PL-300 Vce Format - Latest PL-300 Study Guide

The Microsoft sector is an ever-evolving and rapidly growing industry that is crucial in shaping our lives today. With the growing demand for skilled Microsoft professionals, obtaining Microsoft Power BI Data Analyst (PL-300) certification exam has become increasingly important for those who are looking to advance their careers and stay competitive in the job market.

Microsoft Power BI Data Analyst Sample Questions (Q78-Q83):

NEW QUESTION # 78

You need to design the data model and the relationships for the Customer Details worksheet and the Orders table by using Power BI. The solution must meet the report requirements.

For each of the following statement, select Yes if the statement is true, Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 79

You create a data model in Power BI.

Report developers and users provide feedback that the data model is too complex.

The model contains the following tables.

The model has the following relationships:

*There is a one-to-one relationship between Sales_Region and Region_Manager.

*There are more records in Manager than in Region_Manager, but every record in Region_Manager has a corresponding record in Manager.

*There are more records in Sales_Manager than in Sales_Region, but every record in Sales_Region has a corresponding record in Sales_Manager.

You need to denormalize the model into a single table. Only managers who are associated to a sales region must be included in the reports.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

Answer:

Explanation:

Explanation:

1. Merge [Region_Manager] and [Manager] by using an inner join.

3. Merge [Sales_Region] and [Sales_Manager] by using an inner join.

6. Merge [Sales_Region] and [Region_Manager] by using an inner join.

NEW QUESTION # 80

In Power BI Desktop, you are creating a report that will contain three pages.

You need to create a custom tooltip page and prepare the page for use.

Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. For the tooltip page, configure filters.
- B. **For the tooltip page, set Allow use as tooltip to On.**
- C. **Configure filters on the target visual.**
- D. For the target page, set Allow use as tooltip to On.
- E. **Add and configure visuals on the tooltip page.**

Answer: B,C,E

NEW QUESTION # 81

You plan to create a Power BI dataset to analyze attendance at a school. Data will come from two separate views named View1 and View2 in an Azure SQL database. View1 contains the columns shown in the following table.

View2 contains the columns shown in the following table.

Answer:

Explanation:

NEW QUESTION # 82

You are profiling data by using Power Query Editor.

You have a table named Reports that contains a column named State. The distribution and quality data metrics for the data in State is shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Answer as selected.
