BONUS!!! Download part of Guide Torrent 400-007 dumps for free: <https://drive.google.com/open?id=1pRSzZaKysotb1V6mggaTCIakPShKBzEL>

Practicing the 400-007 exam questions, you actually learn to answer the real 400-007 exam questions. Additionally, you also study time management to solve paper in the given time. Above all, you overcome the fear of the real exam and doing 400-007 Exam Dumps, you gain enough confidence and examination ability that is necessary to pass the tough 400-007 certifications.

Cisco 400-007 exam is a highly specialized certification exam that validates the skills of network design professionals. It tests candidates on their ability to design complex networks and provide solutions to real-world problems. Candidates preparing for the exam should have a deep understanding of network design principles, protocols, and technologies, as well as hands-on experience designing and implementing network solutions.

Cisco 400-007 exam is an essential certification for network designers who want to demonstrate their expertise in this field. 400-007 exam validates the candidate's knowledge and skills in network design, and prepares them for the practical exam. By passing the Cisco 400-007 Exam, candidates can enhance their career prospects and open up new opportunities in the network design industry.

Cisco 400-007 exam is a written exam that consists of 90-110 multiple-choice questions, and the duration of the exam is 120 minutes. Candidates are required to demonstrate their knowledge and understanding of network design methodologies, network infrastructure and services, and network security. 400-007 exam also evaluates candidates' ability to design network solutions that meet business requirements, considering factors such as scalability, availability, and performance.

## Cisco 400-007 Exam Dumps.zip & 400-007 Guaranteed Questions Answers

Quitters never win and winners never quit. If you are determined to clear 400-007 exam and obtain a certification you shouldn't give up because of one failure. If you are willing, our Cisco 400-007 valid exam simulations file can help you clear exam and regain

confidence. Every year there are thousands of candidates choosing our products and obtain certifications so that our 400-007 valid exam simulations file is famous for its high passing-rate in this field. If you want to pass exam one-shot, you shouldn't miss our files.

## Cisco Certified Design Expert (CCDE v3.0) Written Exam Sample Questions (Q383-Q388):

### NEW QUESTION # 383

A financial company requires that a custom TCP-based stock-trading application be prioritized over all other traffic for the business due to the associated revenue. The company also requires that VoIP be prioritized for manual trades. Which directive should be followed when a QoS strategy is developed for the business?

- A. Allow VoIP and the custom application to share the same priority queue,
- B. Avoid placing the custom application in a CBWFQ queue that contains other
- C. Interleave the custom application with other TCP applications in the same CBWR
- D. **The custom application and VoIP must be assigned their own separate priority queue.**

**Answer: D**

### NEW QUESTION # 384

An architect receives a business requirement from a CTO that states the RTO and RPO for a new system should be as close as possible to zero. Which replication method and data center technology should be used?

- A. synchronous replication over geographically dispersed dual data centers via MPLS
- B. asynchronous replication over geographically dispersed dual data centers via CWDM
- C. asynchronous replication over dual data centers via DWDM
- D. **synchronous replication over dual data centers via Metro Ethernet**

**Answer: D**

Explanation:

\* C (Synchronous replication over Metro Ethernet) provides real-time replication with zero data loss (RPO = 0) and minimal recovery time (RTO # 0).

\* Metro Ethernet offers low-latency, high-bandwidth, and deterministic connectivity between closely located data centers, ideal for synchronous replication.

Why other options are incorrect:

\* A & D: Asynchronous replication cannot guarantee zero RPO/RTO.

\* B: MPLS introduces variable latency unsuitable for synchronous replication.

### NEW QUESTION # 385

Refer to the exhibit.

The enterprise customer wants to stream one-way video from their head office to eight branch offices using multicast. Their current service provider provides a Layer3 VPN solution and manages the CE routers, but they do not currently support multicast. Which solution quickly allows this multicast traffic to go through while allowing for future scalability?

- A. **Enable a GRE tunnel between nodes C2 and C4**
- B. Enable a GRE tunnel between nodes C1 and C4
- C. The service provider must provide a Draft Rosen solution to enable a GRE tunnel between nodes PE1 and PE2

- D. Implement hub and spoke MPLS VPN over DMVPN (also known as 2547o DMVPN) between CE1 and CE2
- E. Enable a GRE tunnel between nodes CE1 and CE2

