

# Newest EFM Prep Guide is Prefect EFM Practice Exam Dumps

If you are going to look for EFM exam braindumps, you may pay more attention to the quality as well as the pass rate. EFM training materials are edited by experienced experts, and therefore the quality can be guaranteed. With the pass rate reaching 98.65%, our EFM exam materials have received many good feedbacks from candidates. Besides, EFM Exam Materials cover most of knowledge points for the exam, and you can master them well through practicing as well as improve your ability in the process of training. We offer you free update for 365 days, and the update version for EFM exam dumps will be auto sent to you.

VCEPrep NCC EFM preparation material is a comprehensive solution for NCC EFM test preparation, with a variety of features aimed to help you earning the EFM. The EFM test is a required step in getting the Certified - Electronic Fetal Monitoring certification badge. With VCEPrep, you will get access to NCC EFM Actual Questions that will allow you to focus on important concepts and prepare for the NCC exam in a short period of time.

## Professional Exam EFM Guide Materials & Free PDF Latest EFM Exam Question & Perfect EFM Pass4sure Pass Guide

Our society needs to various comprehensive talents, rather than a man only know the book knowledge but not understand the applied to real bookworm, therefore, we need to get the EFM certification, obtain the corresponding certifications. What a wonderful news it is for everyone who wants to pass the certification exams. There is a fabulous product to prompt the efficiency-- the EFM Exam Prep, as far as concerned, it can bring you high quality learning platform to pass the variety of exams.

## NCC Certified - Electronic Fetal Monitoring Sample Questions (Q93-Q98):

### NEW QUESTION # 93

A woman at 39-weeks gestation is in early labor, 2-3 cm dilated, 85% effaced, and -2 station. Based on the fetal heart rate tracing shown, what is the most appropriate first intervention?

- A. Administer terbutaline
- **B. Adjust the fetal monitor**
- C. Administer an IV fluid bolus

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract-Based NCC C-EFM References:

The tracing shows significant artifact, periods of signal loss, and abrupt changes inconsistent with physiologic fetal patterns. This is typical of poor signal quality, not actual fetal decelerations. In early labor at -2 station, external FHR monitoring often loses contact due to fetal position and maternal movement.

NCC and AWHONN emphasize the following when artifact is present:

- \* Correct signal quality before interpreting the tracing.
  - \* Troubleshooting steps include:- Adjusting transducer location- Ensuring adequate ultrasound gel- Repositioning the mother- Checking for maternal heart rate contamination
- Why the other options are incorrect:
- \* B. IV fluid bolus - Indicated for hypotension or late decelerations, not for artifact.
  - \* C. Terbutaline - Used for tachysystole with fetal intolerance; there is no tachysystole shown.

Thus, the correct first step is A. Adjust the fetal monitor.

References: NCC C-EFM Candidate Guide; AWHONN Fetal Heart Monitoring Principles & Practices; Miller's Pocket Guide; Menihan; Simpson & Creehan.

### NEW QUESTION # 94

During amnioinfusion, the infusion should be stopped periodically to assess changes in:

- A. Contraction pattern
- B. Patient pain level
- **C. Baseline uterine pressure**

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract-Based NCC C-EFM References:

During amnioinfusion, NCC emphasizes monitoring for uterine overdistention, which can lead to uterine hypertonus, uterine rupture, or placental separation. The primary way to evaluate overdistention is by measuring baseline uterine pressure via IUPC.

- \* Rising resting tone (>20-25 mmHg) indicates accumulating fluid and risk.
- \* Stopping the infusion intermittently allows recalibration and assessment of uterine baseline pressure.
- \* Contraction pattern (option B) is important but not the primary safety parameter.
- \* Pain (option C) is nonspecific and not a reliable indicator of uterine overdistention.

Thus, the infusion is stopped to assess baseline uterine pressure.

References: NCC C-EFM Candidate Guide; AWHONN Fetal Heart Monitoring Principles & Practices; Miller's Fetal Monitoring Pocket Guide; Menihan Electronic Fetal Monitoring.

### NEW QUESTION # 95

A pattern of recurrent variable decelerations would move from Category II to Category III if what fetal heart rate change occurs?

