# Deep-Security-Professional Exam Dumps Free, Valid Test Deep-Security-Professional Vce Free

P.S. Free & New Deep-Security-Professional dumps are available on Google Drive shared by TrainingDump: https://drive.google.com/open?id=1G6nK0SfI1c2IhfdL09IFEJ8g4RC59jue

Why we can produce the best Deep-Security-Professional exam prep and can get so much praise in the international market. On the one hand, the software version can simulate the real Deep-Security-Professional examination for you and you can download our study materials on more than one computer with the software version of our study materials. On the other hand, you can finish practicing all the contents in our Deep-Security-Professional practice materials within 20 to 30 hours. So what are you waiting for? Just rush to buy our Deep-Security-Professional exam questions!

The Trend Micro Certified Professional for Deep Security certification exam consists of 60 multiple-choice questions that cover various topics related to Trend Micro Deep Security, including installation and deployment, policy configuration, system administration, and troubleshooting. Candidates have 90 minutes to complete the exam, and they must achieve a passing score of 70% or higher to earn the certification. Deep-Security-Professional Exam is available in English, Japanese, and Simplified Chinese.

Valid Test Deep-Security-Professional Vce Free | Deep-Security-Professional Training Online

Deep-Security-Professional study material is suitable for all people. Whether you are a student or an office worker, whether you are a veteran or a rookie who has just entered the industry, Deep-Security-Professional test answers will be your best choice. For office workers, Deep-Security-Professional test dumps provide you with more flexible study time. You can download learning materials to your mobile phone and study at anytime, anywhere. And as an industry rookie, those unreadable words and expressions in professional books often make you feel mad, but Deep-Security-Professional Study Materials will help you to solve this problem perfectly. All the language used in Deep-Security-Professional study materials is very simple and easy to understand. With Deep-Security-Professional test answers, you don't have to worry about that you don't understand the content of professional books. You also don't need to spend expensive tuition to go to tutoring class. Deep-Security-Professional test dumps can help you solve all the problems in your study.

Trend Micro Certified Professional for Deep Security Sample Questions (Q54-Q59):

NEW QUESTION # 54
Which of the following file types would not be evaluated by the Application Control Protection Module?

- A. .class files

- B. .exe files
- C. .py scripts
- D. .docx files

Answer: D

Explanation:
Application Control evaluates executable files and scripts that can run as code on the system, such as .exe, .
py, and .class files. Document files like .docx are not executed directly as code and are not tracked by Application Control.

NEW QUESTION # 55
The Intrusion Prevention Protection Module is enabled, but the traffic it is trying to analyze is encrypted through https. How is it possible for the Intrusion Prevention Protection Module to monitor this encrypted traffic against the assigned rules?

- A. The Intrusion Prevention Protection Module can analyze https traffic if the public cer-tificate of the originating server is imported into the certificate store on the Deep Secu-rity Agent computer.
- B. The Intrusion Prevention Protection Module can only analyze https traffic originating from other servers hosting a Deep Security Agent.
- C. The Intrusion Prevention Protection Module is not able to analyze encrypted https traffic.
- D. It is possible to monitor the https traffic by creating an SSL Configuration. Creating a new SSL Configuration will make the key information needed to decrypt the traffic available to the Deep Security Agent.

Answer: D

Explanation:
inrusion-prevention-ssl-traffic

NEW QUESTION # 56
How does Smart Scan vary from conventional pattern-based anti-malware scanning?

- A. Smart Scan shifts much of the malware scanning functionality to an external Smart Protection Server.
- B. Smart Scan is performed in real time, where conventional scanning must be triggered manually, or run on a schedule.
- C. Smart Scan identifies files to be scanned based on the content of the file, not the extension.
- D. Smart Scan improves the capture rate for malware scanning by sending features of suspicious files to a cloud-based server where the features are compared to known malware samples.

Answer: A

Explanation:
Smart Scan offloads much of the malware scanning workload to a dedicated external Smart Protection Server (can be Trend Micro-hosted or on-premise), rather than performing all scanning and pattern lookups locally.
The endpoint performs a lightweight initial scan and then queries the Smart Protection Server for advanced analysis, improving performance and reducing pattern update frequency on endpoints.
From the official documentation:
"With Smart Scan, the agent sends file or process attributes to a Smart Protection Server, which then performs the pattern matching and returns the result. This allows agents to use a smaller local pattern file and offloads the majority of scanning to the Smart Protection infrastructure." Option B is correct.
Option A is misleading; although file features are checked externally, the main difference is offloading, not capture rate.
Option C is incorrect; both methods can scan in real-time.
Option D describes IntelliScan, not Smart Scan.

NEW QUESTION # 57
Which Deep Security Protection Modules can be used to provide runtime protection for the Kubernetes and Docker platforms?

Select all that apply.

- A. Intrusion Prevention
- B. Log Inspection
- C. Anti-Malware
- D. Integrity Monitoring

Answer: A,C,D

Explanation:
Deep Security supports runtime protection for container environments (such as Kubernetes and Docker) using the following modules:
Intrusion Prevention protects container network traffic and blocks exploits.
Integrity Monitoring monitors for unauthorized or unexpected changes in files and configuration.
Anti-Malware scans for malware within containers and images.
Log Inspection is not currently available as a runtime protection feature for containers.

Trend Micro Deep Security Administrator's Guide, Container Security and Runtime Protection Section

NEW QUESTION # 58
A Recommendation Scan is run to determine which Intrusion Prevention rules are appropriate for a Server. The scan is configured to apply the suggested rules automatically and ongoing scans are enabled. Some time later, an operating system patch is applied. How can you de-termine which Intrusion Prevention rules are no longer needed on this Server?

- A. Since the rules are being applied automatically, when the next Intrusion Prevention Recommendation Scan is run automatically, any rules that are no longer needed will be displayed on the Recommended for Unassignment tab in the IPS Rules. These are rules that are no longer needed and can be disabled as the vulnerability was corrected with the patch.
- B. Since there is no performance effect when multiple Intrusion Prevention rules are ap-plied, there is no need to determine which rules are no longer needed. The original rec-ommended rules can remain in place without affecting the system.
- C. Since the rules are being applied automatically, when the next Intrusion Prevention Recommendation Scan is run automatically, any rules that are no longer needed will be automatically unassigned. These are rules that are no longer needed as the vulnerability was corrected with the patch.
- D. The READ ME file provided with the software patch will indicate which issues were addressed with this release. Compare this list to the rules that are applied to determine which rules are no longer needed and can be disabled.

Answer: C

NEW QUESTION # 59
......

The clients at home and abroad can both purchase our Deep-Security-Professional study tool online. Our brand enjoys world-wide fame and influences so many clients at home and abroad choose to buy our Deep-Security-Professional test guide. Our company provides convenient service to the clients all around the world so that the clients all around the world can use our Deep-Security-Professional Study Materials efficiently. Our company boosts an entire sale system which provides the links to the clients all around the world so that the clients can receive our Deep-Security-Professional exam questions timely.
