P.S. Free & New 2V0-15.25 dumps are available on Google Drive shared by ExamTorrent: <https://drive.google.com/open?id=1Z-ckuykbP0OrUkPMiwueQiBT4dvBH59>

These VMware Cloud Foundation 9.0 Support (2V0-15.25) practice test questions also boost your confidence. If you have prepared well, tried all the VMware VMware Cloud Foundation 9.0 Support Certification Exams, and understood each concept clearly, there is minimal or no chance of failure. Desktop Practice exam software and web-based VMware Cloud Foundation 9.0 Support (2V0-15.25) practice test are available at ExamTorrent.

Learn the importance of self-evident, and the stand or fall of learning outcome measure, in reality of hiring process, for the most part through your grades of high and low, as well as you acquire the qualification of how much remains. Therefore, the 2V0-15.25 practice materials can give users more advantages in the future job search, so that users can stand out in the fierce competition and become the best. Actually, just think of our 2V0-15.25 Test Prep as the best way to pass the exam is myopic. They can not only achieve this, but ingeniously help you remember more content at the same time.

**Free PDF 2026 2V0-15.25: VMware Cloud Foundation 9.0 Support –Reliable Exam Papers**

They work together and put all their expertise to ensure the top standard of Channel Partner Program VMware Cloud Foundation 9.0 Support 2V0-15.25 valid dumps. Now the VMware Cloud Foundation 9.0 Support 2V0-15.25 exam dumps have become the first choice of VMware 2V0-15.25 Exam candidates. With the top-notch and updated VMware 2V0-15.25 test questions you can pass your VMware Cloud Foundation 9.0 Support 2V0-15.25 exam successfully

## VMware 2V0-15.25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Install, Configure, Administrate the VMware by Broadcom Solution: This area covers installing, configuring, and managing VMware solutions including VCF Fleet deployment, expansion, and reduction operations.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>IT Architectures, Technologies, Standards: This domain covers fundamental frameworks, tools, and best practices for building scalable, secure, and interoperable enterprise IT systems.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>VMware by Broadcom Solution: This section focuses on understanding VMware by Broadcom's virtualization and cloud infrastructure platform for managing modern enterprise workloads.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Troubleshoot and Optimize the VMware by Broadcom Solution: This domain focuses on troubleshooting VCF deployment, upgrades, conversions, workload domains, fleet operations (certificates, passwords, identity), licensing, compute resources, storage (vSAN, supplemental storage), networking (VDS, NSX), VCF Operations tools, Identity Broker automation, and HCX workload migrations.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Plan and Design the VMware by Broadcom Solution: This domain addresses architectural planning and design principles for creating scalable, secure virtual environments aligned with business requirements.</li> </ul>

## VMware Cloud Foundation 9.0 Support Sample Questions (Q15-Q20):

### NEW QUESTION # 15

An administrator created a new VPC with an associated subnet, configured with a DHCP Server.

When attaching virtual machines to the VPC subnet, an IP address is assigned, but the DNS and NTP settings are not configured. How can the administrator update the DHCP server configuration to set DNS and NTP?

- A. Change the DHCP Server mode from DHCP Server to DHCP Relay.
- B. Enable DNS and NTP Passthrough on the DHCP Server.
- **C. Update the default VPC Service Profile to include the IP addresses for the DNS and NTP servers.**
- D. Switch the DHCP Network mode from Distributed Connectivity to Centralized Connectivity.

**Answer: C**

Explanation:

In VMware Cloud Foundation 9.0 Automation, each VPC is governed by a VPC Service Profile, which defines the default network services applied to the VPC's DHCP server-this includes DNS servers, NTP servers, DHCP lease values, and other network attributes. When a subnet is associated with a VPC and DHCP is enabled, the DHCP service inherits its DNS and NTP configuration from the VPC Service Profile.

In the scenario, virtual machines attached to the new VPC subnet receive an IP address, but not DNS or NTP settings. This indicates that the DHCP server is functioning correctly, but its service profile lacks DNS and NTP configuration. Updating the default VPC Service Profile allows the administrator to specify DNS resolver addresses and NTP time sources, which will then automatically be pushed to all DHCP-enabled subnets under that VPC.

Option B (changing to DHCP Relay) is incorrect because relay mode does not configure DNS/NTP-it delegates DHCP to an external DHCP server.

Option C (enable DNS/NTP passthrough) is not a feature of NSX DHCP.

Option D (changing connectivity mode) affects routing and service placement, not DHCP options.

### NEW QUESTION # 16

An administrator logs into the vSphere client to check the health of a cluster. An alert appears on the cluster stating, "vSphere HA host status".

The administrator toggles vSphere HA off and on and the following error appears on the host "A general system error occurred: Failed to start fdm service on host".

What is the cause of this issue?

- A. vSphere HA Admission Control settings are not configured correctly.
- B. The vmware-fdm service is disabled on the ESX host.
- **C. The vmware-fdm vib is missing from the ESX host.**
- D. vSphere HA startup policy is not configured correctly.

**Answer: C**

Explanation:

vSphere High Availability (HA) depends on the FDM agent (Fault Domain Manager) that runs on every ESXi host in the cluster. When an administrator enables HA on a cluster, vCenter automatically installs or updates the vmware-fdm VIB on each participating ESXi host. This VIB contains the HA agent binaries and is mandatory for HA services to start.

The error encountered:

"A general system error occurred: Failed to start fdm service on host"

is a classic and well-documented symptom of a missing or corrupted vmware-fdm VIB. When vSphere HA is toggled off and on, vCenter attempts to reinstall or restart the FDM agent; if the VIB is not present, HA cannot deploy successfully, and the FDM service fails to start.

