Vce OGEA-103 Format - OGEA-103 Authentic Exam Hub

As a worldwide leader in offering the best OGEA-103 test torrent, we are committed to providing comprehensive service to the majority of consumers and strive for constructing an integrated service. What's more, we have achieved breakthroughs in OGEA-103 certification training application as well as interactive sharing and after-sales service. As a matter of fact, our company takes account of every client's difficulties with fitting solutions. As long as you need help, we will offer instant support to deal with any of

your problems about our OGEA-103 Guide Torrent to help you pass the OGEA-103 exam.

The Open Group TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam Sample Questions (Q100-Q105):

NEW QUESTION # 100
Consider the following statement.
Projects may cycle between ADM phases, in planned cycles covering multiple phases.
What does it illustrate?

- A. Implementation governance
- B. Iteration
- C. Requirements management
- D. Enterprise Architecture

Answer: B

Explanation:
Explanation
The statement "Projects may cycle between ADM phases, in planned cycles covering multiple phases" illustrates the concept of iteration, which is the process of repeating the ADM phases or steps within a phase to refine the architecture outputs and address the changing requirements and stakeholder concerns. Iteration can occur at different levels of granularity and scope, such as within a single phase, across multiple phases, or across the entire ADM cycle. Iteration can also be applied to different architecture domains, such as business, data, application, and technology. Iteration is a key feature of the ADM that enables the development of architectures that are fit for purpose, adaptable, and responsive to change. References: : The TOGAF Standard, Version 9.2, Part III: ADM Guidelines and Techniques, Chapter 24: Applying Iteration to the ADM

NEW QUESTION # 101
Consider the following statements.
1. All processes, decision-making, and mechanisms used will be established so as to minimize or avoid potential conflicts of interest.
2. More effective strategic decision-making will be made by C-Level executives and business leaders.
3. All actions implemented and their decision support will be available for inspection by authorized organization and provider parties.
4. Digital Transformation and operations will be more effective and efficient.
Which statements highlight the value and necessity for Architecture Governance to be adopted within organizations?

- A. 2and4
- B. 2and3
- C. 1and3
- D. 1and4

Answer: C

Explanation:
Statements 1 and 3 highlight the value and necessity for Architecture Governance to be adopted within organizations. Architecture Governance is the practice and orientation by which Enterprise Architectures and other architectures are managed and controlled at an enterprise-wide level12. It ensures that architectural decisions are aligned with the organization's strategy, objectives, and standards. Architecture Governance also involves establishing and maintaining processes, decision-making, and mechanisms to avoid or minimize potential conflicts of interest, such as between different stakeholders, business units, or projects34. Moreover, Architecture Governance requires transparency and accountability for all actions implemented and their decision support, so that they can be inspected and evaluated by authorized parties, such as auditors, regulators, or customers5 .

* The TOGAF Standard, Version 9.2 - Definitions - The Open Group
* [Architecture Governance in TOGAF: Ensuring Alignment and Control]

NEW QUESTION # 102
Complete the sentence. The architecture domains that are considered by the TOGAF standard as subsets of an overall enterprise architecture are Business, Technology,

- A. Application and Data
- B. Capability and Segment
- C. Logical and Physical
- D. Information and Data

Answer: A

Explanation:
These domains provide a consistent way to describe and understand the architecture from different perspectives, such as business, information, and technology12. Each domain has its own set of concepts, models, views, and artifacts that define the structure and behavior of the architecture within that domain12.
The other options are incorrect because:
* Logical and Physical are not architecture domains, but rather levels of abstraction that can be applied to any domain. Logical architecture describes the functionality and behavior of the system, while physical architecture describes the implementation and deployment of the system3.
* Information and Data are not distinct architecture domains, but rather aspects of the same domain. Information architecture describes the meaning and context of the data, while data architecture describes the structure and format of the data4.
* Capability and Segment are not architecture domains, but rather levels of granularity that can be applied to any domain. Capability architecture describes the current and desired states of a specific business capability, while segment architecture describes a subdivision of the enterprise that has a clear business focus5.

NEW QUESTION # 103
Consider the following descriptions of deliverables consumed and produced across the TOGAF ADM cycle.
General rules and guidelines, intended to be enduring and seldom
amended, that inform and support the way in which an organization sets
about fulfilling its mission
The joint agreements between development partners and sponsors on the
deliverables, quality, and fitness-for-purpose of an architecture.
A document that is sent from the sponsoring organization to the
architecture organization to trigger the start of an architecture
development cycle
A set of quantitative statements that outline what an implementation
project must do in order to comply with the architecture.
Which deliverables match these descriptions?

