FCP_FAZ_AN-7.6 Practice Test Training Materials - FCP_FAZ_AN-7.6 Test Prep - Prep4King

Our FCP_FAZ_AN-7.6 prep torrent boosts the highest standards of technical accuracy and only use certificated subject matter and experts. We provide the latest and accurate FCP - FortiAnalyzer 7.6 Analyst exam torrent to the client and the questions and the answers we provide are based on the real exam. We can promise to you the passing rate is high and about 98%-100%. Our FCP_FAZ_AN-7.6 test braindumps also boosts high hit rate and can stimulate the exam to let you have a good preparation for the exam. Our FCP_FAZ_AN-7.6 prep torrent boost the timing function and the content is easy to be understood and has been simplified the important information. Our FCP_FAZ_AN-7.6 test braindumps convey more important information with less amount of answers and questions and thus make the learning relaxed and efficient. If you fail in the exam we will refund you immediately. All FCP - FortiAnalyzer 7.6 Analyst exam torrent does a lot of help for you to pass the exam easily and successfully.

Fortinet FCP - FortiAnalyzer 7.6 Analyst Sample Questions (Q58-Q63):

NEW QUESTION # 58

What are two effects of enabling auto-cache in a FortiAnalyzer report? (Choose two.)

- A. The generation time for reports is decreased.
- B. When new logs are received, the hard-cache data is updated automatically.
- C. FortiAnalyzer local cache is used to store generated reports.
- D. The size of newly generated reports is optimized to conserve disk space.

Answer: A,C

Explanation:
Enabling auto-cache in FortiAnalyzer reports is designed to improve the efficiency and speed of report generation by leveraging cached data. Let's analyze each option to determine which effects are correct.
Option A - The Generation Time for Reports is Decreased:
When auto-cache is enabled, FortiAnalyzer can use previously cached data instead of reprocessing all log data from scratch each time a report is generated. This results in faster report generation times, especially for recurring reports that use similar datasets.
Option C - FortiAnalyzer Local Cache is Used to Store Generated Reports:
Auto-cache utilizes FortiAnalyzer's local cache to store data used in reports, reducing the need to retrieve and process logs repeatedly. This cached data can be reused for subsequent report generation, enhancing performance.

NEW QUESTION # 59
(In a FortiAnalyzer Fabric deployment, which three modules from Fabric members are available for analysis on the supervisor? (Choose three answers))

- A. Playbooks
- B. Events
- C. Reports
- D. Indicators
- E. Logs

Answer: B,C,E

Explanation:
Comprehensive and Detailed Explanation From Exact Extract of knowledge of FortiAnalyzer 7.6 Study guide documents:
The study guide explicitly describes what content from Fabric members is visible/usable on the Fabric supervisor:
* Logs: "In the FortiAnalyzer Fabric supervisor, Log View displays logs collected on all FortiAnalyzer Fabric members."
* Reports: "For reports, the FortiAnalyzer Fabric supervisor can fetch and aggregate data from multiple members in the FortiAnalyzer Fabric."
* Events: "Events generated by event handlers on the FortiAnalyzer Fabric members are visible on the supervisor." By contrast, the study guide lists a key limitation that rules out Playbooks as a supervisor capability over members: "You are not able to perform configuration changes or to run automation playbooks from the Fabric supervisor to members." Therefore, the three modules available for analysis on the supervisor are Logs, Events, and Reports (C, D, E).

NEW QUESTION # 60
Which statement describes archive logs on FortiAnalyzer?

- A. Logs a FortiAnalyzer administrator can access in FortiView
- B. Logs previously collected from devices that are offline
- C. Logs compressed and saved in files with the .gz extension
- D. Logs that are indexed and stored in the SQL database

Answer: C

Explanation:
In FortiAnalyzer, archive logs refer to logs that have been compressed and stored to save space. This process involves compressing the raw log files into the .gz format, which is a common compression format used in Fortinet systems for archived data. Archiving is essential in FortiAnalyzer to optimize storage and manage long-term retention of logs without impacting performance.
Let's examine each option for clarity:
* Option A: Logs that are indexed and stored in the SQL database
* This is incorrect. While some logs are indexed and stored in an SQL database for quick access and searchability, these are not

classified as archive logs. Archived logs are typically moved out of the database and compressed.
* Option B: Logs a FortiAnalyzer administrator can access in FortiView
* This is incorrect because FortiView primarily accesses logs that are active and indexed, not archived logs. Archived logs are stored for long-term retention but are not readily available for immediate analysis in FortiView.
* Option C: Logs compressed and saved in files with the .gz extension
* This is correct. Archive logs on FortiAnalyzer are stored in compressed .gz files to reduce space usage. This archived format is used for logs that are no longer immediately needed in the SQL database but are retained for historical or compliance purposes.
* Option D: Logs previously collected from devices that are offline
* This is incorrect. Although archived logs may include data from devices that are no longer online, this is not a defining characteristic of archive logs.
* FortiAnalyzer 7.4.1 documentation and configuration guides outline that archived logs are stored in compressed files with the .gz extension to conserve storage space, ensuring FortiAnalyzer can handle a larger volume of logs over extended periods.

NEW QUESTION # 61
Which statement about sending notifications with incident updates is true?

- A. Notifications can be sent only when an incident is created oi deleted.
- B. You must configure an output profile to send notifications by email.
- C. Each incident can send notification to a single external platform.
- D. Each connector used can have different notification settings

Answer: D

NEW QUESTION # 62
When you move a FortiGate device from one ADOM to a new ADOM, what is the purpose of rebuilding the new ADOM database?

- A. To migrate the archive logs to the new ADOM
- B. To run reports on the device's analytics logs in the new ADOM
- C. To remove the device's analytics logs from the old ADOM
- D. To reset the disk quota enforcement to default

Answer: B
