

OGEA-101認證考試 - OGEA-101考題寶典

P.S. KaoGuTi在Google Drive上分享了免費的2026 The Open Group OGEA-101考試題庫：<https://drive.google.com/open?id=1gOgtsH01NNXaAy2qJ75J0nP-DqtxXpzB>

在KaoGuTi網站上你可以免費下載我們提供的關於The Open Group OGEA-101認證考試的部分考題及答案測驗我們的可靠性。KaoGuTi提供的產品是可以100%把你推上成功，那麼IT行業的巔峰離你又近了一步。

隨著21世紀資訊時代的洪流到來，人們不斷提高自己的知識來適應這個時代，但遠遠不夠，就IT行業來說，The Open Group的OGEA-101考試認證是IT行業必不可少的認證，想要通過這項考試培訓是必須的，因為這項考試是有所困難的，通過了它，就可以受到國際的認可及接受，你將有一個美好的前程及拿著受人矚目的高薪，KaoGuTi網站有全世界最可靠的IT認證培訓資料，有了它你就可以實現你美好的計畫，我們保證你100%通過認證，參加The Open Group的OGEA-101考試認證的考生們，你們還在猶豫什麼呢，趕緊行動吧！

>> OGEA-101認證考試 <<

OGEA-101考題寶典 & OGEA-101學習指南

在這裏我要說明的是這KaoGuTi一個有核心價值的問題，所有The Open Group的OGEA-101考試都是非常重要的，但在個資訊化快速發展的時代，KaoGuTi只是其中一個，為什麼大多數人選擇KaoGuTi，是因為KaoGuTi所提供的考題資料一定能幫助你通過測試，為什麼呢，因為它提供的資料都是最新的培訓工具不斷更新，不斷變換的認證考試目標，為你提供最新的考試認證研究資料，有了KaoGuTi The Open Group的OGEA-101，你看到考試將會信心百倍，不用擔心任何考不過的風險，讓你毫不費力的獲得認證。

The Open Group OGEA-101 考試大綱：

主題	簡介
主題 1	<ul style="list-style-type: none">Architecture Content Framework: Candidates learn about the TOGAF content metamodel and architecture artifacts. This topic of the OGEA-101 exam measures their understanding of content organization and documentation.
主題 2	<ul style="list-style-type: none">Fundamental Concepts of Enterprise Architecture: This topic covers the definition, purpose, and benefits of enterprise architecture, emphasizing its role in aligning business objectives with IT strategies. It measures the understanding of TOGAF practitioners about foundational principles essential for effective enterprise architecture practice, crucial for passing the OGEA-101 exam.
主題 3	<ul style="list-style-type: none">Business Architecture: This topic of The Open Group OGEA-101 exam emphasizes the development of business architecture, including baseline and target architectures. It measures the understanding of TOGAF practitioners about business capabilities and processes.
主題 4	<ul style="list-style-type: none">Architecture Change Management: Focusing on managing architecture changes, this topic of the TOGAF Enterprise Architecture Part 1 exam assesses skills of practitioners in handling change requests and maintaining architecture repositories.

主題 5

- Implementation Governance: This topic of The Open Group OGEA-101 exam emphasizes the governance framework for architecture implementation, including compliance processes. It measures the understanding of TOGAF practitioners about governance principles, a key competency for the OGEA-101 exam.

最新的 Enterprise Architecture OGEA-101 免費考試真題 (Q140-Q145):

問題 #140

Refer to the table below:

Phase	Output & Outcome	Essential Knowledge
k ?	Sufficient documentation to get permission to proceed. Permission to proceed to develop a Target Architecture to prove out a summary target.	The scope of the problem being addressed. Those who have interests that are fundamental to the problem being addressed. (Stakeholders & Concerns) What summary answer to the problem is acceptable to the stakeholders? Stakeholder priority and preference. What value does the summary answer provide?

Which ADM Phase does this describe?

- A. Phase B
- B. Phase C
- C. Phase A
- D. Preliminary Phase

答案: A

解題說明:

Phase B of the ADM cycle is the Business Architecture phase. It describes the development of a Business Architecture to support an agreed Architecture Vision. The objectives of this phase are to describe the baseline and target Business Architecture, identify candidate Architecture Roadmap components based on gaps between the baseline and target, and determine whether an incremental approach is required. Reference: The TOGAF Standard | The Open Group Website, Section 3.2.2 Phase B: Business Architecture.