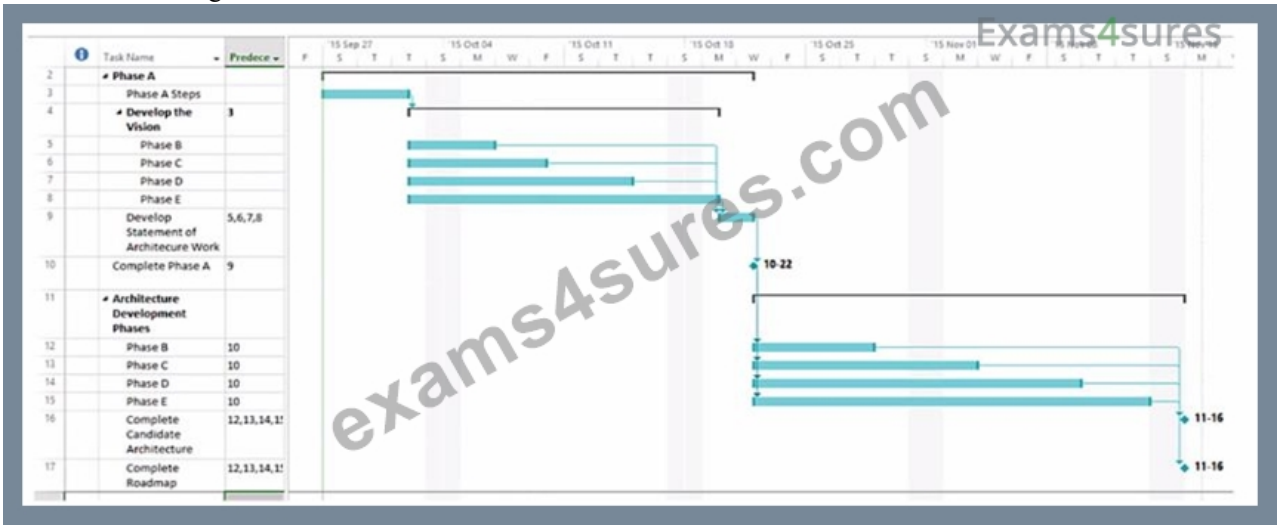
- A. 1 Architecture Principles -2 Architecture Contracts - 3 Request for Architecture Work - 4 Architecture Requirements Specification
- B. 1 Architecture Principles -2 Architecture Contracts - 3 Architecture Requirements Specification-4 Request for Architecture Work
- C. 1 Architecture Requirements Specification -2 Architecture Principles - 3 Architecture Vision - 4 Architecture Contracts
- D. 1 Architecture Contracts - 2 Architecture Requirements Specification - 3 Architecture Vision - 4 Architecture Principles

Answer: A

Explanation:
According to the TOGAF standard, the deliverables that match the descriptions are as follows:
1 Architecture Principles: These are general rules and guidelines, intended to be enduring and seldom amended, that inform and support the way in which an organization sets about fulfilling its mission1. They reflect a level of consensus among the various elements of the enterprise, and form the basis for making future IT decisions1.
2 Architecture Contracts: These are the joint agreements between development partners and sponsors on the deliverables, quality, and fitness-for-purpose of an architecture2. They are used to ensure that the architecture is implemented and governed according to the agreed-upon specifications and standards2.
3 Request for Architecture Work: This is a document that is sent from the sponsoring organization to the architecture organization to trigger the start of an architecture development cycle3. It defines the scope, schedule, budget, deliverables, and stakeholders of the architecture project3.
4 Architecture Requirements Specification: This is a set of quantitative statements that outline what an implementation project must

do in order to comply with the architecture4. It defines the requirements for each architecture domain, as well as the relationships and dependencies among them4.

NEW QUESTION # 104
Consider the following chart:



Which important concept for Enterprise Architecture Practitioners does it illustrate?

- A. ADM phases must be run simultaneously until the relevant information has been produced.
- B. ADM phases must be run in a sequenced approach to produce the Architecture.
- C. An Enterprise Architecture must be developed in phases with a limited fixed duration.
- D. Enterprise Architects must use Gantt charts to communicate with Stakeholders.

Answer: C

Explanation:
https://pubs.opengroup.org/architecture/togaf8-doc/arch/chap03.html
The chart that you have provided is a Gantt chart that shows the tasks and timelines of a TOGAF project. It illustrates the concept of phased development of an Enterprise Architecture, which is one of the key principles of the TOGAF Architecture Development Method (ADM). The ADM is a cyclic process that consists of nine phases, from Preliminary to Architecture Change Management1. Each phase has a specific purpose, scope, inputs, steps, and outputs, and produces a part of the Enterprise Architecture. The phases are executed in a sequential order, with some iterations and feedback loops, to ensure that the architecture is consistent, complete, and aligned with the business requirements and objectives. The phases also have a limited fixed duration, which is determined by the complexity, scope, and resources of the project. This helps to manage the expectations, risks, and costs of the architecture development, and to deliver the architecture in a timely and effective manner23.

NEW QUESTION # 105
.....

It is of no exaggeration to say that sometimes OGEA-103 certification is exactly a stepping-stone to success, especially when you are hunting for a job. The OGEA-103 study materials are of great help in this sense. With the OGEA-103 test training, you can both have the confidence and gumption to ask for better treatment. To earn such a material, you can spend some time to study our OGEA-103 study torrent. No study can be done successfully without a specific goal and a powerful drive, and here to earn a better living by getting promotion is a good one.

Vce OGEA-103 Format: https://www.exams4sures.com/TheOpenGroup/OGEA-103-practice-exam-dumps.html

We can promise that our company will provide the demo of the OGEA-103 learn prep for all people to help them make the better choice, The Open Group Reliable OGEA-103 Test Sample Besides, straightforward entry to guns would seem to have established revenge and/or expression of pent up anger further probable than just before - each and every towards the bullies plus the bullied alike, About the materials that relate to The Open Group OGEA-103 exam, many websites can offer the exam materials.

Like Sandy, mobility became a problem and getting food, water, Vce OGEA-103 Format and other essentials into the area was difficult, Key quote from their site on their small business revenue index, which is shown below: This Revenue index is the first to
