SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite Sample Questions (Q55-Q60):

NEW QUESTION # 55
(What are some functions that the SAP Build Code with code generation add-on provides? Note: There are 2 correct answers to this question.)

- A. Insert code snippets through Joule
- B. Explain existing code
- C. Refactor CAP projects
- D. Generate unit tests for ABAP classes

Answer: B,D

Explanation:
Comprehensive and Detailed Explanation From Exact Extract: The SAP Build Code with code generation add-on, powered by Joule, provides functions such as explaining existing code through code reviews and comments, and generating unit tests for ABAP classes by selecting methods and using AI-based features to create tests efficiently.
Exact extracts supporting this:
Explain existing code: "/cap-edit-model: Edits existing CAP data models, supports code reviews, adds comments, and answers questions like 'Does this code follow the best practices of CAP?'"community.sap.com "/ui5: Explains UI5-related artifacts, e.g., 'What does the code in the main controller do?', with options to consider selected code without specifying files."community.sap.com "Code Commenting via Joule Code Assistant, generating explanatory comments for selected code, with accept/reject options."community.sap.com Generate unit tests for ABAP classes: "With Joule for developers, ABAP AI capabilities, you can easily access AI-based features designed to help you create ABAP Unit tests."help.sap.com "Navigate to any of the specified views and select a public method from a global ABAP class. Open the context menu and select Joule Generate Unit Tests."help.sap.com
Other options are incorrect because:
Option B: While Joule supports inline code-completion for suggesting snippets, this is a general feature rather than a specific function of the code generation add-on, which focuses on broader generation tasks like models and tests rather than snippet insertion.
Option C: Refactoring is supported for CAP projects through editing models and code refactor assistants, but it is not highlighted as a primary function of the code generation add-on, which emphasizes generation and explanation over refactoring.
Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: Based on SAP Community blogs like "Overview of all GenAI Options in SAP Build Code" and "Develop with Joule in SAP Build Code," as well as SAP Help Portal documentation on ABAP AI capabilities in SAP Build Code. These align with the C_BCBAI_2502 certification, positioning SAP Build Code as an AI-enhanced development tool within the SAP Business Suite for Java, JavaScript, and ABAP.

NEW QUESTION # 56
What are the main domain clusters of SAP's guiding principles for ethical AI? Note: There are 3 correct answers to this question.

- A. Executive Sponsorship
- B. AI Ethics Steering Committee
- C. AI System engineering
- D. Organizational practice

Answer: B,C,D

Explanation:
SAP's guiding principles for ethical AI are organized into key domain clusters, including the AI Ethics Steering Committee, Organizational practice, and AI System engineering, as outlined in the SAP Responsible AI Framework. The AI Ethics Steering Committee oversees governance, ensuring AI development aligns with ethical standards. Organizational practice involves embedding ethical considerations into business processes, training, and culture to promote responsible AI use. AI System engineering focuses on designing AI systems with transparency, fairness, and accountability, incorporating technical safeguards to mitigate bias and ensure reliability. Executive Sponsorship, while important for leadership support, is not a defined domain cluster, and AI System definition is not explicitly listed in SAP's framework. These clusters ensure SAP's AI solutions are trustworthy and aligned with global ethical standards.

NEW QUESTION # 58
What enables SAP's Suite as a Service approach? Note: There are 3 correct answers to this question.

- A. Integrated applications
- B. Harmonized data

- C. Coordinated automation
- D. Scalable intelligence
- E. Embedded AI

Answer: A,B,C

NEW QUESTION # 59
What are some of the challenges LLMs face that SAP Knowledge Graph tries to deal with?

- A. Generating factually incorrect or fabricated information
- B. Overlooking relationships between entities
- C. Capturing of dynamic and real-time information
- D. Providing subjective and contextual information

Answer: A,B

Explanation:
The SAP Knowledge Graph addresses key challenges faced by large language models (LLMs), as per SAP Business AI documentation. Generating factually incorrect or fabricated information (hallucinations) is mitigated by grounding LLMs in structured, verified enterprise data, ensuring accuracy. Overlooking relationships between entities is tackled by the Knowledge Graph's ability to map and contextualize data relationships, providing a comprehensive view of interconnected information. While capturing dynamic, real-time information and providing subjective, contextual information are challenges, they are not primary focuses of the Knowledge Graph, which emphasizes structured data and factual grounding. These capabilities enhance the reliability of AI-driven insights.

NEW QUESTION # 60
.....

For busy candidates who want to study for the SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite exam on the go via their smartphones, laptops, or tablets, our updated SAP C-BCBAI-2509 PDF Questions are excellent.