- A. Tachysystole
- B. Late decelerations
- C. Absent variability

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From NCC-Aligned Sources:

Category III criteria include:

- \* Absent variability with recurrent variable decelerations
- \* Absent variability with recurrent late decelerations
- \* Absent variability with bradycardia
- \* Sinusoidal pattern

Thus, recurrent variables become Category III when accompanied by absent variability, indicating fetal decompensation.

Why the other answers are wrong:

- \* B. Late decelerations # Category III only if combined with absent variability.
- \* C. Tachysystole # Contraction pattern, not a FHR characteristic.

Correct answer: Absent variability.

References: NCC C-EFM Candidate Guide; NICHD Definitions; AWHONN FHMPP.

### NEW QUESTION # 96

A 30-minute tracing with moderate variability, accelerations, and one variable deceleration would be classified as:

- A. Category III
- B. Category I
- C. Category II

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From NCC-Aligned Sources:

NICHD/NCC criteria:

Category I must have ALL of the following:

- \* Baseline 110-160 bpm
- \* Moderate variability
- \* No late or variable decelerations
- \* Early decelerations may be present or absent
- \* Accelerations may be present or absent

Because this tracing has one variable deceleration, it fails Category I criterion ("no late or variable decelerations").

Category III requires:

- \* Absent variability with recurrent late decels, recurrent variables, or bradycardia, or
- \* Sinusoidal pattern

Those findings are not present.

Therefore, any tracing that:

- \* Has moderate variability and accelerations,
- \* But includes a variable deceleration, and
- \* Does not meet Category III criteria

...falls into the Category II (indeterminate) group.

Correct classification: B. Category II.

References: NCC C-EFM Candidate Guide; NICHD Three-Tier FHR Interpretation System; AWHONN FHMPP; Menihan; Simpson & Creehan.

### NEW QUESTION # 97

During the second stage of labor, a period of bradycardia develops. The fetal heart rate baseline variability is moderate. The most

likely cause of this bradycardia is:

- A. Vasospasm
- B. Cord compression
- **C. Vagal stimulation**

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From NCC-Aligned Sources:

Second-stage bradycardia with moderate variability most commonly occurs from:

\* Vagal stimulation caused by head compression, particularly during descent and pushing.

Moderate variability indicates:

- \* Neurologically intact fetus
- \* Sufficient oxygen reserve
- \* Temporary nature of bradycardia

This aligns with physiologic vagal slowing rather than hypoxic mechanisms.

Why the incorrect answers are wrong:

- \* A. Cord compression # typically produces variable decelerations, not sustained bradycardia with preserved variability.
- \* C. Vasospasm # associated with late decelerations and decreased variability (uteroplacental insufficiency).

Correct answer: B. Vagal stimulation

References: NCC Physiology Domain; AWHONN FHMPP; Menihan; Simpson & Creehan.

## NEW QUESTION # 98

.....

There are a lot of leading experts and professors in different field in our company. As a result, they have gained an in-depth understanding of the fundamental elements that combine to produce world class EFM practice materials for all customers. So we can promise that our EFM study materials will be the best study materials in the world. Our EFM Exam Questions have a high quality. If you decide to buy our EFM study materials, we can make sure that you will have the opportunity to enjoy the EFM study guide from team of experts.

**Latest EFM Exam Question:** <https://www.vceprep.com/EFM-latest-vce-prep.html>

NCC Exam EFM Guide Materials We guarantee to you if you fail in we will refund you in full immediately and the process is simple, But there are question is that how you can pass the EFM exam and get a certificate, NCC Exam EFM Guide Materials As an IT worker, how can you stand out in the crowd, Are you still worrying about how to safely pass NCC EFM real exam?

Safety is very important, it can help you avoid many unnecessary EFM troubles, External style sheets have many powerful advantages that make them ubiquitous in professional Web sites.

We guarantee to you if you fail in we will refund you in full immediately and the process is simple, But there are question is that how you can pass the EFM Exam and get a certificate.

## Updated Exam EFM Guide Materials, Latest EFM Exam Question

As an IT worker, how can you stand out in EFM Passing Score the crowd, Are you still worrying about how to safely pass NCC EFM real exam, We support "Full Refund" unconditionally if you cannot pass exam with our EFM exam cram in one year.