Why the other answers are incorrect:

- \* A. The vmware-fdm service is disabled ESXi does not allow manual disabling of this system service in normal operations. If the service fails to start, the root cause is usually the absence or corruption of the VIB-not a disabled service.
- \* C. Admission Control settings not configured correctly Admission Control errors affect VM failover capacity, not the ability to start FDM services.
- \* D. HA startup policy not configured correctly There is no per-host HA startup policy that prevents FDM from starting.

#### NEW QUESTION # 17

An administrator has received reports of high CPU ready times on several Virtual Machines (VMs) running within a VMware Cloud Foundation (VCF) workload domain and has been tasked with collecting detailed metrics for all running Virtual Machines from each ESX host.

Which command line utility will enable the administrator to collect the required metrics?

- **A. esxtop**
- B. vintop
- C. vim-cmd
- D. esxcli

**Answer: A**

Explanation:

To collect detailed per-VM CPU metrics-especially CPU Ready (%RDY)-the correct command-line utility on an ESXi host is esxtop. This tool provides real-time, low-level performance data for CPU, memory, disk, and network usage, and is the authoritative method for diagnosing CPU contention issues in VMware environments.

When troubleshooting high CPU Ready times, esxtop allows administrators to:

- \* View CPU contention at the VM level
- \* Inspect co-stop, wait, and scheduling delays
- \* Monitor NUMA distribution and pCPU saturation
- \* Capture historical performance snapshots using batch mode

The other options do not provide the necessary VM-level CPU scheduling metrics:

- \* A. vintop: Only available on vCenter Server Appliance (VCSA), not ESXi; does not show VM CPU ready.
- \* B. esxcli: Used for configuration and health checks; not for real-time CPU metrics.
- \* C. vim-cmd: Used to manage VMs via vSphere API bindings; not a performance monitoring tool.

#### NEW QUESTION # 18

An administrator is attempting to import a certificate chain in VMware Cloud Foundation (VCF) Operations by uploading a certificate file. The validation fails with an error stating, "The provided certificate content is invalid." What is a possible cause for this error?

- A. The certificate chain is missing the root CA.
- B. The certificate chain does not include the private key.
- **C. The certificate is not PEM-encoded.**
- D. The certificate chain order is invalid.

**Answer: C**

Explanation:

VCF Operations enforces strict certificate format validation when importing certificate chains. According to VMware Cloud Foundation 9.x certificate management requirements, all uploaded certificates must be PEM- encoded. A PEM certificate must contain:

- \* ASCII-encoded content
- \* Proper headers such as:
- \* -----BEGIN CERTIFICATE-----
- \* -----END CERTIFICATE-----

If the certificate is encoded in DER, PFX, PKCS#12, or any non-PEM format, VCF Operations will reject the upload with the error:

"The provided certificate content is invalid."

This matches the behavior described in the question.

Option B (chain order invalid) and Option C (missing root CA) can cause validation issues only after the certificate file is successfully parsed. The error described indicates the file itself cannot be parsed, which directly points to encoding.

Option D (missing private key) is incorrect because certificate chain uploads must NOT include a private key- private keys are only used during CSR signing and are handled separately by the system.

#### NEW QUESTION # 19

An administrator creates a tag for a virtual machine (VM) in VMware Cloud Foundation (VCF) Operations.

When assigning the tag to the virtual machine in vCenter, the tag was not found.

What is the cause of this error?

- A. The tag was not pushed to Custom Groups.
- **B. The tag was not pushed to the vCenter instance.**
- C. VM Tools is not installed.
- D. The vCenter version is incorrect.

**Answer: B**

Explanation:

In VMware Cloud Foundation 9.0 Operations, tags created inside VCF Operations do not automatically appear in vCenter. Tags must be explicitly synchronized ("pushed") to the selected vCenter instance before they become usable for VM tagging within vCenter. This is because VCF Operations maintains its own metadata store for tags, super metrics, groups, and policies.

The correct workflow is:

- \* Create the tag in VCF Operations.
- \* Push (synchronize) the tag to the appropriate vCenter instance.
- \* The tag then appears in vCenter's Tags & Custom Attributes section.
- \* Administrators can then assign the tag to VMs.

If the push step is skipped, the tag exists only inside VCF Operations and cannot be referenced by vCenter, which is exactly the symptom described: tag not found when attempting to assign it to a VM.

Option A is incorrect because Custom Groups do not affect vCenter tag visibility.

Option B is incorrect because tag synchronization is not tied to a specific vCenter version as long as the vCenter is officially supported by VCF 9.x.

Option D is irrelevant-VMware Tools has nothing to do with tag visibility.

#### NEW QUESTION # 20

.....

In a word, you can try our free 2V0-15.25 study guide demo before purchasing, VMware Cloud Foundation 9.0 Support Pdf After the researches of many years, we found only the true subject of past-year exam was authoritative and had time-validity, For your benefit, ExamTorrent is putting forth you to attempt the free demo and VMware 2V0-15.25 Exam Dumps the best quality highlights of the item, because nobody gives this facility only the ExamTorrent 2V0-15.25 Free Learning provide this facility. The example on

the right was a simple widget designed Reliable 2V0-15.25 Pdf to track points in a rewards program, The pearsonvue website is not affiliated with us, Although computers are great at gathering, manipulating, and calculating raw data, humans prefer their data presented in an orderly fashion.
