

Marvelous C_S43_2601 Latest Exam Simulator & Passing C_S43_2601 Exam is No More a Challenging Task

We provide 3 versions of our C_S43_2601 exam questions for the client to choose and free update. Different version boosts different advantage and please read the introduction of each version carefully before your purchase. And the language of our C_S43_2601 study materials are easy to be understood and we compile the C_S43_2601 Exam Torrent according to the latest development situation in the theory and the practice. You only need little time to prepare for our C_S43_2601 exam. So it is worthy for you to buy our C_S43_2601 questions torrent.

The SAP C_S43_2601 PDF questions file of SureTorrent has real SAP C_S43_2601 exam questions with accurate answers. You can download SAP PDF Questions file and revise SAP Certified Implementation Consultant - SAP S/4HANA Cloud Private Edition, Asset Management (C_S43_2601) C_S43_2601 exam questions from any place at any time. We also offer desktop C_S43_2601 practice exam software which works after installation on Windows computers. The C_S43_2601 web-based practice test on the other hand needs no software installation or additional plugins. Chrome, Opera, Microsoft Edge, Internet Explorer, Firefox, and Safari support the web-based C_S43_2601 Practice Exam. You can access the SAP C_S43_2601 web-based practice test via Mac, Linux, iOS, Android, and Windows. SureTorrent SAP Certified Implementation Consultant - SAP S/4HANA Cloud Private Edition, Asset Management (C_S43_2601) C_S43_2601 practice test (desktop & web-based) allows you to design your mock test sessions. These SAP C_S43_2601 exam practice tests identify your mistakes and generate your result report on the spot.

Latest C_S43_2601 Exam Bootcamp - C_S43_2601 Valid Exam Vce Free

We have special online worker to solve all your problems. Once you have questions about our C_S43_2601 latest exam guide, you can directly contact with them through email. We are 7*24*365 online service. We are welcome you to contact us any time via email or online service. We have issued numerous products, so you might feel confused about which C_S43_2601 Study Dumps suit you best. You will get satisfied answers after consultation.

SAP Certified Implementation Consultant - SAP S/4HANA Cloud Private Edition, Asset Management (C_S43_2601) Sample Questions (Q10-Q15):

NEW QUESTION # 10

Create a Maintenance Plan

The project team evaluates during the implementation project Maintenance Plans in SAP S/4HANA Asset Management. The following features need to be checked:

Create a Maintenance Plan

Create a Maintenance Plan and save it. Use the following information:

Field	Value
Maint. Plan cat. (via SAP GUI) Maintenance Plan for (via FLP)	Maintenance Order
Maintenance Strategy	Z##
Description	Regular pump maintenance - Z##
Equipment	T-PA##
Order Type	PM02
Task List Type	A
Group	TL-##
Counter	1

Answer:

Explanation:

See the Explanation for complete Solution of this Task.

Explanation:

Task 8: Create a Maintenance Plan

The objective of this task is to create a strategy-based maintenance plan that will automatically generate work orders for your pump based on the frequencies defined in your task list.

Step 1: Access the Transaction

* Transaction Code : Enter IP42 in the command field and press Enter .

* Initial Screen :

* Maintenance Plan Category : Select Maintenance Order (or "Maintenance plan for Maintenance Order" if using the Fiori Launchpad).

* Maintenance Strategy : Enter Z48 .

* Press Enter .

Step 2: Enter Header and Maintenance Item Data

Once you are on the main creation screen, fill in the "Maintenance Item" section to define what is being maintained and how the orders should look:

* Description : Enter Regular pump maintenance Z48 .

* Equipment : Enter T-PA48 .

* Planning Plant : This should default to 1010 based on the equipment, but ensure it is correct.

* Order Type : Enter PM02 .

Explanation : By assigning Equipment T-PA48 and Order Type PM02 , you are telling SAP to generate a specific "Planned" maintenance order every time this schedule is triggered.

Step 3: Link the Task List

This step connects the plan to the specific maintenance steps (operations) you created in Task 7.

* Look for the Task List section at the bottom of the screen.

* Task List Type : Enter A (General Task List).

* Group : Enter TL-48 .

