

2026 Oracle Updated 1Z0-1151-25 Valid Test Pattern

ActualTorrent is also offering one year free 1Z0-1151-25 updates. You can update your 1Z0-1151-25 study material for 90 days from the date of purchase. The Oracle Cloud Infrastructure 2025 Multicloud Architect Professional updated package will include all the past questions from the past papers. You can pass the 1Z0-1151-25 exam easily with the help of the PDF dumps included in the package. It will have all the questions that you should cover for the Oracle 1Z0-1151-25 Exam. If you are facing any issues with the products you have, then you can always contact our 24/7 support to get assistance.

Oracle 1Z0-1151-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Core OCI Services Overview: This section evaluates the knowledge of Identity and Database Administrators in managing OCI's core services for multi-cloud integration. It covers the implementation of identity federation between OCI Identity Domains and external identity providers, ensuring secure authentication across multiple cloud environments. Candidates will also gain expertise in configuring Virtual Cloud Network (VCN) components and administering OCI database services, including Base Databases, Autonomous Databases, and HeatWave, to support scalable multi-cloud deployments.
Topic 2	<ul style="list-style-type: none"> Implement Oracle Database@Google Cloud: This section measures the proficiency of Cloud Database Engineers in utilizing Oracle Database@Google Cloud. It explores the architecture and operational framework for running Oracle databases on Google Cloud. Candidates will learn about onboarding procedures, provisioning resources, and managing database services effectively to optimize performance and availability in a Google Cloud-integrated multi-cloud ecosystem.
Topic 3	<ul style="list-style-type: none"> Configure Multicloud Connection Options: This section assesses the abilities of Network Engineers in configuring connectivity solutions for OCI multi-cloud environments. It includes setting up secure networking options such as Site-to-Site VPN and FastConnect for seamless cloud integration. Candidates will also learn how to implement Oracle Interconnect services for establishing direct, high-performance connections between OCI and third-party cloud providers like Microsoft Azure and Google Cloud.
Topic 4	<ul style="list-style-type: none"> Introduction to Multicloud: This section of the exam measures the skills of Cloud Architects in understanding multicloud environments and their benefits. It covers the reasons organizations adopt multi-cloud strategies, including flexibility, cost optimization, and risk management. Candidates will learn about common multicloud use cases and how they are implemented in Oracle Cloud Infrastructure (OCI) to enhance interoperability and performance.

Topic 5	<ul style="list-style-type: none"> • Implement Oracle Database@Azure: This section tests the expertise of Database Solutions Architects in deploying and managing Oracle Database@Azure. It covers the architectural components and onboarding processes required for provisioning databases in Azure while maintaining Oracle's advanced database capabilities. Candidates will also focus on configuring high availability and disaster recovery strategies to ensure business continuity and data resilience in a multi-cloud setup.

1Z0-1151-25 Mock Test & 1Z0-1151-25 Exam Passing Score

Whether you are at home or out of home, you can study our 1Z0-1151-25 test torrent. You don't have to worry about time since you have other things to do, because under the guidance of our 1Z0-1151-25 study tool, you only need about 20 to 30 hours to prepare for the exam. You can use our 1Z0-1151-25 exam materials to study independently. Then our system will give you an assessment based on your actions. You can understand your weaknesses and exercise key contents. You don't need to spend much time on it every day and will pass the exam and eventually get your certificate. 1Z0-1151-25 Certification can be an important tag for your job interview and you will have more competitiveness advantages than others.

Oracle Cloud Infrastructure 2025 Multicloud Architect Professional Sample Questions (Q23-Q28):

NEW QUESTION # 23

An e-commerce company experiences periodic surges in traffic during seasonal sales events. Their core application is hosted on OCI, while their AI-powered recommendation engine runs on Google Cloud. To handle these traffic surges efficiently, the company requires: * A quick way to scale bandwidth between OCI and Google Cloud * Minimal disruption to existing configurations when making adjustments. What is the most appropriate configuration to address the company's requirements during traffic surges?

- A. Use public internet with increased capacity during surges.
- **B. Upgrade the existing bandwidth during traffic surges and downgrade it once the surge ends.**
- C. Use Oracle Interconnect for Google Cloud to provision an additional virtual circuit and configure it for Equal-Cost Multi-Path Routing (ECMP).
- D. Deploy a VPN connection to handle additional traffic.

Answer: B

Explanation:

Upgrading the existing Oracle Interconnect for Google Cloud bandwidth during surges and downgrading afterward meets the need for scalability and minimal disruption. This leverages the existing FastConnect and Partner Interconnect setup, avoiding new configurations like additional virtual circuits with ECMP (Option A), which adds complexity. VPN (Option C) and public internet (Option D) lack the performance and reliability of the interconnect. Oracle's documentation supports dynamic bandwidth adjustments for such scenarios.

