### EC-COUNCIL EC-Council Certified Network Defender CND Sample Questions (Q358-Q363):

#### NEW QUESTION # 358

Management asked their network administrator to suggest an appropriate backup medium for their backup plan that best suits their organization's need. Which of the following factors will the administrator consider when deciding on the appropriate backup medium?

- A. Extensibility
- B. Accountability
- C. Reliability
- D. Capability

**Answer: A,C,D**

#### NEW QUESTION # 359

Which of the following is the full form of SAINT?

- A. Security Admin Integrated Network Tool
- B. System Automated Integrated Network Tool
- C. System Administrators Integrated Network Tool
- D. System Admin Integrated Network Tool

**Answer: C**

#### NEW QUESTION # 360

Which of the following statement holds true in terms of containers?

- A. Process-level isolation happens; a container is hence less secure
- B. Container requires more memory space
- C. Each container runs in its own OS
- D. Container is fully isolated; hence, more secure

**Answer: A**

Explanation:

Containers are designed to be lightweight, running directly within the host's kernel without the need for a guest operating system. This means they share the same OS kernel but maintain separate user spaces. While this architecture provides process-level isolation, it does not offer the same level of security as a fully isolated virtual machine (VM). VMs include a full copy of an operating system, a virtual copy of the hardware that the OS requires to run, and provide complete isolation from the host system. Containers, on the other hand, are less secure because if the host OS is compromised, all containers could potentially be compromised. The Certified Network Defender (CND) program emphasizes understanding the security implications of different technologies, including containers, and the importance of implementing appropriate security measures to protect network resources.

## NEW QUESTION # 361

In which of the following types of port scans does the scanner attempt to connect to all 65535 ports?

- A. UDP
- B. **Vanilla**