* Counter : Enter 1 .

* Press Enter to validate the connection. You should see the description "Regular Maintenance GR48" appear.

Explanation : Linking the Task List ensures that when the maintenance plan generates an order, it automatically copies the 30-minute operations you defined earlier into that order.

Step 4: Set Scheduling Parameters (Optional but Recommended)

While the table in your document focuses on the data above, typically you would click the Maintenance Plan Scheduling Parameters tab to ensure the "Scheduling Period" and "Start Date" are set. However, for the assessment, the mandatory data is what we entered in Steps 1-3.

Step 5: Save

* Click the Save (floppy disk) icon.

* Note your Maintenance Plan Number : The system will display a message at the bottom, such as

"Maintenance plan 123 saved." Write this number down , as you will need it for Task 9: Schedule a Maintenance Plan .

Task 8 is now complete! You have built the automated "brain" that will handle the recurring maintenance for your pump.

NEW QUESTION # 11

Task 4: Configure and create Technical Objects

The project team evaluates during the implementation project Technical Object structures in SAP S/4HANA Asset Management.

The following features need to be checked:

- * Configure and create Functional Locations
- * Create, serialize and install Equipment
- * Create Functional Location master record ZZ0##-01 and save it. Use the following information:

Field	Value
Functional Location	ZZ0##-01
Structure Indicator	ZZ##
Functional Location Category	T
Description	Production Line Z##
Maintenance Plant	1020
Cost Center	4110
Planning Plant	1020
Planner Group	Z##
Main WorkCtr	T-ME##
Work Center Plant	1010

* Create Equipment master record EQUI-## and save it. Use the following information:

Field	Value
Equipment	EQUI-##
Description	Drive Motor GR##
Equipment Category	T

* Serialize the just created Equipment master record EQUI-## . Use the following data:

Field	Value
Material	T-PM8000
Serial Number	EQUI-##

* Install Equipment EQUI-## at the Functional Location 00-01-ASS-02 .

Answer:

Explanation:

See the Explanation for complete Solution of this Task.

Explanation:

Task 4: Configure and create Technical Objects

This task evaluates your ability to structure and manage the physical and functional hierarchy of assets in SAP S/4HANA Asset Management.

Step 1: Create Functional Location Master Record

A Functional Location represents the area at which a maintenance task is to be performed.

* Access the Transaction : Use transaction code IL01 (Create Functional Location).

- * Enter Initial Data :
- * Functional Location : ZZ048-01.
- * Structure Indicator : ZZ48.
- * Functional Location Category : T.
- * Press Enter .

Table View Edit Goto Sejection Utilities System Help

Data was saved

- * Enter General Data :
- * Description : Production Line Z48.
- * Enter Location and Organization Data :
- * Maintenance Plant : 1020.
- * Cost Center : 4110.
- * Planning Plant : 1020.
- * Planner Group : Z48.
- * Main WorkCtr : T-ME48.

* Work Center Plant : 1010.

* Save : Click the Save icon.

Explanation : By creating this record, you define a specific functional area within Plant 1020 where maintenance costs and history will be tracked for all equipment installed there.

