- **C. To plan the professional development of team members**
- D. To plan to fill all the mandatory ITIL roles

Answer: C

NEW QUESTION # 16

An organization is writing its test strategy in order to define the test levels and test types that are in scope for testing. In the past, the organization has experienced service disruptions after some releases of a particular application. These disruptions were happening because the application caused other applications to generate errors.

Which test level should the organization focus on to address this weakness?

- A. Acceptance
- B. Unit
- C. Integration
- D. System

Answer: C

NEW QUESTION # 17

An organization experiences delays when creating and changing products and services. This is largely because software developers store code in their individual repositories.

- A. Continuous delivery
- B. Continuous deployment
- C. Continual improvement
- D. Continuous integration

Answer: D

NEW QUESTION # 18

An internal service provider of a large retail organization is working on a major update of the self-checkout terminals used in the supermarkets. The update includes new hardware, software, and integration with a new card payment system. How should the service provider ensure that the update is sufficiently tested?

- A. Limit testing to the pre-agreed technical criteria and use a dedicated team of testers
- B. Focus testing solely on user experience and delegate it to operational teams
- C. Include user experience and perception in the scope of testing and involve multiple teams
- D. Delegate to the vendor testing of the terminals and the card payment system

Answer: C

NEW QUESTION # 19

An organization is in the process of restoring the online payment app service, and its IT teams have reached a stage where creative problem-solving is needed. What does this situation describe?