問題 #141

Which of the following statements about architecture partitioning are correct*?

- 1 Partitions are used to simplify the management of the Enterprise Architecture
- 2 Partitions are equivalent to architecture levels
- 3 Partitions enable different teams to work on different element of the architecture at the same time.
- 4 Partitions reflect the organization's structure

- A. 1 & 3
- B. 2 & 3
- C. 2 & 4
- D. 1 & 4

答案: A

解題說明:

Statements 1 and 3 about architecture partitioning are correct. Architecture partitioning is the technique of dividing an architecture into smaller and more manageable parts that can be developed, maintained, and governed independently. Partitions are used to simplify the management of the Enterprise Architecture and to enable different teams to work on different elements of the architecture at the same time. Partitions are not equivalent to architecture levels, which are different degrees of abstraction or detail in an architecture. Partitions do not necessarily reflect the organization's structure, which may change over time or differ from the architecture's scope and boundaries. Reference: The TOGAF Standard | The Open Group Website, Section 2.5 Architecture Partitioning

問題 #142

Which of the following describes how the Enterprise Continuum is used when developing an enterprise architecture?

- A. To coordinate with the other management frameworks in use
- B. To identify and understand business requirements
- C. To classify architecture and solution assets
- D. To describe how an architecture addresses stakeholder concerns

答案： C

解題說明：

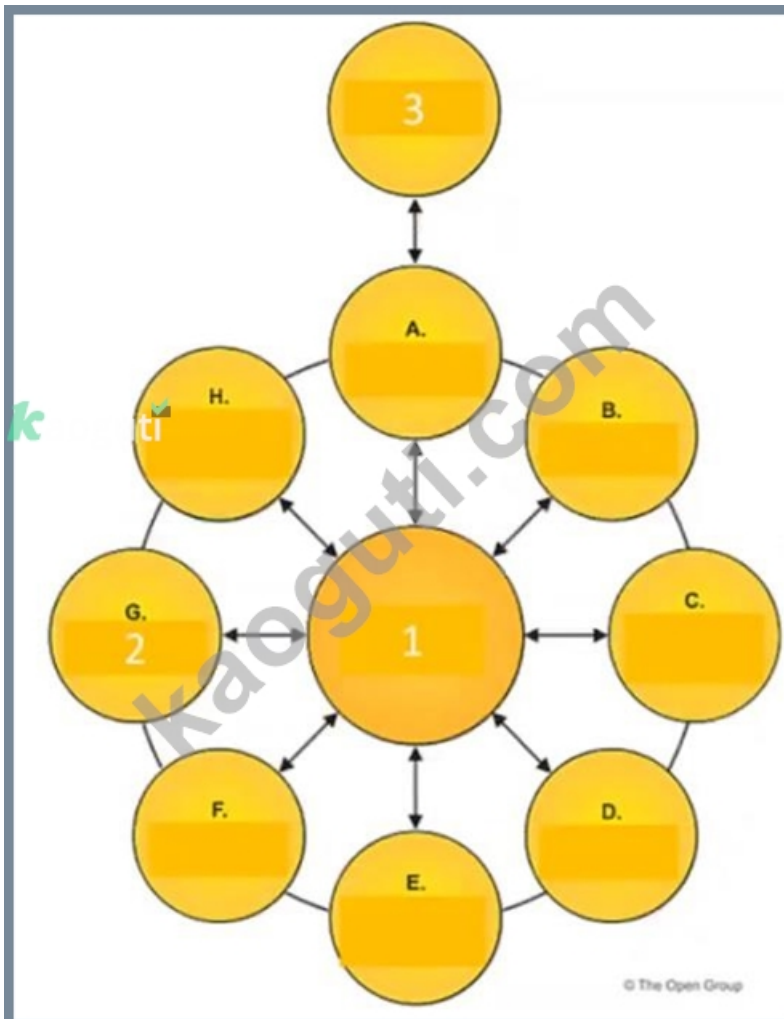

The Enterprise Continuum consists of two complementary concepts: the Architecture Continuum and the Solutions Continuum¹. The Architecture Continuum provides a consistent way to describe and understand the generic and reusable architecture building blocks, such as models, patterns, and standards, that can be applied and tailored to specific situations². The Solutions Continuum provides a consistent way to describe and understand the specific and implemented solution building blocks, such as products, services, and components, that realize the architecture building blocks³. The Enterprise Continuum enables the reuse and integration of architecture and solution assets across different levels of abstraction, scope, and detail, ranging from foundation architectures to organization-specific architectures¹.

