CSI Canadian Securities Course Exam2 Sample Questions (Q51-Q56):

NEW QUESTION # 51

Which type of ETF is also referred to as smart beta ETF?

- A. Synthetic
- B. Index-based
- C. Standard
- D. Rules-based

Answer: D

Explanation:

Rules-based ETFs, also known as smart beta ETFs, use predetermined rules or algorithms to select and weight securities in their portfolios. These ETFs aim to outperform traditional market-capitalization-weighted ETFs by targeting specific factors such as value, momentum, quality, or volatility.

* Strategic Factor Weighting: Securities are weighted based on fundamental or quantitative factors, not just market capitalization.

* Higher Returns Potential: These ETFs are designed to capture excess returns (alpha) relative to a benchmark.

* Lower Costs: Smart beta strategies often combine active and passive management elements at a lower cost than traditional active funds.

* A. Rules-based: Correct answer. Smart beta ETFs are built on rule-based frameworks designed to achieve specific investment objectives.

* B. Standard: Refers to traditional, market-cap-weighted ETFs, not smart beta.

* C. Synthetic: Refers to ETFs that use derivatives to replicate returns of an underlying index, unrelated to smart beta.

* D. Index-based: Includes standard ETFs tracking an index but does not apply specifically to smart beta.

NEW QUESTION # 52

Where would the description of a company's fixed assets normally be found?

- A. In the notes to the financial statements
- B. In the auditor report
- C. In the annual report

- D. In the statement of financial position.

Answer: A

Explanation:

The description of a company's fixed assets, including details about their nature, valuation methods, and depreciation, is typically found in the notes to the financial statements. These notes provide additional context, explanations, and details about the figures presented in the financial statements. The statement of financial position will list fixed assets, but the comprehensive description is found in the notes.

References:

* Volume 1, Chapter 11: Corporations and Their Financial Statements, section on "Notes to the Financial Statements" describes how notes are used to provide critical details about items in the financial statements, including fixed assets.

NEW QUESTION # 53

What is the meaning of ex-ante return?

- A. The historical return of the security.
- **B. The expected return of the security.**
- C. The return of the security based on the risk-free rate.
- D. The real return on the security.

Answer: B

Explanation:

Ex-ante return refers to the anticipated or expected return of an investment, based on forecasts rather than historical performance. This concept is critical in portfolio management and investment decision-making:

* Forecasting Returns:

* Ex-ante return estimates are derived from market conditions, expected economic performance, and specific security characteristics.

* Analysts use models like the Capital Asset Pricing Model (CAPM) to estimate expected returns based on the asset's risk profile and the risk-free rate.

* Differentiation from Historical Returns:

* Unlike ex-post (historical) returns, which reflect actual past performance, ex-ante returns guide future investment decisions.

* Importance in Portfolio Management:

* Portfolio managers rely on ex-ante returns to construct portfolios aligned with investment objectives, considering risk and return trade-offs.

* Real vs. Nominal Returns:

* Ex-ante returns can be adjusted for inflation to reflect real expected returns, providing a more accurate picture of purchasing power gains.

References to Study Documents:

* Volume 2, Chapter 15, "Introduction to the Portfolio Approach," explores the estimation of expected returns and their role in portfolio management.

* Volume 1, Chapter 7, "Fixed-Income Securities: Pricing and Trading," includes calculations and applications related to expected and realized returns.

NEW QUESTION # 54

Which type of commodity ETF is most suitable for an investor seeking to gain exposure to the spot price of a commodity?

- A. Swap-based
- B. Equity-based
- C. Futures-based.
- **D. Physical-based**

Answer: D

Explanation:

Commodity Exchange-Traded Funds (ETFs) provide investors with exposure to commodities such as gold, oil, and agricultural products. The most suitable type of commodity ETF for gaining exposure to the spot price of a commodity is the Physical-based ETF because it involves direct ownership or storage of the commodity. For instance, gold ETFs backed by physical gold store

bullion in vaults.

1. Physical-based ETFs These ETFs hold the actual commodity in physical form, which ensures a close tracking of the spot price. Physical gold ETFs, for example, store gold bars and adjust the NAV (Net Asset Value) based on the current spot price. This eliminates discrepancies caused by futures contracts or swaps, making them ideal for tracking spot prices.

2. Swap-based ETFs These rely on derivative agreements (swaps) to replicate the price movements of a commodity. While cost-effective, they do not hold the actual commodity, and their performance may slightly deviate from the spot price due to tracking errors or counterparty risks.

3. Futures-based ETFs These use futures contracts to gain exposure. However, futures contracts come with complexities such as contango and backwardation, which can cause performance differences from the spot price over time.

4. Equity-based ETFs These invest in shares of companies involved in the commodity sector (e.g., mining or energy companies). Their performance is influenced by company-specific factors and broader equity market trends, making them unsuitable for tracking spot prices.

References from CSC Study Documents:

* Exchange-Traded Funds, Chapter 19, Volume 2: Discusses the characteristics and structure of ETFs, including commodity-based ETFs and their classification.

* Risks related to tracking error and direct ownership of assets are highlighted under ETF types in Section 19.

NEW QUESTION # 55

What is a key feature of index-linked GICs?

- A. They are insured by the CDIC
- B. Redemptions can occur annually on the annual anniversary date.
- C. They guarantee a positive return regardless of market direction.
- D. They are currently regulated by National Instrument 81-102.

Answer: A

Explanation:

Key Features of Index-Linked GICs:

* What Are Index-Linked GICs? Index-Linked Guaranteed Investment Certificates (GICs) are fixed-term investments where returns are tied to the performance of a specific index (e.g., S&P/TSX). They offer principal protection but do not guarantee a fixed return.

* Key Feature: CDIC Insurance A notable feature of index-linked GICs is that they are insured by the Canada Deposit Insurance Corporation (CDIC) up to the applicable limits, as they qualify as GICs under CDIC guidelines. This ensures the safety of the investor's principal.

Explanation of Each Option:

* Option A (They are currently regulated by National Instrument 81-102):

* Incorrect. Index-linked GICs are not regulated under National Instrument 81-102, which governs mutual funds and other securities, not GICs.

* Option B (Redemptions can occur annually on the annual anniversary date):

* Incorrect. Index-linked GICs are typically non-redeemable before maturity unless specifically structured otherwise. Most index-linked GICs require investors to hold the investment until the end of the term.

* Option C (They guarantee a positive return regardless of market direction):

* Incorrect. While index-linked GICs guarantee the return of principal, they do not guarantee a positive return. If the linked index performs poorly, the return could be zero.

* Option D (They are insured by the CDIC):

* Correct. Index-linked GICs are covered by CDIC insurance up to its coverage limits, providing investors with principal protection even in the event of issuer default.

References to Canadian Securities Course Exam 2 Study Materials:

* Volume 2, Chapter 23 - Market-Linked Guaranteed Investment Certificates

* Discusses the structure, features, and benefits of index-linked GICs, including CDIC coverage.

* Volume 2, Chapter 17 - Overview of Managed Products

* Provides context on how GICs compare to other managed products.
