Most notably, the simulation test is available in our software version. With the simulation test, all of our customers will have an access to get accustomed to the PL-300 Exam atmosphere and pass easily in the real PL-300 exam.

## Microsoft Power BI Data Analyst Sample Questions (Q185-Q190):

### NEW QUESTION # 185

You have a power BI tenant that hosts the datasets shown in the following table.

You have the following requirements:

- \* The export of reports that contain Personally Identifiable Information (PII) must be prevented.
- \* Data used for financial decisions must be reviewed and approved before use.

For each of the following statements, select Yes if the statement is true. Otherwise select No. NOTE: Each correct selection is worth one point

**Answer:**

Explanation:

□

### NEW QUESTION # 186

You are using existing reports to build a dashboard that will be viewed frequently in portrait mode on mobile phones.

You need to build the dashboard.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

□

**Answer:**

Explanation:

□

Explanation:

1. Pin items from report to Dashboard.

2. Open Dashboard.

3. Change the dashboard view to Phone view.

4. Rearrange, resize the visuals.

### NEW QUESTION # 187

You have a Power BI semantic model that contains the following tables.

□

All the tables use the same data source.

You need to reduce the number of limited relationships in the model by changing the storage mode of certain tables. The solution must NOT affect the latency of the data.

Which storage mode should you select for the Customer and Geography tables? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

□

**Answer:**

Explanation:

□

Explanation:

□

### NEW QUESTION # 188

You have a semantic model named Model1 that contains the following tables

□

There is an active relationship between SaleDate and Date.

There is an inactive relationship between ShippingDate and Date-

You need to create a new measure that will display the total amount of sales and support slicing by ShippingDate.

□

**Answer:**

Explanation:

□

Explanation:

□

### NEW QUESTION # 189

You receive revenue data that must be included in Microsoft Power BI reports.

You perform an initial load of the data from a Microsoft Excel source as shown in the following exhibit.

□

You plan to create several visuals from the data, including a visual that shows revenue split by year and product.

You need to transform the data to ensure that you can build the visuals. The solution must ensure that the columns are named appropriately for the data that they contain.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

□

**Answer:**

Explanation:

Explanation:

Text Description automatically generated with medium confidence

Step 1: Select Use Header as First Row.

Step 2: Select Department and Product and Unpivot Other Columns

Unpivot Other Columns: This command unpivots unselected columns. Use this command in a query when not all columns are known. New columns added during a refresh operation are also unpivoted.

Step 3: Rename the Attribute column to Year and the Value column to Revenue.

You might want to unpivot data, sometimes called flattening the data, to put it in a matrix format so that all similar values are in one column. This is necessary, for example, to create a chart or a report.

Chart Description automatically generated with medium confidence

When you unpivot, you unpack the attribute-value pairs that represent an intersection point of the new columns and re-orient them into flattened columns:

Values (in blue on the left) are unpivoted into a new column (in blue on the right).

Attributes (in green on the left) are unpivoted into a new column (in green on the right) and duplicates are correspondingly mapped to the new Values column.
