

Realistic Training 2V0-15.25 Materials - VMware Cloud Foundation 9.0 Support Best Practice Free PDF Quiz

As we all know, it is difficult to prepare the 2V0-15.25 exam by ourselves. Excellent guidance is indispensable. If you urgently need help, come to buy our study materials. Our company has been regarded as the most excellent online retailers of the 2V0-15.25 exam question. So our assistance is the most professional and superior. You can totally rely on our study materials to pass the exam. All the key and difficult points of the 2V0-15.25 exam have been summarized by our experts. They have rearranged all contents, which is convenient for your practice. Perhaps you cannot grasp all crucial parts of the 2V0-15.25 Study Tool by yourself. You also can refer to other candidates' review guidance, which might give you some help. Then we can offer you a variety of learning styles. Our printable 2V0-15.25 real exam dumps, online engine and windows software are popular among candidates. So you will never feel bored when studying on our 2V0-15.25 study tool.

These VMware Cloud Foundation 9.0 Support (2V0-15.25) exam questions are available at an affordable cost and cover current sections of the actual VMware Cloud Foundation 9.0 Support (2V0-15.25) Exam Questions. Therefore, relying on PassReview VMware 2V0-15.25 exam dumps will ensure that you crack the actual 2V0-15.25 certification exam on the first attempt. For the trouble-less VMware Cloud Foundation 9.0 Support (2V0-15.25) exam preparation of customers, we have designed these three formats of the VMware Cloud Foundation 9.0 Support (2V0-15.25) exam prep material: PDF, desktop practice test software, and web-based practice exam software. You can read the characteristics of these three versions of the VMware Cloud Foundation 9.0 Support (2V0-15.25) practice test material below.

High-quality 2V0-15.25 – 100% Free Training Materials | 2V0-15.25 Best Practice

You are in a quest for high quality practice materials like our 2V0-15.25 preparation exam. We avail ourselves of this opportunity to approach you to satisfy your needs. In order to acquaint you with our 2V0-15.25 practice materials, we wish to introduce a responsible company dealing with exclusively in area of 2V0-15.25 training engine and it is our company which keeps taking care of the readers' requests, desires and feeling about usage of our 2V0-15.25 study questions in mind.

VMware 2V0-15.25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> VMware by Broadcom Solution: This section focuses on understanding VMware by Broadcom's virtualization and cloud infrastructure platform for managing modern enterprise workloads.
Topic 2	<ul style="list-style-type: none"> Plan and Design the VMware by Broadcom Solution: This domain addresses architectural planning and design principles for creating scalable, secure virtual environments aligned with business requirements.

Topic 3	<ul style="list-style-type: none"> • Troubleshoot and Optimize the VMware by Broadcom Solution: This domain focuses on troubleshooting VCF deployment, upgrades, conversions, workload domains, fleet operations (certificates, passwords, identity), licensing, compute resources, storage (vSAN, supplemental storage), networking (VDS, NSX), VCF Operations tools, Identity Broker automation, and HCX workload migrations.
Topic 4	<ul style="list-style-type: none"> • IT Architectures, Technologies, Standards: This domain covers fundamental frameworks, tools, and best practices for building scalable, secure, and interoperable enterprise IT systems.
Topic 5	<ul style="list-style-type: none"> • Install, Configure, Administrate the VMware by Broadcom Solution: This area covers installing, configuring, and managing VMware solutions including VCF Fleet deployment, expansion, and reduction operations.

VMware Cloud Foundation 9.0 Support Sample Questions (Q57-Q62):

NEW QUESTION # 57

An administrator is responsible for managing a VMware Cloud Foundation (VCF) fleet. The following information has been provided about the VCF fleet configuration:

- * The VCF fleet consists of a single VCF instance with a single management domain and a single workload domain.
- * VCF Automation has a single Organization for VM Apps configured with a VCF Cloud Account for the workload domain.

The administrator has been tasked with creating a new Organization for All Apps to support the developers need to deploy Kubernetes-based applications in a new region in a workload domain.

The administrator attempts to create a new region through the VCF Automation Provider Portal but the VMware NSX manager for the workload domain does not appear on the list of available NSX managers.

What action must the administrator complete to resolve the issue?

- A. Add the SDDC Manager integration for the VCF instance.
- B. Deploy an additional VCF workload domain cluster.
- C. Deploy a new VCF workload domain.
- D. Trigger an inventory synch in VCF Operations fleet management.

Answer: A

NEW QUESTION # 58

An administrator wants to expand a VMware vSAN cluster in a workload domain by adding an unassigned host from the vSphere client. However, at the Host Selection screen no hosts are available and the following message displayed:

No unassigned hosts available with storage type VSAN. Commission hosts with physical NICs 0 & 1 to Add Host from UI.

How can the administrator commission hosts?

- A. From VCF Operations by navigating to Fleet Management.
- B. From the vSphere client by navigating to Supervisor Management.
- C. From the SDDC manager by navigating to Workload Domains.
- D. From the vSphere client by navigating to the Global Inventory.

Answer: C

Explanation:

In VMware Cloud Foundation 9.0, host commissioning is performed exclusively through SDDC Manager, not from the vSphere Client. When expanding a vSAN cluster inside a workload domain, all ESXi hosts must first be placed in an Unassigned state and then commissioned in SDDC Manager before they can appear in the "Add Host" wizard of the vSphere Client. The message in the problem-"No unassigned hosts available with storage type VSAN. Commission hosts with physical NICs 0 & 1 to Add Host from UI"-indicates that SDDC Manager has not yet commissioned any suitable hosts with the required NIC layout.

