P.S. Free & New H35-211_V2.5 dumps are available on Google Drive shared by DumpsValid: <https://drive.google.com/open?id=1E8rxBjezGZAXJOsPw5MXr-PXTMaZS1P>

The client only needs 20-30 hours to learn our H35-211_V2.5 learning questions and then they can attend the exam. Most people may devote their main energy and time to their jobs, learning or other important things and can't spare much time to prepare for the H35-211_V2.5 Exam. But if clients buy our H35-211_V2.5 training materials they can not only do their jobs or learning well but also pass the H35-211_V2.5 exam smoothly and easily because they only need to spare little time to learn and prepare for the exam.

The Huawei PDF Questions format designed by the DumpsValid will facilitate its consumers. Its portability helps you carry on with the study anywhere because it functions on all smart devices. You can also make notes or print out the Huawei H35-211_V2.5 pdf questions. The simple, systematic, and user-friendly Interface of the Huawei H35-211_V2.5 Pdf Dumps format will make your preparation convenient. The DumpsValid is on a mission to support its users by providing all the related and updated Huawei H35-211_V2.5 exam questions to enable them to hold the Huawei H35-211_V2.5 certificate with prestige and distinction.

Reliable H35-211_V2.5 Exam Pattern - H35-211_V2.5 Free Learning Cram

It is all due to the top features of HCIP-Access V2.5 H35-211_V2.5 exam dumps. These features are three HCIP-Access V2.5 exam questions formats, free exam dumps download facility, three months updated Salesforce H35-211_V2.5 exam dumps download facility, affordable price and 100 exams passing money back guarantee. All these HCIP-Access V2.5 dumps features are designed to assist you in HCIP-Access V2.5 H35-211_V2.5 Exam Preparation and enable you to pass the exam with flying colors.

Huawei HCIP-Access V2.5 Sample Questions (Q47-Q52):

NEW QUESTION # 47

In a campus project, XGS-PON is used; ONUs backhaul APs via a 1:16 splitter, but only 12 APs are actually connected per splitter. What is the downstream concurrent bandwidth per AP (Mbit/s)?

- A. About 300
- B. About 400
- C. About 800
- D. About 600

Answer: C

Explanation:

XGS-PON downstream line rate is ~10 Gbit/s. When 12 terminals share a PON tree concurrently, the rough per-terminal share is $10,000 \text{ Mbit/s} \div 12 \approx 833 \text{ Mbit/s}$, commonly expressed as "about 800 Mbit/s." This aligns with planning examples in HCIP-Access where downstream concurrency on XGS-PON is calculated by dividing the port rate by the number of active ONUs/APs on the splitter.

References: HCIP-Access V2.5 Study Guide - PON Rate & Capacity Planning (XGS-PON 10G), Campus PON Design Examples - concurrency estimation.

NEW QUESTION # 48

On the U2000 network management, the oLT PON port LED is not green, indicating that the PON port is faulty.

- A. wrong
- B. Right

Answer: A

NEW QUESTION # 49

(Single-choice) An IPTV user reflects that the TV cannot be watched, open the debug switch on the OLT side, and the debug printing information is as follows: huawei(config).

This can be judged by the results of the query

- A. The user does not have permission to watch the show
- B. User bandwidth validation failed
- C. The poN port multicast bandwidth is insufficient
- D. IGMP Sakamoto Fussel

Answer: B

NEW QUESTION # 50

(Multiple choice) Which of the following measures can be adopted by GPON in terms of traffic control?

- A. T-CONT-CAR
- B. GEM mapping
- C. GEM-CAR
- D. Flow-CAR

Answer: A,C,D

Explanation:

GPON traffic policing/shaping is commonly applied at multiple layers:
T-CONT rate control (T-CONT-CAR): controls upstream bandwidth per T-CONT.
GEM-port rate control (GEM-CAR): limits per GEM port.
Service flow rate control (Flow-CAR): enforces per-service policies.
GEM mapping is a forwarding association (service#GEM) and not itself a rate-control mechanism.
References: HCIP-Access V2.5 Study Guide (GPON QoS model: T-CONT, GEM, and service flow policing /shaping).

NEW QUESTION # 51

(Radio) The following is not a QoS service model is

- A. Best Effort
- B. IntServ
- C. DiffServ
- D. FIFO service

Answer: D

Explanation:

In Huawei's QoS theory (aligned with IETF), the recognized service models are Best Effort, Integrated Services (IntServ), and Differentiated Services (DiffServ). FIFO is a queuing discipline (scheduling method) rather than a service model. FIFO simply forwards packets in arrival order without classification or guarantees, and while it can be used within Best Effort, it is not itself a service model.

References: HCIP-Access V2.5 Study Guide - QoS Fundamentals; Huawei VRP QoS Configuration Guide - Service Models vs. Queue Scheduling.

NEW QUESTION # 52

.....

As the saying goes, opportunities for those who are prepared. If you have made up your mind to get respect and power, the first step you need to do is to get the H35-211_V2.5 certification, because the certification is a reflection of your ability. If you have the H35-211_V2.5 Certification, it will be easier for you to get respect and power. Our company happened to be designing the H35-211_V2.5 exam question.