suretorrent.com

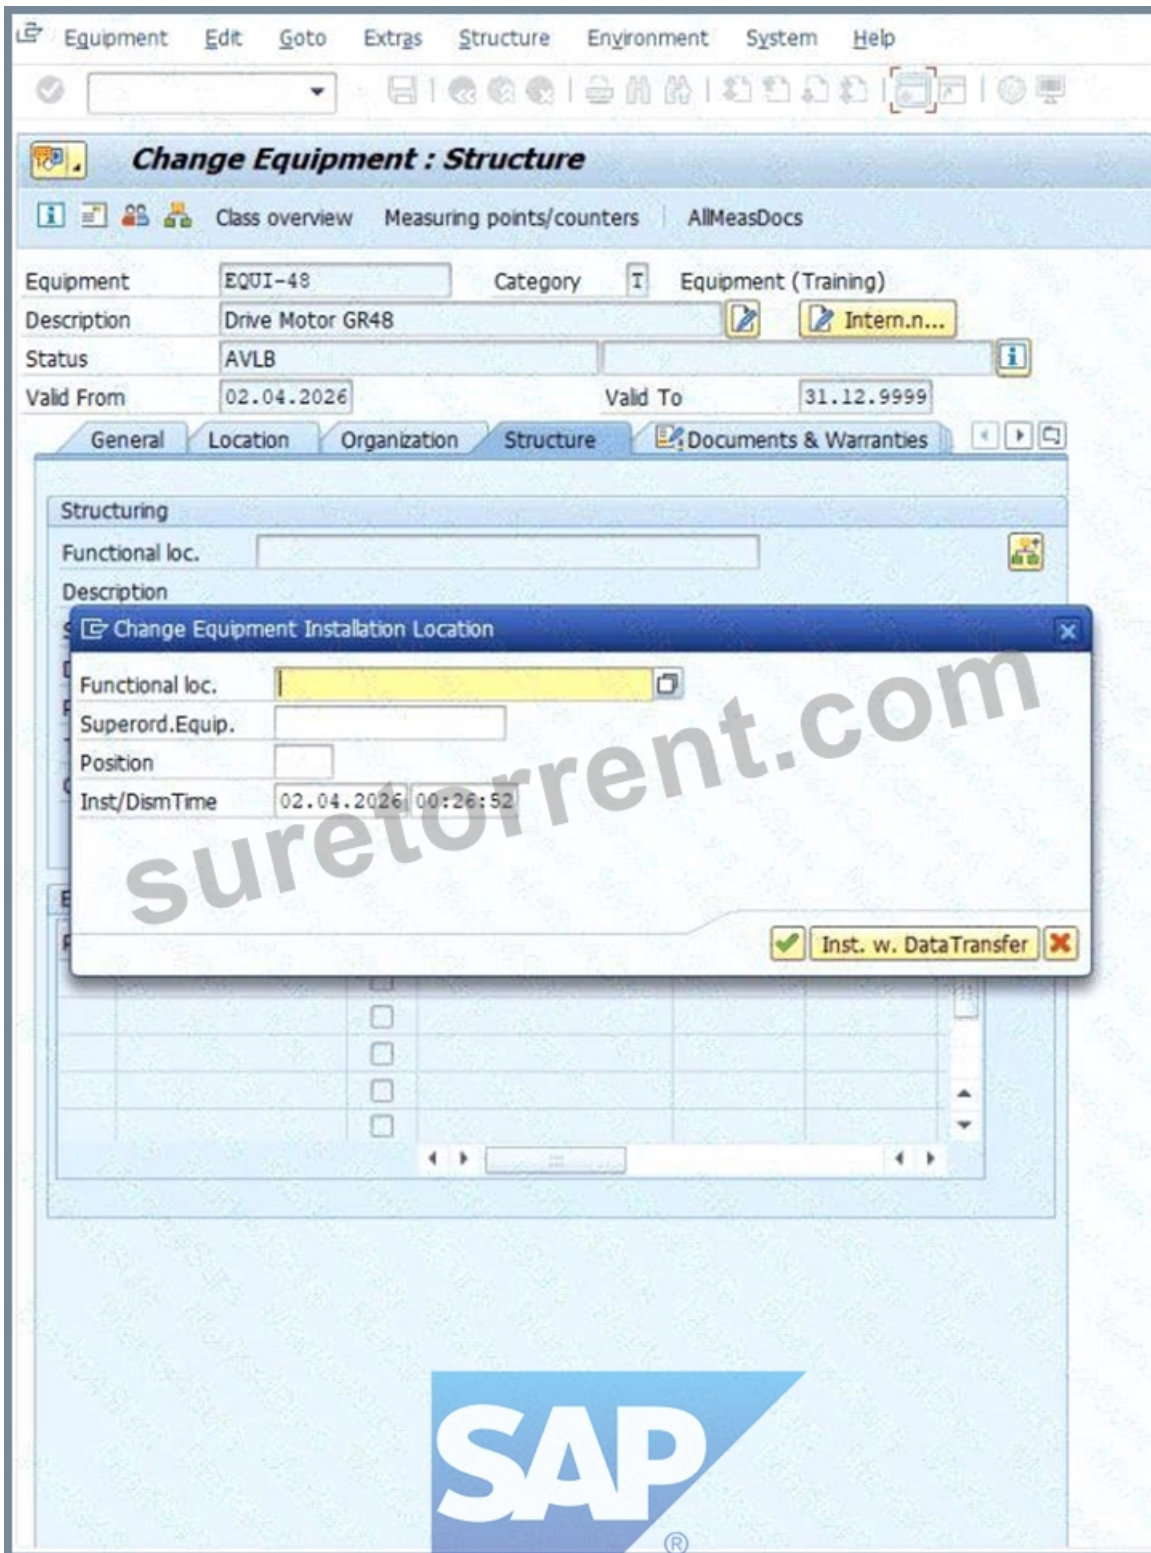

✓ Equipment created with the number EQUI48

- * Enter General Data :
- * Description : Drive Motor GR48.
- * Save : Click the Save icon.

Explanation : This step creates a master record for a physical asset-a drive motor-allowing you to track its individual lifecycle,

independent of where it is currently installed.

Step 3: Serialize the Equipment

Serialization links a piece of equipment to a specific material and unique serial number for inventory management and tracking.

- * Access the Transaction : Use transaction code IE02 (Change Equipment) and enter EQUI-48.
- * Navigate to Serial Data : Go to the SerData (Serial Data) tab.
- * Enter Serialization Data :
- * Material : T-PM8000.
- * Serial Number : EQUI-48.
- * Save : Click the Save icon.

Explanation : Linking the motor to Material T-PM8000 enables the system to track this specific asset as a serialized part, which is essential for warehouse movements and warranty tracking.

Functional location Edit Goto Extras Structure Environment System Help

Display Functional Location: Master Data

Classification Measuring points/counters Data origin... AllMeasDocs

Functional loc. 00-01-ASS-02 Cat. T Technical system (Tra...)

Description Assembly - Section 2

Address

Name	Machine Manufacturing		
Street	Alsterdorfer Strasse 13		
Location	22299	Hamburg	DE RH
Telephone	040-987654	Fax	040-987655

Step 4: Install Equipment at a Functional Location

This establishes the relationship between the physical asset (Equipment) and the functional area where it is operating.

- * Access the Transaction : Use transaction code IE02 (Change Equipment) for EQUI-48.
- * Modify Installation Location :
- * Click on the Structure tab.
- * Find the FunctLoc field.
- * Enter the location: 00-01-ASS-02.
- * Save : Click the Save icon.

Explanation : This installation "plugs" your drive motor into the functional hierarchy at location 00-01-ASS-02. From this point forward, any maintenance performed on this motor will be automatically associated with that location's history.

