

Top Features of itPass4sure Cisco 300-610 Dumps PDF file

What's more, part of that itPass4sure 300-610 dumps now are free: <https://drive.google.com/open?id=1v5Zt3Aumt7X2CeLdFxMVTvXAFbxfAleg>

Our 300-610 guide torrent has gone through strict analysis and summary according to the past exam papers and the popular trend in the industry and are revised and updated. The 300-610 exam questions have simplified the sophisticated notions. The software boosts varied self-learning and self-assessment functions to check the learning results. The software of our 300-610 Test Torrent provides the statistics report function and help the students find the weak links and deal with them. With this version of our 300-610 exam questions, you will be able to pass the exam easily.

Cisco 300-610 Exam is intended for experienced professionals who are responsible for designing and implementing data center infrastructure. 300-610 exam covers a wide range of topics, including data center infrastructure design, network design, storage design, compute design, automation design, and security design. Candidates are required to have a deep understanding of Cisco data center technologies, including Cisco Nexus switches, Cisco UCS servers, Cisco ACI, and Cisco HyperFlex. Candidates are also expected to have hands-on experience in designing and implementing data center infrastructure solutions.

300-610 Latest Exam Answers | 300-610 Exam Price

Everyone wants to succeed. As a worker in IT industry, you know how important the 300-610 exam certification is for your career success. There are more and more people to participate in 300-610 certification exam, and how to win in the increasingly competitive situation? To chose the right hand is the key. Our itPass4sure team has studies the 300-610 Certification Exam for years so that we have in-depth knowledge of the test. We believe that you must be succeed in the exam with the help of 300-610 test software provided by our itPass4sure.

Cisco 300-610 exam is designed to test an individual's ability to design a data center infrastructure using Cisco technologies. Designing Cisco Data Center Infrastructure certification exam is a part of the CCNP Data Center track and is intended for IT professionals who want to take their skills to the next level. 300-610 exam will cover various topics related to Cisco data center design, including network virtualization, storage network design, and infrastructure automation.

Cisco 300-610 exam is a certification exam that is designed for IT professionals who are interested in validating their skills and knowledge in designing Cisco data center infrastructure. 300-610 Exam is designed to test the candidate's ability to design and deploy data center infrastructure, including storage networking, compute infrastructure, network infrastructure, and automation. It is also designed to test the candidate's ability to design and deploy cloud infrastructure, including private, public, and hybrid clouds.

Cisco Designing Cisco Data Center Infrastructure Sample Questions (Q274-Q279):

NEW QUESTION # 274

A Cisco UCS instance has four interfaces on a UCS VIC. Where on the fabric interconnect does each interface terminate?

- A. physical port

- B. virtual interface
- C. vPC
- D. port channel

Answer: B

Explanation:

<https://www.cisco.com/c/dam/en/us/products/collateral/servers-unified-computing/ucs-6300-series-fabric-interconnects/cisco-unified-fabric.pdf>

NEW QUESTION # 275

A Cisco engineer is preparing a service profile template for a design, which consists of 20 x UCS B200M6 blade servers 2 x UCS 6454 Fabric Interconnect in End Host Mode, and 3 x UCS 5108 server chassis with 2408 Fabric Extenders. The blade servers are equipped with VIC 1480 adapters. The engineer does not configure a vNIC/vHBA placement policy in the service profile and the vNICs and vHBAs are assigned to the vCon in a particular order. What is the mapping scheme in which Cisco UCS assigns the vCons based on the type of server and the selected virtual slot?

- A. cross match
- B. linear ordered
- C. round robin
- D. network mesh

Answer: C

NEW QUESTION # 276

An engineer must create a solution for server deployment in a multitenant UCS environment with UCS Central. The solution must:

- Make use of centralized WWPN and IP pools.
- Define a unique network configuration for an organization.

Which action creates a solution that meets the requirements?

- A. Create a local service profile and reference global pools.
- B. Copy global pools to the local organization and reserve a WWPN range.
- C. Configure a global service profile that references local policies.
- D. Set up a local vNIC template and create global service profiles.

Answer: A

Explanation:

By defining the service profile locally within the tenant's organization and pointing its WWPN and IP assignments to the centralized (global) pools in UCS Central, you get unique network settings per org while still leveraging shared WWPN/IP resources.

NEW QUESTION # 277

A network consultant proposes that the configuration of the Cisco UCS servers be based on service templates to facilitate the UCS infrastructure operation. The service profiles must remain connected to the template and be modified when the template settings are changed.

Which configuration meets these requirements?

- A. service profile template with type set to Initial
- B. service profile with type set to Local
- C. service profile with type set to Global
- D. service profile template with type set to Updating

Answer: D

NEW QUESTION # 278

An engineer must design a Cisco UCS environment that will connect to a storage area network. The solution must include support

- * connectivity to the existing 10 Gigabit Ethernet network
- * booting the server infrastructure from the network
- * integration with the existing Fibre Channel storage arrays
- * lossless data transfer

- A. CIFS
- B. FCP
- C. NFS
- **D. FCoE**

NEW QUESTION # 279