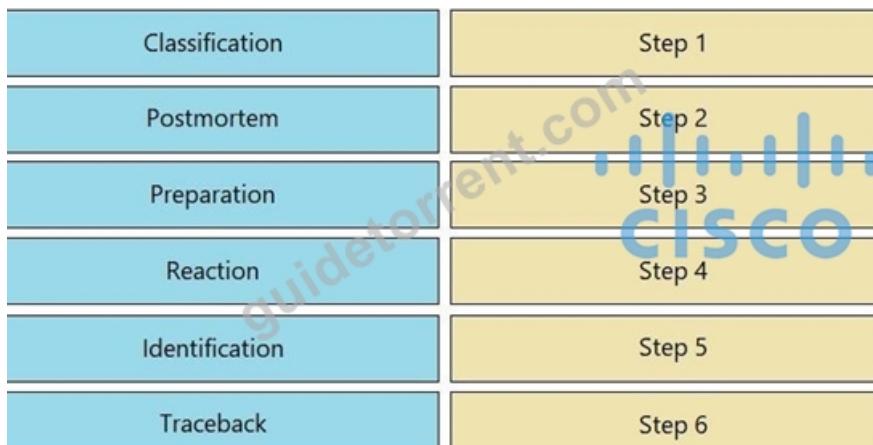

**Answer: A**

### NEW QUESTION # 386

Drag and Drop Question

While computer networks and sophisticated applications have allowed individuals to be more productive, the need to prepare for security threats has increased dramatically. A six-step methodology on security incident handling has been adopted by many organizations, including service providers, enterprises, and government organizations to ensure that organizations are aware of significant security incidents, and act quickly to stop the attacker, minimize damage caused, and prevent follow on attacks or similar incidents in the future. Drag and drop the actions on the left to the targets on the right in the correct order.

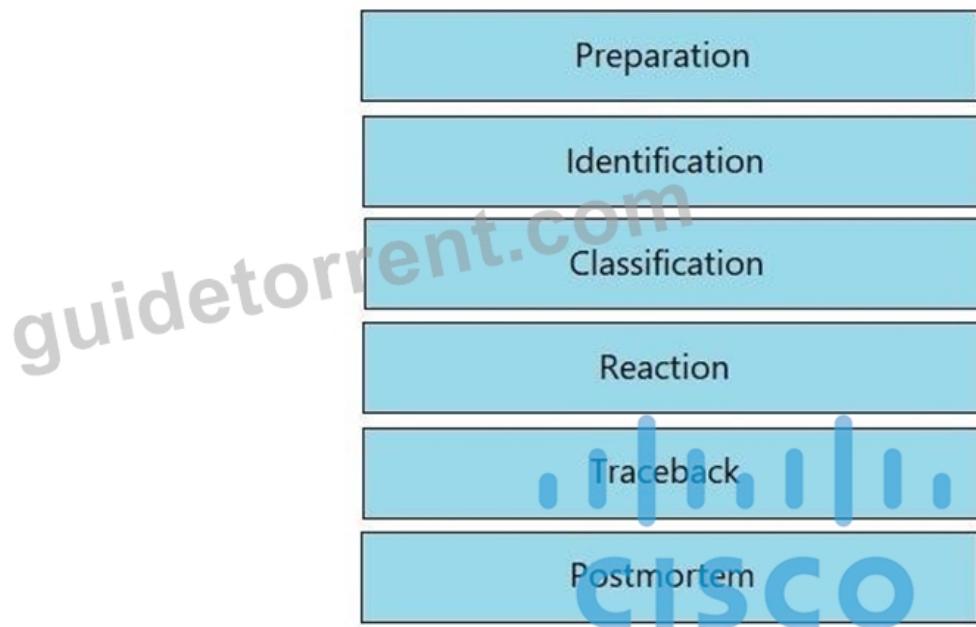

**Answer Area**

**Answer:**

Explanation:

**Answer Area**

Explanation:

1. Preparation - This is the first step, where the organization ensures it is ready to handle security incidents by implementing necessary policies, procedures, and tools.
2. Identification - The next step is identifying the potential security incident by detecting and confirming the presence of a security breach.

3. Classification - After identification, classify the incident according to its severity and impact to understand the appropriate response needed.
4. Reaction - In this step, the organization takes immediate actions to stop the attack, contain the damage, and mitigate further risks.
5. Traceback - This involves tracing the origin of the attack to gather information about how the attack happened and to understand the attack vector.
6. Postmortem - Finally, after the incident is contained and addressed, a postmortem analysis is conducted to review the incident, assess the response effectiveness, and put measures in place to prevent future incidents.

### NEW QUESTION # 387

Company XYZ has a new network based on IPv6. Some of the subnets that they are planning to use will be confidential and need an addressing scheme that confines them to the local campus network.

Which type of IPv6 addresses can be used for these networks in the IPv6 addressing design?

- A. private addresses
- B. local addresses
- C. **unique local addresses**
- D. link-local addresses

**Answer: C**

### NEW QUESTION # 388

.....

They all got help from valid, updated, and real 400-007 exam dumps. The Cisco 400-007 exam questions are designed and verified by experienced and qualified Cisco 400-007 Exam trainers. They have verified all 400-007 exam questions one by one and ensured the top standard of Cisco 400-007 practice test questions.
