New COF-C02 Test Prep, Actual COF-C02 Test Pdf

It is impossible to overstate the significance of valid COF-C02 exam questions. The latest and actual COF-C02 exam questions are essential to clear the COF-C02 exam in one go. Applicants are better prepared to succeed when they prepare with the updated Snowflake COF-C02 Questions. These COF-C02 exam questions give applicants the knowledge they need to quickly ace the COF-C02 examination.

Snowflake SnowPro Core Certification Exam Sample Questions (Q774-Q779):

NEW QUESTION # 774
Which Snowflake view is used to support compliance auditing?

- A. ACCESS_HISTORY
- B. QUERY_HISTORY
- C. COPY_HISTORY
- D. ROW ACCESS POLICIES

Answer: A

Explanation:
The ACCESS_HISTORY view in Snowflake is utilized to support compliance auditing. It provides detailed information on data access within Snowflake, including reads and writes by user queries. This view is essential for regulatory compliance auditing as it offers insights into the usage of tables and columns, and maintains a direct link between the user, the query, and the accessed data1.

NEW QUESTION # 775
When referring to User-Defined Function (UDF) names in Snowflake, what does the term overloading mean?

- A. There are multiple SQL UDFs with different names but the same number of arguments or argument types.
- B. There are multiple SOL UDFs with the same names and the same number of arguments.
- C. There are multiple SQL UDFs with the same names but with a different number of arguments or argument types.
- D. There are multiple SQL UDFs with the same names and the same number of argument types.

Answer: C

Explanation:
In Snowflake, overloading refers to the creation of multiple User-Defined Functions (UDFs) with the same name but differing in the number or types of their arguments. This feature allows for more flexible function usage, as Snowflake can differentiate between functions based on the context of their invocation, such as the types or the number of arguments passed. Overloading helps to create more adaptable and readable code, as the same function name can be used for similar operations on different types of data.

NEW QUESTION # 776
A user needs to create a materialized view in the schema MYDB.MYSCHEMA. Which statements will provide this access?

- A. GRANT ROLE MYROLE TO USER USER1;
  GRANT CREATE MATERIALIZED VIEW ON SCHEMA MYDB.MYSCHEMA TO ROLE MYROLE;
- B. GRANT ROLE MYROLE TO USER USER1;
  GRANT CREATE MATERIALIZED VIEW ON SCHEMA MYDB.MYSCHEMA TO MYROLE;
- C. GRANT ROLE MYROLE TO USER USER1;
  GRANT CREATE MATERIALIZED VIEW ON SCHEMA MYDB. K"-'SCHEMA TO USER! ;
- D. GRANT ROLE MYROLE TO USER USER1;
  GRANT CREATE MATERIALIZED VIEW ON SCHEMA MYDB.MYSCHEMA TO USER USER1;

Answer: A

Explanation:
To provide a user with the necessary access to create a materialized view in a schema, the user must be granted a role that has the CREATE MATERIALIZED VIEW privilege on that schema. First, the role is granted to the user, and then the privilege is granted to the role

NEW QUESTION # 777
By definition, a secure view is exposed only to users with what privilege?

- A. REFERENCES
- B. OWNERSHIP
- C. IMPORT SHARE
- D. USAGE

Answer: B

Explanation:
A secure view in Snowflake is exposed only to users with the OWNERSHIP privilege. This privilege ensures that only authorized users who own the view, or roles that include ownership, can access the secure view

NEW QUESTION # 778
A stream can be created on which Snowflake objects to record data manipulation language(DML) changes? (Select TWO).

- A. Standard views
- B. Standard tables
- C. Standard tables
- D. Database
- E. Pipes
- F. Schemas

Answer: B,C

Explanation:
Snowflake streams are objects that enable users to track changes (inserts, updates, and deletes) to the data in tables, facilitating real-time data processing and integration workflows. Streams can be created on standard tables, capturing DML changes made to these tables so that downstream processes can consume the changes incrementally. This feature supports efficient data ETL, replication, and real-time analytics by providing a mechanism to process only the data that has changed. Note: The correct options should likely include a distinction between "Standard tables" and another object type such as "External tables" rather than repeating "Standard tables" twice.
Reference: Snowflake Documentation on Streams

NEW QUESTION # 779
.....

We are so proud that we own the high pass rate of our COF-C02 exam braindumps to 99%. This data depend on the real number of our worthy customers who bought our COF-C02 exam guide and took part in the real exam. Obviously, their performance is wonderful with the help of our outstanding COF-C02 Exam Materials. We have the definite superiority over the other COF-C02 exam dumps in the market. If you choose to study with our COF-C02 exam guide, your success is 100 guaranteed.
