Top C_S4EWM_2023 Frequent Updates | Useful Study C_S4EWM_2023 Plan and Unparalleled SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management Exam Preview

P.S. Free & New C_S4EWM_2023 dumps are available on Google Drive shared by Pass4training: https://drive.google.com/open?id=102kPhJ3Xb0fFx_rdU5r8_bS2Y0xGUJHm

If you don't prepare with real SAP C_S4EWM_2023 questions, you fail, lose time and money. Pass4training product is specially designed to help you pass the exam on the first try. The study material is easy to use. You can choose from 3 different formats available according to your needs. The 3 formats are SAP C_S4EWM_2023 desktop practice test software, browser based practice exam, and PDF.

SAP C_S4EWM_2023 Exam Syllabus Topics:

Topic	Details
Topic 1	• Warehouse Management (Monitor - Cockpit): This topic involves monitoring warehouse activities using the Warehouse Management Monitor, Warehouse Cockpit, and analytical apps.
Topic 2	• Shipping and Receiving: It focuses on configuring Yard Management, SAP Dock Appointment Scheduling, and using the Shipping Cockpit.
Topic 3	• Internal processing (Physical Inventory, Replenishment): This topic involves defining physical inventory processes and setting up and executing replenishment.

Topic 4	• Warehouse Processing, Warehouse Task and Order Creation, Strategies: This topic includes defining warehouse process types and setting up determination, as well as defining putaway and picking strategies.
Topic 5	• System Integration, Master Data and Delivery Document Customizing: This focuses on setting up system integration, distributing master data, and customizing delivery documents.
Topic 6	• Process and Layout Oriented Storage Control: It covers creating customizing settings and using Process and Layout-Oriented Storage Control.
Topic 7	• Cross Topics (Labor Management, Exception Handling, Batches, Serial Numbers): This topic includes setting up labor management and exception handling, and working with additional product information.

Overcome Fear of Exam with SAP C_S4EWM_2023 Exam Dumps

With these real C_S4EWM_2023 Questions, you can prepare for the test while sitting on a couch in your lounge. Whether you are at home or traveling anywhere, you can do C_S4EWM_2023 exam preparation with our SAP C_S4EWM_2023 dumps. C_S4EWM_2023 test candidates with different learning needs can use our three formats to meet their needs and prepare for the SAP C_S4EWM_2023 test successfully in one go. Read on to check out the features of these three formats.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management Sample Questions (Q15-Q20):

NEW QUESTION # 15
How do you control the physical inventory procedures which can be done in a specific part of the warehouse?

- A. You define a queue and assign this to the physical inventory area
- B. You define an activity area and assign this to the physical inventory area
- C. You assign bins directly to the physical inventory area
- D. You define a storage section and assign this to the physical inventory area

Answer: B

Explanation:
Comprehensive and Detailed In-Depth Explanation:
In SAP EWM, physical inventory (PI) procedures can be restricted to specific warehouse areas. Option C ("You define an activity area and assign this to the physical inventory area") is correct because the activity area, which groups storage bins for specific activities (e.g., counting), is linked to a PI area in SPRO: SCM Extended Warehouse Management > Physical Inventory > Define Physical Inventory Area. This controls where PI procedures apply. Option A (queue) relates to resource management, option B (direct bin assignment) bypasses the PI area concept, and option D (storage section) is a lower-level structure not directly tied to PI control.

NEW QUESTION # 16
Which standard functions can be executed in the background when you enter an exception code in a radio frequency (RF) transaction? Note: There are 3 correct answers to this question.