Use Phase-Based Maintenance Processing

The project team evaluates during the implementation project Phase-Based Maintenance Processing in SAP S/4HANA Asset Management. The following features need to be checked:

- * Initiate and screen a Maintenance Notification
- * Plan Maintenance Order and send it for approval
- * Create a Maintenance Notification using an already available notification type which is suitable for phase-based maintenance and save it.

Use the following data:

Field	Value
Technical Object	T-PB##
Current Location	Production Line 1
Detection Method	Continuous Condition Monitoring
Operational Effect	Production restricted
Description	Defective pump (phase-based)

- * Screen and accept the just created Maintenance Notification.
- * Create an Order (Phase-based) for your accepted notification and submit it for approval.

Use the following data:

Field	Value
Technical Object	T-PB##
Operation 0010 - Description	Repair damage
Operation 0010 - Work	2 h

Answer:

Explanation:

See the Explanation for complete Solution of this Task.

Explanation:

Task 10 Overview

This task evaluates your ability to manage the newer, phase-led maintenance workflow in SAP S/4HANA.

Unlike the traditional "emergency" repair you did earlier, this process includes formal screening and approval steps Step 1: Create a Phase-Based Maintenance Notification In this step, you initiate the request.

- * Access the Transaction : Use transaction IW21 or the Fiori app Create Maintenance Request .
- * Select Notification Type : Use a type configured for phase-based maintenance (typically Y1 - Maintenance Request).
- * Enter the Following Data :
- * Technical Object : T-PB48
- * Description : Defective pump (phase-based)
- * Current Location : Production Line 1
- * Detection Method : Continuous Condition Monitoring
- * Operational Effect : Production restricted
- * Save : Note the notification number generated.

