BONUS!!! Download part of TorrentExam 2V0-11.25 dumps for free: [https://drive.google.com/open?id=12gwRX5\\_T73oYJ\\_0V3rVwSn4E0mly\\_c](https://drive.google.com/open?id=12gwRX5_T73oYJ_0V3rVwSn4E0mly_c)

The VMware Cloud Foundation 5.2 Administrator (2V0-11.25) certification is the way to go in the modern VMware era. Success in the 2V0-11.25 exam of this certification plays an essential role in an individual's future growth. Nowadays, almost every tech aspirant is taking the test to get VMware certification and find well-paying jobs or promotions. But the main issue that most of the candidates face is not finding updated VMware 2V0-11.25 Practice Questions to prepare successfully for the VMware 2V0-11.25 certification exam in a short time.

As the authoritative provider of 2V0-11.25 learning materials, we can guarantee a high pass rate compared with peers, which is also proved by practice. Our good reputation is your motivation to choose our learning materials. We guarantee that if you under the guidance of our 2V0-11.25 learning materials step by step you will pass the exam without a doubt and get a certificate. Our learning materials are carefully compiled over many years of practical effort and are adaptable to the needs of the exam. We firmly believe that you cannot be an exception. Choosing our 2V0-11.25 Study Material actually means that you will have more opportunities to be promoted in the near future.

## Latest 2V0-11.25 Exam Torrent Must Be a Great Beginning to Prepare for Your Exam - TorrentExam

Facing the incoming VMware 2V0-11.25 Exam, you may feel stained and anxious, suspicious whether you could pass the exam smoothly and successfully. Actually, you must not impoverish your ambition. Our suggestions are never boggle at difficulties. It is your right time to make your mark. Preparation of exam without effective materials is just like a soldier without gun.

## VMware Cloud Foundation 5.2 Administrator Sample Questions (Q68-Q73):

### NEW QUESTION # 68

A single VM is unable to communicate with other VMs on the same network. An administrator needs to identify and resolve the network connectivity issue.

What three steps should the administrator follow? (Choose three.)

- A. Ensure that the Port Group name(s) associated with the VMs network adapter exists in the vSwitch or VDS and is spelled correctly.
- B. Verify that the networking within the VMs guest OS is correct.
- C. Use the ESXi command line to check the status of the VM Kernel adapter.
- D. Verify that the virtual network adapter is present and connected.
- E. Restart the VM to reset its network connections.

**Answer: A,B,D**

Explanation:

Ensuring the guest OS network configuration (IP, subnet mask, gateway) is correct rules out misconfiguration within the VM.

Confirming the virtual NIC is present and connected verifies the VM's link to the virtual switch.

Checking that the port group name exists and is correct ensures the VM is attached to the intended network segment.

### NEW QUESTION # 69

An organization requires a private cloud with robust availability and disaster recovery capabilities.

Which three VMware Cloud Foundation components should be considered for integration to meet these requirements? (Choose three.)

- A. NSX for secure and isolated networking.
- B. vSAN for hyper-converged storage and downtime avoidance.
- C. vSphere Replication for VM-level data replication.
- D. VMware Live Site Recovery (VLSR) for orchestrated disaster recovery.
- E. Aria Operations for Logs for enhanced logging and monitoring.

**Answer: A,C,D**

Explanation:

NSX provides network virtualization, offering secure, isolated networking that is crucial for ensuring robust availability and disaster recovery. It supports micro-segmentation and advanced network management features.

VMware Live Site Recovery (VLSR) provides orchestrated disaster recovery capabilities, enabling the organization to efficiently recover workloads and applications in case of a disaster.

vSphere Replication enables VM-level data replication, allowing for recovery and continuity of business operations by ensuring data is replicated across sites for high availability and disaster recovery.

### NEW QUESTION # 70

What three steps are required to commission a new host into the SDDC Manager inventory? (Choose three.)

