Free PDF Quiz 2026 Latest 100-160: Reliable Cisco Certified Support Technician (CCST) Cybersecurity Exam Questions

No doubt the Cisco 100-160 certification is a valuable credential that offers countless advantages to 100-160 exam holders. Beginners and experienced professionals can validate their skills and knowledge level with the Cisco Certified Support Technician (CCST) Cybersecurity 100-160 Exam and earn solid proof of their proven skills.

Cisco 100-160 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> • Basic Network Security Concepts: This section of the exam measures the skills of a Network Defender and focuses on understanding network-level protections, including firewalls, VPNs, and intrusion detection and prevention systems, providing insight into how threats are mitigated within network environments.
Topic 2	<ul style="list-style-type: none"> • Essential Security Principles: This section of the exam measures the skills of a Cybersecurity Technician and covers foundational cybersecurity concepts such as the CIA triad (confidentiality, integrity, availability), along with basic threat types and vulnerabilities, laying the conceptual groundwork for understanding how to protect information systems.
Topic 3	<ul style="list-style-type: none"> • Vulnerability Assessment and Risk Management: This section of the exam measures the skills of a Risk Management Analyst and entails identifying and assessing vulnerabilities, understanding risk priorities, and applying mitigation strategies that help manage threats proactively within an organization's systems
Topic 4	<ul style="list-style-type: none"> • Incident Handling: This section of the exam measures the skills of an Incident Responder and centers on recognizing security incidents, responding appropriately, and containing threats—forming the essential foundation of incident response procedures.
Topic 5	<ul style="list-style-type: none"> • Endpoint Security Concepts: This section of the exam measures the skills of an Endpoint Security Specialist and includes securing individual devices, understanding protections such as antivirus, patching, and access control at the endpoint level, essential for maintaining device integrity.

Cisco Certified Support Technician (CCST) Cybersecurity Sample Questions (Q162-Q167):

NEW QUESTION # 162

Which of the following options is an example of a cybersecurity news and subscription service?

- A. SIEM (Security Information and Event Management) system
- B. VPN (Virtual Private Network)
- C. Firewall
- D. Email filtering software

Answer: A

Explanation:

A SIEM system is an example of a cybersecurity news and subscription service. It collects and analyzes security event data from various sources and provides real-time alerts and reports to enhance threat detection and management. It provides valuable insights into the cybersecurity landscape, including news and updates related to security incidents, vulnerabilities, and emerging threats.

NEW QUESTION # 163

Which of the following describes the purpose of a VPN (Virtual Private Network)?

- A. To segment a network into multiple smaller networks
- B. To improve network performance and reduce latency
- C. To provide secure remote access to a private network over the internet
- D. To control and filter network traffic based on predefined policies

Answer: C

Explanation:

A VPN (Virtual Private Network) is a technology that enables secure and encrypted communication over a public network, such as the internet. It allows users to establish a secure connection to a private network from remote locations. By encrypting the communication, a VPN ensures confidentiality and integrity of the data transmitted between the remote user and the private network, making it a suitable solution for secure remote access.

NEW QUESTION # 164

How can cybersecurity reports contribute to incident response procedures?

- A. By suggesting countermeasures.
- B. By identifying potential attack vectors.
- C. By establishing communication channels with law enforcement agencies.
- **D. By providing real-time threat intelligence.**

Answer: D

Explanation:

Cybersecurity reports can contribute to incident response procedures by providing real-time threat intelligence. These reports analyze and share information about emerging threats, attack trends, and new vulnerabilities. By incorporating the findings from these reports into their incident response plans, organizations can stay ahead of attackers and improve their ability to detect, mitigate, and respond to potential incidents effectively.

NEW QUESTION # 165

Which of the following is a common proactive measure for managing vulnerabilities?

- A. Regularly updating antivirus signatures
- B. Performing regular system backups
- C. Implementing data encryption
- **D. Conducting vulnerability assessments**

Answer: D

Explanation:

Conducting vulnerability assessments is a proactive measure for managing vulnerabilities. It involves regularly scanning the system or network for vulnerabilities, identifying weaknesses, and prioritizing remediation efforts. By proactively assessing and identifying vulnerabilities, organizations can take necessary actions to mitigate risks and prevent potential exploitation.

NEW QUESTION # 166

Move each NIST Incident Response Lifecycle phase from the list on the left to the correct description on the right.

Note: You will receive partial credit for each correct answer.

Answer:

Explanation:

NEW QUESTION # 167

.....

The Cisco 100-160 certification exam is one of the top rated career advancement certification exams in the market. This Cisco Certified Support Technician (CCST) Cybersecurity (100-160) exam is designed to prove candidates' skills and knowledge levels. By doing this the Cisco 100-160 certificate holders can gain multiple personal and professional benefits. These benefits assist the 100-160 Exam holder to pursue a rewarding career in the highly competitive market and achieve their career objectives in a short time period.