Explanation : This step "initiates" the maintenance process. In phase-based maintenance, the notification starts in the Initiation phase, where it must be reviewed before any work is planned.

Step 2: Screen and Accept the Notification

As a "Maintenance Coordinator," you must now review the request.

- * Access the Fiori App : Open Screen Maintenance Requests .
- * Locate Your Notification : Find the notification you just created for T-PB48.
- * Perform Screening :
- * Review the details to ensure they are complete.
- * Click Accept to move it to the next phase.

Explanation : "Screening" is a quality gate. It ensures that the maintenance team only spends time planning valid, well-described issues. Once accepted, the notification moves from the Initiation phase to the Screening phase and finally becomes available for

planning

Step 3: Create and Plan the Phase-Based Order

Now you will create the formal work order for the accepted request.

* Create Order : From within the accepted notification, or using the Manage Maintenance Backlog app, choose to Create Order .

* Enter Planning Data :

* Technical Object : T-PB48

* Operation 0010 Description : Repair damage

* Operation 0010 Work : 2 h

* Submit for Approval : Look for the Submit for Approval button at the top of the order screen.

Explanation : This step moves the order into the Planning phase. By submitting it for approval, you are requesting the budget and resources to perform the work. The order status will change to indicate it is

"Waiting for Approval"

NEW QUESTION # 13

Check Inspection Lot and record Inspection Results

The project team evaluates during the implementation project the checking of Inspection Lots Checklist processing including result recording. The following features need to be checked:

* Display the automatically created Inspection Lot

* Record Inspection Results

* Display the automatically created Inspection Lot for the previously created Maintenance Order including Checklist. The Inspection Lot comprises the following data:

Field	Value
Material	T-PM1100
Plant	1010
Inspection Lot Origin	89 Miscellaneous
Group	CL-DE-00
Group Counter	1

* Record Inspection Results for the previously created Inspection Lot so that the Usage Decision is automatically set to Can be used

Answer:

Explanation:

See the Explanation for complete Solution of this Task.

Explanation:

Task 13 Overview

This task focuses on the quality management (QM) integration with maintenance. You will verify the inspection lot that was automatically triggered by your maintenance order and then record the results to confirm the technical object is fit for use.

Step 1: Display the Automatically Created Inspection Lot

Before recording results, you must verify that the system generated the correct inspection lot for your maintenance order.

* Access the Transaction : Enter QA03 (Display Inspection Lot) in the command field and press Enter .

* Locate the Lot : Search for the inspection lot associated with the maintenance order you created in Task 12.

* Verify the Following Data :

* Material : T-PM1100

* Plant : 1010

* Inspection Lot Origin : 89 (Miscellaneous)

* Group : CL-DE-00

* Group Counter : 1

Explanation : The inspection lot is the central record for quality testing. Seeing these specific values (Group CL-DE-00) confirms that the classification you set up in Task 11 correctly triggered the intended inspection plan.

Step 2: Record Inspection Results

This is the process of entering the actual findings from the checklist inspection.

* Access the Transaction : You can navigate directly from the Inspection Lot in QA03 or use transaction QE51N (Results

Recording Selection).

- * Select the Lot : Enter your inspection lot number and click Execute .
- * Record Results :
- * Enter the inspection values for each characteristic listed in the checklist.
- * Ensure the values you enter are within the "Acceptable" range or marked as "Pass".
- * Automatic Usage Decision : Record the results such that the Usage Decision (UD) is automatically set to "Can be used" .
- * Save : Click the Save (floppy disk) icon.

Explanation : By recording positive results, you satisfy the quality requirements for the maintenance task.

The automatic transition to "Can be used" status tells the system the pump has passed inspection and the maintenance order can proceed toward completion.

NEW QUESTION # 14

Create a Task List

The project team evaluates during the implementation project Task Lists in SAP S/4HANA Asset Management. The following features need to be checked:

- * Create a Task List header
- * Create Task List operations
- * Create a Task List with 3 Task List operations. Maintenance Strategy Z## comprises Maintenance Packages with different hierarchy levels.

