We are confident in the quality of the CompTIA XK0-006 preparational material we provide and back it up with a money-back guarantee.

CompTIA Linux+ Certification Exam Sample Questions (Q67-Q72):

NEW QUESTION # 67

Which of the following passwords is the most complex?

- A. HeSaidShetold
- B. he\$@ID\$heTold
- C. H3s@1dSh3t0|d
- D. H3sa1dt01d

Answer: C

Explanation:

This password is the most complex because it uses uppercase and lowercase letters, numbers, and multiple special characters, making it significantly harder to guess or brute-force compared to the others.

NEW QUESTION # 68

Following the completion of monthly server patching, a Linux administrator receives reports that a critical application is not functioning. Which of the following commands should help the administrator determine which packages were installed?

- A. `dnf info`
- B. `dnf history`
- C. `dnf search`
- D. `dnf list`

Answer: B

Explanation:

The `dnf history` command shows a log of past package operations (install, update, remove), allowing the administrator to review which packages were installed or updated during the patching process.

NEW QUESTION # 69

A systems administrator is having issues with a third-party API endpoint. The administrator receives the following output:

```
# curl https://comptia.com/endpoint
curl: (6) Could not resolve host: comptia.com

# dig comptia.com
; <<> <<> comptia.com
;; global options: +cmd
;; Got answer:
;; ->HEADER<- opcode: QUERY, status: NXDOMAIN, id: 14031
;; flags: qr rd ra; QUERY: 1, ANSWER: 0, AUTHORITY: 1, ADDITIONAL: 1
;; OPT PSEUDOSECTION:
; EDNS: version: 0, flags:; udp: 512
;; QUESTION SECTION:
;comptia.com. IN A
;; AUTHORITY SECTION:
com. 900 IN SOA a.gtld-servers.net. nstld.verisign-grs.com. 1720473015 1800 900 604800 86400
;; Query time: 159 msec
;; SERVER: 10.255.255.254#53(10.255.255.254) (UDP)
;; WHEN: Mon Jul 08 15:10:45 CST 2024
;; MSG SIZE rcvd: 117
```

Which of the following actions should the administrator take to resolve the issue?

- A. Enable internet connectivity on the host.
- B. Open a secure port in the server's firewall.
- C. Request a new API endpoint from a third party.
- D. Review and fix the DNS client configuration file.

Answer: D

Explanation:

The `dig comptia.com` output shows `NXDOMAIN` and that the query is being sent to `10.255.255.254`, which is not a valid DNS server. This indicates a misconfigured DNS client configuration (e.g., `/etc/resolv.conf`). Fixing the DNS settings will allow proper hostname resolution.

NEW QUESTION # 70

A Linux administrator needs to analyze a compromised disk for traces of malware. To complete the analysis, the administrator wants to make an exact, block-level copy of the disk. Which of the following commands accomplishes this task?

- A. `cpio -i /dev/sdc -ov /tmp/image`
- B. `dd if=/dev/sdc of=/tmp/image bs=8192`
- C. `tar cvzf /tmp/image /dev/sdc`
- D. `cp -rp /dev/sdc/* /tmp/image`

Answer: B

Explanation:

The dd command performs a low-level, block-by-block copy of a device. Using if=/dev/sdc (input file) and of=/tmp/image (output file) with a block size (bs) ensures an exact replica of the disk, suitable for forensic analysis.

NEW QUESTION # 71

A systems administrator needs to validate that the dm_multipath driver was loaded in a Linux system. Which of the following commands should the administrator use?

- A. `lsmod | grep dm_multipath`
- B. `modinfo | grep dm_multipath`
- C. `insmod | grep dm_multipath`
- D. `modprobe | grep dm_multipath`

Answer: A

Explanation:

lsmod lists currently loaded kernel modules; piping to grep dm_multipath confirms whether that specific driver is active in the running kernel.

NEW QUESTION # 72

.....

A lot of effort, commitment, and in-depth CompTIA Linux+ Certification Exam (XK0-006) exam questions preparation is required to pass this CompTIA XK0-006 exam. For the complete and comprehensive CompTIA Linux+ Certification Exam (XK0-006) exam dumps preparation you can trust valid, updated, and XK0-006 Questions which you can download from the PrepAwayETE platform quickly and easily.