- A. Self-signed certificate regenerated based on FQDN of host.
- B. Four NIC ports with a minimum 10 Gbps speed.
- C. Delete all disk partitions on HDD/SSD.
- D. Update the DNS records and add the host directly to the SDDC Manager appliance using the root credentials.
- E. A supported version of ESXi installed on the host.
- F. Manually import the host into the vCenter Server inventory and assign it to a cluster.

**Answer: A,C,E**

Explanation:

As documented in the official VMware Cloud Foundation Administration Guide for Host Commissioning:

A). Self-signed certificate regenerated based on FQDN of host.Exact Extract:

"During the commissioning process, SDDC Manager regenerates a self-signed certificate for the host based on its FQDN to ensure secure communications and integration with the management domain." C). Delete all disk partitions on HDD/SSD.Exact Extract:

"Before commissioning, all partitions must be deleted from the host's disks to allow SDDC Manager to claim storage for vSAN or other use. Failure to remove partitions can cause the commissioning workflow to fail." F). A supported version of ESXi installed on the host.Exact Extract:

"The host must be installed with a version of ESXi that is supported by the current release of VMware Cloud Foundation.

Unsupported versions will cause the commissioning operation to fail." Why Not the Other Options?

B:While having multiple 10Gbps NICs is recommended, it is not a strict commissioning requirement for all host profiles.

D:Updating DNS is necessary, but the step of "adding the host directly to SDDC Manager using root credentials" is incomplete, as SDDC Manager itself performs the addition and validation steps.

E:Manually adding hosts to vCenter is not permitted; SDDC Manager must orchestrate the entire host onboarding process.

Summary:

The three required steps to commission a new host into the SDDC Manager inventory are:

A). Regenerate the self-signed certificate based on the FQDN,

C). Delete all disk partitions on HDD/SSD,

F). Ensure a supported version of ESXi is installed.

These steps are explicitly outlined in the VMware Cloud Foundation host commissioning documentation.

## NEW QUESTION # 71

When commissioning new hosts in VMware Cloud Foundation, which three parameters must be provided? (Choose three.)

- A. ESXi Version
- B. SSO Domain Name
- C. Storage Type
- D. Hardware Type
- E. Network Pool Name
- F. Username

**Answer: B,C,F**

Explanation:

Storage Type: The storage type needs to be specified during the commissioning of new hosts in VMware Cloud Foundation, as it is important for the configuration of storage resources for the hosts.

SSO Domain Name: The Single Sign-On (SSO) domain is an essential parameter to associate the hosts with the existing authentication domain.

Username: The administrator needs to provide a username with appropriate permissions to configure the hosts during the commissioning process.

## NEW QUESTION # 72

An organization has experienced performance issues and requires a detailed analysis of infrastructure performance, capacity, utilization, and compliance using VMware Aria components.

What three steps should be followed to generate and analyze these reports? (Choose three.)

- A. Use Aria Operations for Logs to correlate log data with performance
- B. Run predefined reports on capacity and utilization
- C. Access Aria Operations and navigate to the Reports section
- D. Create custom dashboards to monitor performance metrics
- E. Export the reports for further analysis and compliance verification

**Answer: A,B,D**

Explanation:

Creating custom dashboards in Aria Operations allows administrators to visualize and monitor performance metrics specific to the organization's needs, making it easier to analyze the infrastructure.

Using Aria Operations for Logs helps correlate log data with performance issues, enabling a deeper analysis and understanding of the root causes of performance problems.

Running predefined reports on capacity and utilization provides valuable insights into how resources are being consumed, helping

identify areas that need optimization or adjustment.

## NEW QUESTION # 73

.....

We provide you the free download and tryout of our 2V0-11.25 study tool before your purchase our product and we provide the demo of the product to let the client know our product fully. We provide free update to the client within one year and after one year the client can enjoy 50% discount. If clients are old client, they can enjoy some certain discount. Our experts update the VMware Cloud Foundation 5.2 Administrator guide torrent each day and provide the latest update to the client. We provide discounts to the client and make them spend less money. If you are the old client you can enjoy the special discounts thus you can save money. So it is very worthy for you to buy our 2V0-11.25 Test Torrent.