VCF 9.0 documentation states that for workload domain expansion, hosts must be commissioned under:

SDDC Manager # Workload Domains # (Select WLD) # Hosts # Commission Hosts.

This validates hardware, storage type (such as vSAN ESA or OSA), NIC placement, and ensures the host is compatible with the domain's configuration.

Options pointing to vSphere Client (A, D) or VCF Operations (B) do not perform the commissioning workflow. Therefore, the correct and verified answer is C, the only interface where host commissioning is officially supported.

NEW QUESTION # 59

An administrator is attempting to troubleshoot why the vSAN witness node cannot form a stretched cluster with the vSAN data nodes. The administrator can successfully ping the vSAN data node from the vSAN witness using the following command:

```
vmkping -I <witness-vmk#> <vsan-IPaddress> -s <1472> -d
```

What could be the possible cause of the issue?

- A. Jumbo Frames have not been enabled on the Witness Network.
- **B. Port 12321 is not opened bidirectionally between all nodes.**
- C. Port 443 is not opened bidirectionally between all nodes.
- D. The customer does not have any virtual machines in the vSAN Cluster.

Answer: B

Explanation:

In a vSAN Stretched Cluster, communication between the witness node and data nodes requires several specific TCP/UDP ports. The ability to successfully execute:

```
vmkping -I <witness-vmk> <vsan-IP> -s 1472 -d
```

confirms that:

- * L2/L3 connectivity is present
 - * MTU is correctly configured
 - * ICMP traffic flows without fragmentation
- However, vmkping alone does not verify vSAN control-plane communication.

For the vSAN Witness to properly form a cluster, TCP port 12321 must be open bidirectionally between:

- * Witness # Data nodes
- * Data nodes # Witness

Port 12321 is required for:

- * vSAN cluster membership
- * Witness traffic
- * vSAN object health/state synchronization

If this port is blocked by firewall policy or misconfigured network ACLs, the nodes can ping each other, but vSAN witness traffic will fail, preventing the stretched cluster from forming.

Why the other options are incorrect:

- * B. Port 443- Required for management, not cluster formation.
- * C. No VMs in cluster- Has no impact on witness formation.
- * D. Jumbo frames not enabled- Already ruled out by the successful 1472-byte vmkping with DF bit.

NEW QUESTION # 60

An administrator is automating the deployment of a new VMware Cloud Foundation (VCF) fleet using VCF Installer. The VCF fleet must include VCF Automation being deployed in a simple deployment model.

The administrator creates a JSON file, but during the installation attempt the VCF Installer returns an error indicating that the JSON validation has failed.

What is the cause of the errors?

- A. VCF components binaries are not downloaded.
- B. A separate distributed switch was defined for vSAN traffic.
- C. NSX Manager size was defined as large.
- **D. Second IP address for VCF Automation is not specified.**

Answer: D

Explanation:

In VCF 9.0, when deploying VCF Automation using the VCF Installer in a Simple Deployment Model, the appliance requires two IP addresses:

- * Primary IP- Management interface
- * Secondary IP- Required for service separation and internal routing for Automation services VMware's JSON schema for VCF Installer enforces this requirement. If the second IP is missing, incorrectly formatted, or placed under the wrong JSON section, the installer validation will fail immediately with a JSON schema error before deployment begins.

This is one of the most common causes of validation failure for VCF Automation deployment.

Option A (component binaries missing) produces a bundle download error, not JSON schema failure.

Option C (NSX Manager size = large) is allowed and does not break JSON validation.

Option D (separate vDS for vSAN) is allowed if defined correctly and also does not cause JSON schema failure.

NEW QUESTION # 61

An administrator has created an alarm for an object in VMware Cloud Foundation (VCF) Operations. The alert does not show up in the alert pane despite being configured on the object.

Parameters:

* Symptom definition: Read Latency (ms) is higher than 1 ms.

* Alert definition: Alert is triggered as soon as the latency is higher than the 1 ms defined in the symptom definition.

* Object type: Virtual Machine.

What is the reason the alert does not show up in the alert view?

- A. The metric used in the symptom definition does not apply to this object type.
- B. This type of alert must be forwarded from VMware Cloud Foundation Operations for Logs.
- C. The administrator is missing the privileges to view alerts for this object.
- **D. The alert is not enabled in the policy.**

Answer: D

Explanation:

In VMware Cloud Foundation 9.0, VCF Operations (vROps-based) uses policies to control which alerts, symptoms, and metrics are evaluated for a given object. Creating an alert definition and symptom alone is not sufficient; the alert must be associated with and enabled in a policy that is actively applied to the target object (in this case, a Virtual Machine). The documentation shows that when you create an alert definition, there is an explicit Policies step, where you select the policy (for example, the default policy) so that the alert becomes active for objects governed by that policy.

The metric "Read Latency (ms)" is valid for virtual-machine-related objects: VCF Operations documents Read Latency metrics at the VM disk and VM-datastore link level (for Disk and Datastore metrics on Virtual Machines). Therefore, option B (metric not applicable) is incorrect. No requirement exists that such a performance alert must be forwarded from VCF Operations for Logs (D); log-based alerts are a separate alert type.

If the alert definition is not enabled in the effective policy for that VM, VCF Operations will not evaluate the symptom or generate the alert, and it will not appear in the alert pane—even though the definition technically exists. This matches option C exactly.

NEW QUESTION # 62

.....

If you buy our 2V0-15.25 training quiz, you will find three different versions are available on our test platform. According to your need, you can choose the suitable version for you. The three different versions of our 2V0-15.25 Study Materials include the PDF version, the software version and the APP online version. We can promise that the three different versions of our 2V0-15.25 exam questions are equipped with the high quality.
