Latest 1z0-1057-25 Demo & 1z0-1057-25 Pdf Demo Download

The client can try out and download our 1z0-1057-25 training materials freely before their purchase so as to have an understanding of our product and then decide whether to buy them or not. The website pages of our product provide the details of our 1z0-1057-25 learning questions. You can see the demos which are part of the all titles selected from the test bank and the forms of the questions and answers and know the form of our software on the website pages of our 1z0-1057-25 study materials.

Oracle Project Management Cloud 2025 Implementation Professional Sample Questions (Q78-Q83):

NEW QUESTION # 78

Your company uses an accounting calendar with periods that are identical to calendar months. A contract resource has been identified to work for six months on an accounting close cycle project. The resource is planned to start with 10 days left in the first period and to end 20 days into the last period. For the remaining periods, the resource must be loaded on all working days of the month. You are required to distribute the budget, forecast, and planning amounts across periods based on the task duration.

Which predefined spread curve must be used to meet this requirement? (Choose the best answer.)

- A. S-Curve
- **B. Daily Spread Basis**
- C. Back Loaded
- D. Bell Curve
- E. Even

Answer: B

Explanation:

Ref: <https://docs.oracle.com/en/cloud/saas/project-portfolio-management/19a/oapfm/project-control-configuration-manage-spread-curves.html#OAPFM79760> Predefined Spread Curves Name Description Dist. Factors Even Linear distribution of financial or project plan values across periods.

10-10-10-10-10-10-10-10-10-10

Prorated Even

Linear distribution of financial or project plan values across periods, with an exception of the first period and last period in the financial plan. Financial or project plan values for the first period and last period are prorated based on the number of days in the period.

10-10-10-10-10-10-10-10-10-10

Back Loaded

Back-loaded distribution of financial or project plan values across periods. Assigned amounts increase over succeeding periods.

0-5-10-15-20-25-30-35-40-45

Front Loaded

Front-loaded distribution of financial or project plan values across periods. Assigned amounts decrease over succeeding periods.

45-40-35-30-25-20-15-10-5-0

S Curve

S-shaped distribution of financial or project plan values across periods.

18-10-8-10-15-17-18-17-15-8

Bell Curve

Bell-shaped distribution of financial or project plan values across periods. Assignment of plan values is highest in the middle periods.

0-4-10-12-14-12-10-4-0-0

Daily Spread Analysis

Spread is based upon the number of days in each financial period throughout the duration of the task assignment. Amounts are proportionally distributed throughout all periods for the duration of the task assignment None

NEW QUESTION # 79

Which two statements are true about a project in "Draft" status? (Choose two.)

- **A. Team members cannot see the tasks from draft projects on the Team Member Dashboard or in the My Work area.**
- **B. Project managers can view draft projects on the Project Manager Dashboard and use the projects for requirements planning.**
- C. Team members can see the tasks from draft projects on the Team Member Dashboard or in the My Work area.
- D. Project managers can neither view draft projects on the Project Manager Dashboard nor use the projects for requirements planning.

Answer: A,B

Explanation:

Reference https://docs.oracle.com/cloud/latest/projectcs_gs/OAPEM/OAPEM1122096.htm The following table lists the project statuses and what you can do with projects in that status.

Project Status

What you can do?

Draft

* Project managers can view draft projects in the Project Manager Dashboard and use the projects for requirements planning.

* Team members can't see the tasks from draft projects on the Team Member Dashboard or in the My Work area.

Active

* Project managers can view active projects in the Project Manager Dashboard and use the projects for requirements planning, project execution, and reporting.

* Team members can view task assignments on active projects on the Team Member Dashboard and My Work area.

Pending Close

* Project managers can view pending projects in the Project Manager Dashboard and use the projects for project tracking, and reporting.

* Team members can view task assignments on pending projects on the Team Member Dashboard and My Work area.

Submitted

* Project managers can view submitted projects in the Project Manager Dashboard and use the projects for project tracking, and reporting.

* Team members can view task assignments on submitted projects on the Team Member Dashboard and My Work area Closed

* Project managers can't view closed projects in the Project Manager Dashboard or use the projects for requirements planning, project execution, and reporting.

* Team members can't view tasks of closed projects on the Team Member Dashboard or in the My Work area.

NEW QUESTION # 80

Identify the attribute of a project type that determines if expenditure items are billable, and the amount type to be used as the basis for transfer pricing. (Choose the best answer.)

- A. event type
- B. cost type
- C. expenditure type
- D. work type

Answer: D

Explanation:

Reference https://docs.oracle.com/cloud/latest/projectcs_gs/OAPFM/OAPFM1125361.htm#OAPFM1125277 (what's a work type?) In billing, you can use work types to classify work for the following purposes:

* To determine the default billable status of expenditure items.

* To classify cross-charge amounts into cost and revenue for cross-charge transactions.

Tip: To use work types to determine whether an expenditure item is billable you must set the profile option Work Type Derived for Expenditure Item to Yes.

When you create or import expenditure items, the default work type is inherited from the associated task.

Tasks, in turn, inherit work type values from parent tasks and ultimately from the project. Project types determine the default work type value for projects and project templates.

NEW QUESTION # 81

You have projects and tasks defined with transaction controls, which does not allow certain types of charges to the project. Your business needs to create invoices in AP with this project every period and hence would like to make the process easier by creating a distribution set. As you create the distribution set, you notice that these distribution set lines are not validated against the project transaction controls and you are allowed to save it without any validation errors. Identify the reason why the project transaction controls are not applied. (Choose the best answer.)

- A. There is no expenditure item date information available on the distribution set line.
- B. The account code combination is not available on the distribution set line.
- C. There is no expenditure organization information available on the distribution set line.
- D. There is no expenditure type information available on the distribution set line.

Answer: A

Explanation:

Ref: <https://docs.oracle.com/en/cloud/saas/project-portfolio-management/18c/oapfm/project-costing-configuration-define-project-costing-integrations.html#OAPFM174886> How can I validate distribution sets for projects information?

Oracle Fusion Projects performs validations on Oracle Fusion Payables distribution sets for payables invoices at the time you create the actual distribution set lines. It validates the project and task number during the invoice validation.

Distribution sets are typically used on recurring transactions, and the associated project does not have transaction controls. When you create a distribution set in Oracle Fusion Payables, the distribution set line is not validated against the project transaction controls in Oracle Fusion Projects because you do not enter an expenditure item date, which is required for transaction control validation. The expenditure item date is not provided because you use the distribution sets for an indefinite period of time.

NEW QUESTION # 82

Your client is involved in automation control systems installation. Over the years, they have analyzed their total project spend on specific resource classes. They have identified that their cost spread distribution factor on a 10 spread point scale resembles: 0-4-10-11-14-13-10-4-0-0. Identify two ways to handle this kind of a spread on their budgets and forecasts. (Choose two)

- A. Use the predefined Bell Curve spread with small deviations on the spread points.
- **B. Create a new spread curve or edit an existing spread curve to exactly match the spread points and attach to a project template.**
- C. Use the predefined S-Curve spread with small deviations on the spread points.
- **D. Create a new spread curve or edit an existing spread curve to exactly match the spread points and attach to the resource class.**

Answer: B,D

Explanation:

To handle a custom spread on budgets and forecasts, you can either create a new spread curve or edit an existing one to match the desired spread points. Then, you can attach the spread curve to a project template or a resource class, depending on whether you want to apply it to all projects using that template or all transactions using that resource class.