- A. Generate workflow process
- B. Create bin replenishment
- C. Cancel physical inventory document
- D. Confirm warehouse order
- E. Block a bin

Answer: A,B,E

Explanation:

When entering an exception code in a Radio Frequency (RF) transaction in SAP EWM, standard functions are triggered in the background to address specific scenarios or issues. These actions include:
* Generate Workflow Process (A):
* Exception handling can trigger a workflow process to notify or involve specific personnel for resolving the exception.
* Workflows are useful for routing tasks or approvals automatically.
* Create Bin Replenishment (B):
* If the exception indicates a stock shortage, the system can automatically generate a bin replenishment request.
* This ensures that the stock is replenished from reserve storage to the picking location.
* Block a Bin (C):
* In cases where a bin is damaged or contains incorrect stock, the system can block the bin automatically to prevent further operations.
* This prevents the use of the bin until the issue is resolved.
Incorrect Options:
* D: Confirming a warehouse order is not typically linked to exception codes.
* E: Canceling a physical inventory document is a separate process and is not triggered by exception codes in RF transactions.

NEW QUESTION # 17
When creating new document types, what must you keep in mind about system profiles?

- A. That the profiles have to be assigned to your new document type
- B. That you have to define your own profiles for your specific processes
- C. That you should use the profiles created by Business Configuration Sets (BC Sets)
- D. That the profiles are predefined and not changeable

Answer: D

Explanation:
* Understanding Document Types in SAP S/4HANA Cloud Private Edition and Extended Warehouse Management (EWM):Document types in EWM are used to categorize and define various processes like inbound, outbound, internal, and production activities. These document types also influence the way the system processes the underlying transactions.
* System Profiles in EWM:System profiles in Extended Warehouse Management are predefined by SAP. They represent standard configurations essential for core processes and ensure consistency across different implementations. These profiles are associated with document types to define process-specific settings, such as warehouse process types, item category determination, or movement types.
* Key Points About System Profiles:
* System profiles, such as document category profiles or warehouse order creation rules, are delivered by SAP as part of the standard configuration.
* These profiles are not editable or changeable by customers or consultants. This limitation ensures that critical functionalities behave as intended without customizations impacting the integrity of the system.
* Customers must align their process design with these predefined profiles or utilize SAP- recommended enhancements for specific needs.
* Implications for New Document Types:When creating new document types, you cannot define your own system profiles for them. Instead, you must rely on the system profiles already provided by SAP.
This restriction reinforces adherence to best practices and simplifies system maintenance.
* Why Option B is Correct:The profiles are predefined and not changeable, which aligns with SAP's standardized approach to managing EWM configurations. Other options are incorrect because:
* Option A: You cannot define your own profiles.
* Option C: Business Configuration Sets (BC Sets) are optional templates and do not replace system profiles.
* Option D: While profiles are associated with document types, they are not custom-defined; they are predefined.

NEW QUESTION # 18

What can you do with evaluation points?

- A. Use them to measure the efficiency of your warehouse.
- B. Influence the search sequence of storage types, storage sections, and bin types.
- C. Influence which warehouse order is assigned to a resource.
- D. Influence which items shall be picked first.

Answer: B

Explanation:
Evaluation points in SAP EWM are used to:
* C. Influence the Search Sequence of Storage Types, Storage Sections, and Bin Types:
* Evaluation points are part of storage type search logic.
* They assign priorities to storage types, sections, or bins to determine where goods are stored or picked from first.
Incorrect Options:
* A: Evaluation points do not influence resource assignment for warehouse orders.
* B: They do not directly influence picking priority; this is handled by warehouse task rules.
* D: Evaluation points are not used for measuring warehouse efficiency.
References:
* SAP EWM Documentation: Storage Type Search Sequence
* SAP Help Portal: Configuration of Evaluation Points in EWM

NEW QUESTION # 19
What do you use to control what is displayed on the mobile device? Note: There are 2 correct answers to this question.

- A. Personalization profile
- B. Presentation profile
- C. Queue type
- D. User profile

Answer: A,B

NEW QUESTION # 20
......

With Pass4training's help, you do not need to spend a lot of money to participate in related cram or spend a lot of time and effort to review the relevant knowledge, but can easily pass the exam. Simulation test software of SAP C_S4EWM_2023 Exam is developed by Pass4training's research of previous real exams. Pass4training's SAP C_S4EWM_2023 exam practice questions have a lot of similarities with the real exam practice questions.