NEW QUESTION # 24

What is the role of BGP dynamic routing in the connection between an Azure VNet and OCI VCN?

- A. It is used to manage the security rules for the VNet and VCN.
- B. It is used to establish a direct connection between the VNet and VCN without a virtual circuit.
- **C. It is used to automatically select the best route between the VNet and VCN.**
- D. It is used to create a static routing configuration for the VNet and VCN.

Answer: C

Explanation:

Border Gateway Protocol (BGP) is a dynamic routing protocol used in the OCI-Azure Interconnect to automatically determine the optimal path for data between an Azure Virtual Network (VNet) and an OCI Virtual Cloud Network (VCN). Unlike static routing (Option A), BGP adapts to network changes, ensuring efficient and reliable connectivity. It doesn't establish the connection itself (Option B) or manage security rules (Option C)-those are handled by FastConnect/ExpressRoute and security lists, respectively.

Oracle's networking documentation for multicloud interconnects confirms BGP's role in route optimization.

NEW QUESTION # 25

Which workload type is NOT optimized for Oracle Autonomous Database on Shared Exadata Infrastructure?

- A. Mixed workloads
- B. Data warehousing
- C. High-performance computing
- D. Transaction processing

Answer: C

Explanation:

Oracle Autonomous Database on Shared Exadata Infrastructure is optimized for data warehousing (Option A), mixed workloads (Option B), and transaction processing (Option D), leveraging Exadata's performance and automation. High-performance computing (HPC, Option C), typically involving compute-intensive tasks like simulations, is not a primary focus-OCI offers separate HPC solutions. Oracle's documentation confirms these workload optimizations.

NEW QUESTION # 26

A company wants to leverage Google Cloud's AI/ML services for analyzing data stored in Oracle Autonomous Database on OCI. Which approach minimizes data egress costs and latency for this multicloud analytics use case?

- A. Use Oracle Data Integration Platform Cloud (DIPC) to replicate the data to a Google Cloud SQL instance.
- B. Use a third-party ETL tool to extract data from Autonomous Database and load it into Google BigQuery.
- C. Leverage Oracle Interconnect for Google Cloud to establish a direct, low-latency connection and access Autonomous Database remotely from Google Cloud's AI/ML services.
- D. Export data from Autonomous Database to Google Cloud Storage regularly using Data Pump.

Answer: C

Explanation:

Here's why:

Oracle Interconnect for Google Cloud: This service provides a dedicated, private connection between OCI and Google Cloud. This direct interconnection minimizes latency significantly compared to transferring data over the public internet. Crucially, it also avoids data egress charges from OCI, as the data remains within the interconnected network. This is the key advantage for cost optimization. By accessing the database remotely, you are processing the data in place, avoiding any transfer costs from OCI.

Why other options are less optimal:

A). Export data from Autonomous Database to Google Cloud Storage regularly using Data Pump: This involves transferring large amounts of data across the public internet, incurring egress costs from OCI. It also introduces latency due to the data transfer process. Regular exports also mean data is not live and can be outdated.

B). Use Oracle Data Integration Platform Cloud (DIPC) to replicate the data to a Google Cloud SQL instance: Similar to option A, this involves data transfer and replication, incurring egress costs from OCI and introducing latency. Maintaining a replicated database also adds complexity and cost.

D). Use a third-party ETL tool to extract data from Autonomous Database and load it into Google BigQuery: This option also requires data extraction and loading, resulting in egress costs from OCI and increased latency. Using a third-party tool also adds another layer of cost and management.

NEW QUESTION # 27

What are the main types of purchase offers for Oracle Database@Google Cloud?

- A. Public and Private
- B. Basic and Advanced
- C. Free Tier and Paid
- D. Standard and Premium

Answer: A

Explanation:

Oracle Database@Google Cloud offers Public and Private purchase options via the Google Cloud Marketplace. Public offers are standardized and directly available, while Private offers involve negotiated terms with Oracle Sales. Options A and C are not official terms, and Free Tier (Option D) doesn't apply to this enterprise service. Oracle's purchasing documentation defines these two types.

NEW QUESTION # 28

.....

For a long time, high quality is our 1Z0-1151-25 exam torrent constantly attract students to participate in the use of important factors, only the guarantee of high quality, to provide students with a better teaching method, and at the same time the 1Z0-1151-25 practice materials bring more outstanding teaching effect. And with the three different versions of our 1Z0-1151-25 Exam Questions on the web, so high-quality 1Z0-1151-25 learning guide help the students know how to choose suitable for their own learning method, our 1Z0-1151-25 study materials are a very good option for you to pass the exam.
