azure Deployment:</b> This section of the exam measures the skills of IT Administrators and covers the preparation of the Azure cloud environment, including determining the appropriate Azure account and node types. It also involves subscribing to the NC2 service, which requires knowledge of authentication methods and organization naming conventions. Additionally, candidates must determine implementation requirements by evaluating deployment use cases and redundancy needs. Identifying networking requirements is crucial, focusing on connectivity options like VPN and CIDR ranges.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• <b>Managing an NC2 on Azure Environment:</b> This section relates to skills in identifying management tasks for nodes and clusters. Candidates will monitor cluster health and cloud resource performance, ensuring that all components function efficiently. Understanding these management tasks is vital for maintaining operational integrity in a hybrid cloud environment.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• <b>Configuring an NC2 on Azure Environment:</b> This section evaluates the skills of IT Administrators and emphasizes modifying cloud networking security to protect resources. Candidates will configure Nutanix networking settings and troubleshoot connectivity issues to ensure seamless communication within the cloud environment.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>• <b>Deploying an NC2 on Azure Environment:</b> This section assesses the skills of Nutanix Cloud Operators and focuses on deploying the cloud cluster within the Azure environment. Candidates will learn to configure cloud provider networking effectively, ensuring that all necessary resources are correctly set up for deployment.</li></ul>

### Nutanix Certified Professional - Cloud Integration - Azure (NCP-CI-Azure v6.7) Sample Questions (Q23-Q28):

#### NEW QUESTION # 23

Exhibit.

AN NC2 on Azure Cluster was deployed with two Flow gateways in HA (FGW1 and FGW2). After a week of use. Four bare-metal nodes, were added to the NC2 cluster and additional workloads were added.

It was determined that additional bandwidth for north/South traffic would be needed. Two additional Flow gateways were added (FGW3 and FGW4) from the NC2 portal configuration menu.

The existing workloads prior to expansion on the NC2 cluster will be able to use which Flow Gateways using the No-Nat (routed) traffic path?

- **A. All Flow Gateways can be used.**
- B. Only the Flow Gateway that each workload was originally using.
- C. FGW1&FGW2 only, new workloads can use FGW3 & FGW4.
- D. All Flow Gateways can be used after the existing workloads reboot.

**Answer: A**

Explanation:

In the scenario presented, the NC2 cluster was initially deployed with two Flow Gateways (FGW1 and FGW2) in HA. After adding four bare-metal nodes and additional workloads, two more Flow Gateways (FGW3 and FGW4) were added to handle the increased bandwidth for north/south traffic. Given the configuration, the existing workloads can utilize all available Flow Gateways

(FGW1, FGW2, FGW3, and FGW4) for No-NAT (routed) traffic paths. This setup allows for Equal Cost Multipath (ECMP) routing, distributing traffic load across all Flow Gateways.

#### NEW QUESTION # 24

An administrator is planning to expand an NC2 on Azure cluster.

Which statement is true regarding prerequisites for expanding the cluster?

- A. Cluster must have at least five nodes.
- B. Cluster must have at least three nodes.
- C. Cluster must be in a Cluster Stopped state.
- **D. Cluster must be in a Cluster Connected state.**

**Answer: D**

Explanation:

\* Cluster State Requirement: To expand a cluster, it must be operational and in a connected state to ensure seamless integration of additional nodes.

\* Cluster Stopped State: If the cluster is stopped, it cannot perform expansion operations.

\* Minimum Nodes Requirement: There is no minimum node count prerequisite for expanding the cluster as long as the cluster is connected.

\* Cluster Connected State: Ensuring the cluster is connected verifies that it is operational and can communicate with additional nodes being added.

\* Conclusion: The cluster must be in a Cluster Connected state to expand successfully.

\* Nutanix Clusters Expansion Guide

\* Azure NC2 Configuration Documentation

#### NEW QUESTION # 25

What is the purpose of an organization in the NC2 console?

- **A. To segregate clusters based on specific requirements**
- B. To link with NC2 subscription plans
- C. To Link with a Public Cloud account
- D. To map the on-premises Prism Central environment

**Answer: A**

Explanation:

\* Purpose of an Organization in NC2: In the NC2 console, an organization serves to manage and segregate clusters based on specific requirements such as departmental needs, project goals, or security policies.

\* Cluster Management: This segregation allows administrators to apply unique configurations, permissions, and policies to different clusters within the same environment, providing flexibility and control over resource allocation and management.

#### NEW QUESTION # 26

Which console must be used to deploy a Nutanix cluster on Azure?

- A. Azure Console
- **B. NC2 Console**
- C. Prism Central Console
- D. Prism Element Console

**Answer: B**

### NEW QUESTION # 27

An administrator deploys an NC2 cluster in Azure and uses 10.100.0.0/16 for one of the VNets. The cluster is configured as follows:

- \* 8 nodes
- \* Prism Central Deployed
- \* Files Deployed

Following the deployment, the administrator experiences network connectivity issues.

Which reason explains the connectivity issues?

- A. The 10.100.0.0/16 range contains too many IP addresses for an NC2 cluster.
- B. The 10.100.0.0/16 range is reserved by IANA.
- C. The 10.100.0.0/16 range is not a valid CIDR range.
- **D. 10.100.0.0/16 range is reserved for internal cluster usage.**

**Answer: D**

Explanation:

- \* Network Configuration: Using a specific IP range for a VNet can cause conflicts if that range is reserved or already in use by the cluster's internal operations.
- \* Internal Usage: In NC2, certain IP ranges are reserved for internal cluster functions and should not be used for VNets to avoid IP conflicts and connectivity issues.
- \* Impact: If the 10.100.0.0/16 range is reserved for internal usage, using it for a VNet would lead to IP conflicts, causing network connectivity issues.
- \* Verification: It's important to verify the reserved IP ranges in the NC2 documentation before assigning them to VNets.
- \* Conclusion: The connectivity issues are likely due to using the 10.100.0.0/16 range, which is reserved for internal cluster usage.