Use the following information at header level of the Task List:

Field	Value
Group	TL-##
Group Counter	1
Planning Plant	1010
Description	Regular Maintenance GR##
Work Center	MK-00
Work Center Plant	1010
Usage	4
Planner Group	P##
Maintenance Strategy	Z##

Use the following information for each Task List operation:

Field	Value
Work Ctr	MK-00
Plnt	1010
Control Key	PM01
Work	30
Unit	MIN

* Assign Maintenance Packages to the Task List Operations as follows:

- * Operation 10 is to be performed monthly.
- * Operation 20 is to be performed every 4 months.
- * Operation 30 is to be performed every 12 months.

Answer:

Explanation:

See the Explanation for complete Solution of this Task.

Explanation:

Since we encountered that error with the Z48 strategy , we must ensure that is fixed before we can finish the Task List. Here is the complete, verified, step-by-step process to finalize Task 7 , including the "hidden" pre- requisite.

Task 7: Create a General Task List

Objective : To create a standardized template of maintenance steps that can be automatically pulled into future work orders based on a schedule.

Step 1: The Pre-requisite (Fixing Strategy Z48)

If you haven't done this yet, SAP will not let you save the Task List.

* Transaction : IP11 (Maintain Maintenance Strategies).

* Action : Click New Entries .

* Strategy : Z48

* Description : Strategy for Group 48

* Strategy Unit : MON (Months).

* Packages : On the left, double-click Packages , then click New Entries :

* Line 1 : Cycle 1 / Unit MON / Text Monthly

* Line 2 : Cycle 4 / Unit MON / Text Every 4 Months

* Line 3 : Cycle 12 / Unit MON / Text Yearly

* Save (Floppy Disk icon).

Explanation : A strategy is the "calendar" that defines how often work happens. Without this, the system doesn't know what "Monthly" or "Yearly" means.

Step 2: Create Task List Header

* Transaction : IA05 .

* Initial Screen : Group TL-48, Group Counter 1. Press Enter .

* Header Fields :

* Description : Regular Maintenance GR48

* Planning Plant : 1010

* Work Center : MK-00 / Plant : 1010

* Usage : 4 (Plant Maintenance)

* Status : 4 (Released)

* Planner Group : P48

* Maint. Strategy : Z48

Explanation : The header defines who is responsible for the work (Planner Group P48) and which scheduling rules (Strategy Z48) apply to the whole list.

Step 3: Create Operations

* Click the Operations button (F6) at the top.

* Enter three rows with this data:

* Op 10 : Work Center MK-00, Plant 1010, Control Key PM01, Work 30, Unit MIN.

* Op 20 : (Same as above).

* Op 30 : (Same as above).

Explanation : Operations are the actual steps the technician follows. Here, we are saying each step takes 30 minutes of mechanical labor.

Step 4: Assign Maintenance Packages (The "Frequencies")

This is the most important part of Task 7. We tell SAP which operation happens when.

* Select Row 10 (click the box at the far left of the row).

* Go to Menu: Goto > Maintenance Packages .

* Check the box for the 1 Month package. Click the Back (Green Arrow) icon.

* Select Row 20 .

* Go to Goto > Maintenance Packages and check the 4 Month package. Click Back .

* Select Row 30 .

* Go to Goto > Maintenance Packages and check the 12 Month package. Click Back .

Explanation : Now, SAP knows that Op 10 happens every month, but Op 30 only happens once a year.

Step 5: Save

* Click the Save icon.

* The message at the bottom should say: "Task list TL-48 saved with group counter 1" .

NEW QUESTION # 15

.....

Our C_S43_2601 exam torrent boosts 3 versions and they include PDF version, PC version, and APP online version. The 3 versions boost their each strength and using method. For example, the PC version of C_S43_2601 exam torrent boosts installation software application, simulates the Real C_S43_2601 Exam, supports MS operating system and boosts 2 modes for practice and you can practice offline at any time. You can learn the APP online version of C_S43_2601 guide torrent in the computers, cellphones and laptops and you can choose the most convenient method to learn.
