ED-Con-101 Real Brain Dumps & ED-Con-101 Test Sample Questions

Having a Salesforce Certification ED-Con-101 Exam certificate can help people who are looking for a job get better employment opportunities in the IT field and will also pave the way for a successful IT career for them.

Salesforce Certified Education Cloud Consultant Sample Questions (Q205-Q210):

NEW QUESTION # 205

An elementary school district has evaluated Nonprofit Success Pack and now wants to evaluate the K-12 Architecture Kit. Which action should the consultant take?

- A. Install the K-12 Architecture Kit from the AppExchange.
- **B. Install the K-12 Architecture Kit from GitHub.**
- C. Make K-12 Architecture Kit record types available to profiles.
- D. Start a new K-12 Architecture Kit trial.

Answer: B

Explanation:

The consultant should install the K-12 Architecture Kit from GitHub to evaluate it for the school district. GitHub is a platform that hosts code repositories and allows users to collaborate on software development projects. The K-12 Architecture Kit is a solution that extends EDA to meet the needs of K-12 schools. The K-12 Architecture Kit provides objects and features to track student information, such as grades, attendance, and program enrollments. The K-12 Architecture Kit is not available on the AppExchange, but rather on GitHub as an open source project that users can install and customize. Installing the K-12 Architecture Kit from the AppExchange, starting a new K-12 Architecture Kit trial, or making K-12 Architecture Kit record types available to profiles are not actions that the consultant can take to evaluate it for the school district. NEW QUESTION # 206

A university's Study Abroad office is getting ready to implement Salesforce to streamline internal processes. In the past, most of the work was done using spreadsheets and paper. The office is unsure of which metrics to use to determine whether the implementation project is successful.

Which metric should the consultant recommend?

- **A. Percentage of staff logins each month**
- B. Volume of emails to the office
- C. Number of student phone inquiries

Answer: A

Explanation:

The percentage of staff logins each month is a metric that the consultant can recommend to measure the success of the Salesforce implementation project for the Study Abroad office. This metric can indicate the level of user adoption, satisfaction, and engagement with the new system, as well as the effectiveness of the training and change management strategies. A high percentage of staff logins each month can show that the staff are using Salesforce regularly and consistently to streamline their internal processes, such as managing student applications, tracking program status, and communicating with partners.

The number of student phone inquiries and the volume of emails to the office are not valid metrics for this scenario, as they do not reflect the impact of the Salesforce implementation on the internal processes of the Study Abroad office. These metrics may be influenced by other factors, such as the demand for study abroad programs, the quality of the website and marketing materials, and the availability and responsiveness of the staff. These metrics may also not capture the efficiency and accuracy of the data and workflows that Salesforce can provide.

NEW QUESTION # 207

Recruiters want to visualize the number of prospective students at various stages in the recruitment process.

Which report chart should the consultant implement?

- A. Program Enrollment dashboard
- B. Application Tabular report

- C. Education History dashboard
- **D. Opportunity Funnel report**

Answer: D

Explanation:

Opportunity Funnel report is a report chart that the consultant can implement to help recruiters visualize the number of prospective students at various stages in the recruitment process. Opportunity Funnel report is a type of report that shows the distribution of Opportunities by stage, amount, or probability. Opportunity Funnel report can be used to track the progress and performance of the recruitment pipeline, and identify bottlenecks or opportunities for improvement. Application Tabular report, Education History dashboard, and Program Enrollment dashboard are not report charts that can help recruiters visualize the number of prospective students at various stages in the recruitment process. NEW QUESTION # 208

The Recruitment and Admissions office has an existing Salesforce environment they want to expand to include all of the school's operations and service. The school has asked the consultant for recommendations to ensure the expansion is efficient,, and will meet the need of new existing user.

Which should the consultant recommend to meet the requirements?

- A. Encourage users to post ideas on Chatter.
- **B. Build a Center of Excellence.**
- C. Create a Trailmix for new users.
- D. Grant System Admin access for each department leader.

Answer: B

Explanation:

The consultant should recommend the school to build a Center of Excellence, because this can ensure that the expansion of their Salesforce environment is efficient, scalable, and will meet the needs of new and existing users. A Center of Excellence is a team or a group of teams that provide leadership, best practices, governance, and support for Salesforce within an organization. A Center of Excellence can help the school align their Salesforce strategy with their business goals, manage change and adoption, optimize performance and security, and foster innovation and collaboration. Creating a Trailmix for new users, granting System Admin access for each department leader, and encouraging users to post ideas on Chatter are not recommendations that can ensure that the expansion of the Salesforce environment is efficient, scalable, and will meet the needs of new and existing users. Reference:

NEW QUESTION # 209

The IT department at a university is evaluating open source solutions for student recruitment.

Which consideration should the consultant discuss with the department?

- A. The code is maintained by Salesforce developers.
- **B. The code is shared and sourced by the community.**
- C. The code is updated via Salesforce Releases.

Answer: B

Explanation:

The consideration that the consultant should discuss with the IT department is C. The code is shared and sourced by the community¹. This means that open source solutions for student recruitment are developed and maintained by a network of volunteers, contributors, and users who collaborate and exchange ideas, feedback, and code. The code is publicly available and can be modified, customized, and redistributed by anyone who follows the license terms and conditions².

A. The code is updated via Salesforce Releases and B. The code is maintained by Salesforce developers are not valid considerations for open source solutions for student recruitment. These statements apply to Salesforce products and features that are built and supported by Salesforce, such as the Education Data Architecture (EDA) or the Higher Education Data Platform (HEDA)³. However, open source solutions are not part of the Salesforce platform and do not depend on Salesforce releases or developers.
