

Exam Questions FCP_ZCS_AD-7.4 Vce | Valid FCP_ZCS_AD-7.4 Exam Answers

What's more, part of that TestKingIT FCP_ZCS_AD-7.4 dumps now are free: https://drive.google.com/open?id=1Xrs8OF5GXwCZmv9KMGBrhC_59HWJ6K1o

We would like to make it clear that learning knowledge and striving for certificates of FCP_ZCS_AD-7.4 exam is a self-improvement process, and you will realize yourself rather than offering benefits for anyone. So our FCP_ZCS_AD-7.4 training guide is once a lifetime opportunity you cannot miss. With all advantageous features introduced on the website, you can get the first expression that our FCP_ZCS_AD-7.4 Practice Questions are the best.

Fortinet FCP_ZCS_AD-7.4 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> VPN Solutions in Azure: This section of the exam measures skills of a Network Security Engineer and addresses secure connectivity between Azure and on-premises environments. Candidates will review the different site-to-site VPN options available in Azure, configure tunnels between FortiGate devices and Azure VPN gateways, and understand how Azure Virtual WAN enhances global connectivity.
Topic 2	<ul style="list-style-type: none"> High Availability (HA): This section of the exam measures skills of a Network Security Engineer and focuses on maintaining system resilience within Azure. Candidates are required to demonstrate knowledge of setting up FortiGate-based high availability in Azure, configuring Azure-native load balancing, and implementing autoscaling features to ensure continuous service availability and optimal performance.
Topic 3	<ul style="list-style-type: none"> Azure Public Cloud Concepts: This section of the exam measures skills of a Cloud Engineer and covers foundational knowledge of public cloud computing, with a focus on Azure. Candidates are expected to understand core cloud concepts and how Azure implements them through services such as compute, storage, and networking. It also includes basic elements of Azure networking and built-in security services that support cloud-native operations.

Valid FCP_ZCS_AD-7.4 Exam Answers - FCP_ZCS_AD-7.4 Real Exams

With the Fortinet FCP_ZCS_AD-7.4 exam practice test questions, you can easily speed up your FCP_ZCS_AD-7.4 exam preparation and be ready to solve all the final Fortinet FCP_ZCS_AD-7.4 exam questions. As far as the top features of Fortinet FCP_ZCS_AD-7.4 Exam Practice test questions are concerned, these FCP_ZCS_AD-7.4 exam questions are real and verified by experience exam trainers.

Fortinet FCP - Azure Cloud Security 7.4 Administrator Sample Questions (Q23-Q28):

NEW QUESTION # 23

Refer to the exhibit.

You are troubleshooting a network connectivity issue between two VMs that are deployed in Azure.

One VM is a FortiGate that has one interface in the DMZ subnet, which is in the Production VNet. The other VM is a Windows Server in the Servers subnet, which is also in the Production VNet. You cannot ping the Windows Server from the FortiGate VM. What is the reason for this?

- A. You have not configured a user-defined route for this traffic
- **B. The firewall in the Windows VM is blocking the traffic**
- C. You have not created a VPN to allow traffic between those subnets
- D. By default, Azure does not allow ICMP traffic between subnets

Answer: B

Explanation:

The FortiGate VM and the Windows Server VM are in different subnets but within the same Production virtual network, which means they can communicate by default unless restricted. Azure allows ICMP between subnets, but Windows VMs have ICMP blocked by default in their firewall settings. Therefore, the likely reason for the ping failure is that the Windows Server's firewall is blocking ICMP (ping) traffic.

NEW QUESTION # 24

What is the main purpose of Azure Virtual WAN?

Response:

- A. To manage Windows updates across enterprise networks
- B. To provide physical network security
- **C. To enhance global connectivity and network optimization**
- D. To provide decentralized web hosting

Answer: C

NEW QUESTION # 25

What critical step is involved when integrating FortiGate with Azure SDN?

Response:

- A. Configuring VLAN attachments
- **B. Configuring security policies**
- C. Implementing a VPN gateway
- D. Setting up direct peering

Answer: B

NEW QUESTION # 26

Why would you use a user-defined route in Azure?

- A. To manage user authentication and access control
- **B. To have the traffic from the other VMs inspected by FortiGate**
- C. To allow communication between FortiGate VMs on two subnets in the same VNET
- D. To allow inbound management access to FortiGate VMs

Answer: B

Explanation:

A user-defined route (UDR) in Azure is used to redirect traffic from other VMs through a FortiGate VM for inspection. By modifying the routing table, you ensure that outbound or inter-subnet traffic is sent to the FortiGate as the next hop, enabling traffic filtering, logging, and security enforcement.

NEW QUESTION # 27

How do site-to-site VPN connections function in Azure when integrated with FortiGate appliances?

Response:

- **A. Through secure tunnels established between sites**
- B. Through API-based configuration updates
- C. By using public internet endpoints exclusively
- D. By encrypting data at the application layer

Answer: A

NEW QUESTION # 28

.....

Regarding the process of globalization, every fighter who seeks a better life needs to keep pace with its tendency to meet challenges. FCP_ZCS_AD-7.4 certification is a stepping stone for you to stand out from the crowd. The FCP_ZCS_AD-7.4 exam guide function as a time-counter, and you can set fixed time to fulfill your task, so that promote your efficiency in real test. The key strong-point of our FCP_ZCS_AD-7.4 Test Guide is that we impart more important knowledge with fewer questions and answers, with

those easily understandable FCP_ZCS_AD-7.4 study braindumps, you will find more interests in them and experience an easy learning process.