The Enterprise Continuum is used when developing an enterprise architecture to support the following activities¹:

- * Selecting relevant architecture and solution assets from the Architecture Repository or other sources, based on the business drivers, goals, and requirements
- * Adapting and customizing the architecture and solution assets to suit the specific needs and context of the enterprise
- * Defining and developing the target architecture and the architecture roadmap, based on the gaps and opportunities identified between the baseline and the target states
- * Defining and developing the implementation and migration plan, based on the architecture roadmap and the solution building blocks
- * Governing and managing the architecture and solution assets throughout the architecture lifecycle, ensuring their quality, consistency, and compliance

問題 #143

Exhibit

Consider the illustration showing an architecture development cycle Which description matches the phase of the ADM labeled as

item 2?

- A. Provides architectural oversight for the implementation
- B. Operates the process of managing architecture requirements
- C. Establishes procedures for managing change to the new architecture
- D. Conducts implementation planning for the architecture defined in previous phases

答案： A

解題說明：

Based on the illustration, the phase of the ADM labeled as item 2 is the Implementation Governance phase. This phase provides architectural oversight for the implementation. It ensures that the implementation project conforms to the architecture. It also provides a framework for monitoring and managing the implementation.

The Implementation Governance phase involves the following activities:

- * Finalizing the Architecture Roadmap and the supporting Implementation and Migration Plan
- * Assigning an Architecture Board to oversee the implementation
- * Establishing Architecture Contracts with the implementation partners
- * Reviewing and approving the implementation project plans and deliverables
- * Performing Architecture Compliance reviews to ensure alignment with the architecture
- * Performing Architecture Audit reviews to ensure quality and performance of the architecture
- * Resolving any architecture issues or change requests that arise during the implementation
- * Maintaining the architecture lifecycle and ensuring its continuity

The Implementation Governance phase is essential for ensuring that the architecture is realized as intended and that it delivers the expected business value and outcomes.

問題 #144

Complete the sentence. Architecture effort at the Logical abstraction level is about:

- A. Managing the allocation and implementation of physical components to meet the identified logical components
- B. Decomposing the requirements to understand the problem, and what is needed to address the problem, without unduly focusing on how the architecture will be realized
- C. Identifying the kinds of business, data, application, and technology components needed to achieve the services identified in the conceptual level
- D. Understanding the environment in which an enterprise operates and the context in which architecture work is planned and executed

答案： C

解題說明：

(Authoritative Open Group guidance distinguishes conceptual, logical, and physical concerns; at the logical level, component types are identified independently of implementation.) For example, the Open Group's metamodel guidance emphasizes technology-agnostic structure to ensure consistency within an architecture description, which is precisely what the logical level captures before physical realization.

"The Content Metamodel defines a formal structure... to ensure consistency within the architecture description and also to provide guidance for organizations that wish to implement their architecture within an architecture tool." Open Group Publications Reference: The Open Group, TOGAF 9 Conformance Requirements (Content Framework overview); Open Group Whitepaper TOGAF 9 Conformance Requirements-Content Metamodel description.

Note: TOGAF Series Guides (member library) explicitly define the four abstraction levels; the logical level focuses on the "what (structure) independent of technology." The cited Content Metamodel text underpins this by mandating technology-agnostic structure for consistency.

問題 #145

.....

KaoGuTi作為專門提供OGEA-101認證考試相關資料的提供者，一直以來都把為考生們提供最優秀的資料作為自己的目標。與其他網站相比，KaoGuTi更得大家的信任。這是為什麼呢？因為KaoGuTi有著多年的經驗，並且一直專心致力於OGEA-101認證考試的研究，總結出了很多關於考試的規律。這樣，KaoGuTi的資料就可以有很高的命中率。這也保證了大家的考試的合格率。所以KaoGuTi得到了大家的信任。
