答案: C,D,E

問題 #28

Which module do you enable and configure if you want to develop plans and forecasts with driver-based or based income statement, balance sheet, and cash flow planning, or revenue and expenses?

- A. Projects
- B. Financials
- C. Capital
- D. Strategic Workforce

答案: B

問題 #29

In Financials, you can leverage out-of-the-box calculations to aggregate and prepare actual, plan, and forecast data. Which calculation rule would you run to update reports or analyze data at various levels of the business hierarchy?

- A. Rollup
- B. Prepare Forecast
- C. Calculate Actuals
- D. Prepare Plans

答案: A

問題 #30

Which dimension must members be imported into to configure Additional Earnings in the Benefits and Taxes wizard?

- A. Pay Type
- B. Property
- C. Account
- D. Component

答案: D

解題說明:

In Oracle Planning 2024 Implementation, the Benefits and Taxes Wizard is used to configure employee- related financial components, such as additional earnings, benefits, and taxes, within the Workforce module.

To configure Additional Earnings specifically, members must be imported into the Component dimension.

This dimension is designed to categorize and manage various types of earnings, benefits, and taxes that apply to employees.

The Component dimension acts as a foundational structure in the Workforce module, allowing administrators to define and import

members (e.g., "Bonus," "Overtime," or other additional earnings types) that can then be associated with employees via the wizard. The wizard uses these members to calculate and allocate costs accurately across the workforce plan.

* B. Account: While the Account dimension is critical for financial reporting and calculations, it is not the dimension where Additional Earnings members are imported in the Benefits and Taxes Wizard.

Accounts are typically used to map earnings to financial statements, not to define the earnings types themselves.

* C. Property: The Property dimension is used for employee or job attributes (e.g., location, department), not for configuring earnings types in the wizard.

* D. Pay Type: Although Pay Type is related to salary and wage classifications, it is not the dimension used for importing Additional Earnings members in the Benefits and Taxes Wizard. Pay Type is more about categorizing base pay structures rather than additional earnings components.

References

* Oracle Enterprise Performance Management Cloud Documentation: "Administering Workforce - Benefits and Taxes Wizard" (docs.oracle.com, updated 2024). Specifies that "members for additional earnings must be imported into the Component dimension" for configuration in the wizard.

* Oracle Planning 2024 Implementation Study Guide: Highlights the Component dimension as the target for importing earnings-related members in Workforce configuration.
