## MB-500 Exam Consultant & MB-500 Test Cram Review

There are three formats of PrepAwayExam practice material. Anyone can try a free demo to assess the quality of our Microsoft product before buying. The Microsoft Dynamics 365: Finance and Operations Apps Developer (MB-500) PDF file of actual questions, web-based Microsoft Dynamics 365: Finance and Operations Apps Developer practice exam, and desktop practice test are three formats of PrepAwayExam. The MB-500 PDF Questions are printable which means you can do off-screen study.

Microsoft MB-500 Exam, also known as the Microsoft Dynamics 365: Finance and Operations Apps Developer Exam, is designed to test the skills and knowledge of developers who work with Microsoft Dynamics 365 Finance and Operations applications. Microsoft Dynamics 365: Finance and Operations Apps Developer certification is intended for developers who have experience with Dynamics 365 Finance and Operations, and who want to demonstrate their expertise in developing and implementing customizations, extensions, and integrations.

### Microsoft Dynamics 365: Finance and Operations Apps Developer Sample Questions (Q205-Q210):

#### NEW QUESTION # 205

You need to configure security for the CashDisc form.

What changes should you make? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Account	Action
Accounts Payable Manager	<div><div></div><div>Duplicate the role and modify the existing privilege entry point access.</div><div>Create a new duty and privilege and add both to the role.</div><div>Run the security tool and validate access for the role.</div></div>
Accounts Payable Clerk	<div><div></div><div>Create a new role for the AP clerk and restrict delete access for the CashDisc form.</div><div>Create a new duty and add the existing privilege and add duty to the role.</div></div>

Answer:

Explanation:

Account	Action
Accounts Payable Manager	<div><div></div><div>Duplicate the role and modify the existing privilege entry point access.</div><div>Create a new duty and privilege and add both to the role.</div><div>Run the security tool and validate access for the role.</div></div>
Accounts Payable Clerk	<div><div></div><div>Create a new role for the AP clerk and restrict delete access for the CashDisc form.</div><div>Create a new duty and add the existing privilege and add duty to the role.</div></div>

Explanation:

Duplicate the role and modify the existing privilege entry point access.  
Create a new duty and privilege and add both to the role.  
Run the security tool and validate access for the role.

Create a new role for the AP clerk and restrict delete access for the CashDisc form.  
Create a new duty and add the existing privilege and add duty to the role.

### NEW QUESTION # 206

You create a Visual Studio project named ProductUpdates.

You must update data in a table named ProductTable. You must be able to run the code from Visual Studio.

You need to create an X++ class.

Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

### Answer Area

#### Actions

Add the ExtensionOf attribute to the class.

Set the class as the startup object.

Write database manipulation code in the class.

Build and run the class.

Create a runnable class and add it to the ProductUpdates project.

Create a class extension of the ProductTable and add it to the ProductUpdates project.

Open the new class and add a main method to the class.

**Answer:**

Explanation:

**Actions**

Add the ExtensionOf attribute to the class.

Set the class as the startup object.

Write database manipulation code in the class.

Build and run the class.

Create a runnable class and add it to the ProdcutUpdates project.

Create a class extension of the ProductTable and add it to the ProductUpdates project.

Open the new class and add a main method to the class.

**Answer Area**

Create a runnable class and add it to the ProdcutUpdates project.

Open the new class and add a main method to the class.

Write database manipulation code in the class.

Set the class as the startup object.

Build and run the class.

Explanation:

1. Create a runnable class and add it to the ProductUpdates project
2. Open the new class and add a main method to the class
3. Write the database manipulation code in the class
4. Set the class as startup object
5. Build and run the class

#### NEW QUESTION # 207

A company uses Dynamics 365 Finance.

A user is unable to access the new Customer Credit Limit report.

You need to configure security for the report.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Actions**

Add the duty extension to a role

Create a new privilege and duty extension

Add the new privilege to a duty extension and output the menu item to the privilege

Add a display menu item to the privilege

Create a new security policy and duty extension

**Answer Area**

➡

⬅

**Answer:**

Explanation:

Answer Area
Create a new privilege and duty extension
Add the new privilege to a duty extension and output the menu item to th privilege
Add the duty extension to a role

- 1 - Create a new privilege and duty extension
- 2 - Add the new privilege to a duty extension and output the menu item to th privilege
- 3 - Add the duty extension to a role

### NEW QUESTION # 208

You need to develop, test, and deploy the Vendor Exclusion list solution.

What should you create? To answer, drag the appropriate objects to the correct actions. Each element may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Objects to create	Action	Object to create
existing model	Create a new deployable unit.	
new model	Object to add.	
deployable package	Create, manage, and group elements.	
package	Distribute the solution to customers.	
model file		
project		

Answer:

Explanation:

Objects to create	Action	Object to create
existing model	Create a new deployable unit.	package
new model	Object to add.	new model
deployable package	Create, manage, and group elements.	project
package	Distribute the solution to customers.	deployable package
model file		
project		

Explanation:

Action	Object to create
Create a new deployable unit.	package
Object to add.	new model
Create, manage, and group elements.	project
Distribute the solution to customers.	deployable package

Box 1: package

An AOT package is a deployment and compilation unit of one or more models that can be applied to an environment. It includes model metadata, binaries, reports and other associated resources. One or more AOT packages can be packaged into a deployable package, which is the vehicle used for deployment of code (and customizations) on demo, sandbox, and production environments.

Box 2: New model

Model - You configure your model to refer to two other models. This enables your model to reference metadata and code elements that are in other packages.

Box 3: project

Project - You create a project and then associate your project to your new model. You add elements to your project, which are also added to your model. Specifically, you add an extended data type (EDT). You also add a table that you populate with fields and a method.

Box 4: deployable package

### NEW QUESTION # 209

A company uses Dynamics 365 Finance.

You implement the SysOperation framework to create the following batch processes.

Batch process	Description and requirements
1	This process is lengthy. Users must be able to continue working while the process runs. The process must complete successfully.
2	This is a short process. The process is permitted to block the work of a user while the process runs.
3	This is a process that must run every night of each workday.

You need to configure the execution mode for each batch process.

Which execution modes should you use? To answer, drag the appropriate execution modes to the correct requirements. Each execution mode may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

**Execution modes**

reliable asynchronous
synchronous
asynchronous

**Requirement**

Lengthy operation
Short operation
Runs on a recurring schedule

**Execution mode**

**Answer:**

**Explanation:**

<b>Execution modes</b> <input type="checkbox"/> reliable asynchronous <input type="checkbox"/> synchronous <input type="checkbox"/> asynchronous	<b>Answer Area</b>    	<b>Requirement</b> Lengthy operation Short operation Runs on a recurring schedule	<b>Execution mode</b> <input type="checkbox"/> reliable asynchronous <input type="checkbox"/> synchronous <input type="checkbox"/> asynchronous
---	------------------------------------	--	--

Explanation

<b>Execution modes</b> <input type="checkbox"/> reliable asynchronous <input type="checkbox"/> synchronous <input type="checkbox"/> asynchronous	<b>Answer Area</b>    	<b>Requirement</b> Lengthy operation Short operation Runs on a recurring schedule	<b>Execution mode</b> <input type="checkbox"/> reliable asynchronous <input type="checkbox"/> synchronous <input type="checkbox"/> asynchronous
---	------------------------------------	--	--
