This means there are no additional licensing fees, making Cloud ALM a highly accessible lifecycle management platform. Its broad availability encourages consistent adoption across organizations of all sizes.

Second, SAP Cloud ALM is instantly available as a cloud-native subscription service. There is no installation or infrastructure setup required. Customers can begin using Cloud ALM almost immediately after provisioning, accelerating project kickoff and reducing administrative overhead.

Third, one of its major benefits is that it reduces total cost of ownership (TCO) by minimizing on-premise infrastructure requirements and providing standardized, automated tools for monitoring, implementation, testing, and operations. This reduces the need for multiple separate ALM systems and allows customers to centralize lifecycle activities.

Option A is incorrect because process mining with Plug & Gain is a Signavio capability. Option D is incorrect because Cloud ALM supports both cloud and hybrid/on-premise scenarios through integration monitoring and operational support. Therefore, the correct benefits are B, C, and E.
