

FCSS_EFW_AD-7.6 Reliable Exam Bootcamp, FCSS_EFW_AD-7.6 New Question

BONUS!!! Download part of TorrentValid FCSS_EFW_AD-7.6 dumps for free: https://drive.google.com/open?id=1mLXMvwZ-527hIJBytPkw9RS48Z8gH_js

In today's competitive industry, only the brightest and most qualified candidates are hired for high-paying positions. Obtaining FCSS_EFW_AD-7.6 is a wonderful approach to be successful because it can draw in prospects and convince companies that you are the finest in your field. Pass the FCSS_EFW_AD-7.6 Exam to establish your expertise in your field and receive certification. However, passing the FCSS - Enterprise Firewall 7.6 Administrator FCSS_EFW_AD-7.6 exam is challenging.

Our FCSS_EFW_AD-7.6 preparation quiz are able to aid you enhance work capability in a short time. In no time, you will surpass other colleagues and gain more opportunities to promote. Believe it or not, our FCSS_EFW_AD-7.6 study materials are powerful and useful, which can solve all your pressures about reviewing the FCSS_EFW_AD-7.6 Exam. You can try our free demo of our FCSS_EFW_AD-7.6 practice engine before buying. The demos are free and part of the exam questions and answers.

Fortinet FCSS_EFW_AD-7.6 New Question, Exam FCSS_EFW_AD-7.6 Guide Materials

It is impossible to overstate the significance of valid FCSS_EFW_AD-7.6 exam questions. The latest and actual FCSS_EFW_AD-7.6 exam questions are essential to clear the FCSS_EFW_AD-7.6 exam in one go. Applicants are better prepared to succeed when they prepare with the updated Fortinet FCSS_EFW_AD-7.6 Questions. These FCSS_EFW_AD-7.6 exam questions give applicants the knowledge they need to quickly ace the FCSS_EFW_AD-7.6 examination.

Fortinet FCSS_EFW_AD-7.6 Exam Syllabus Topics:

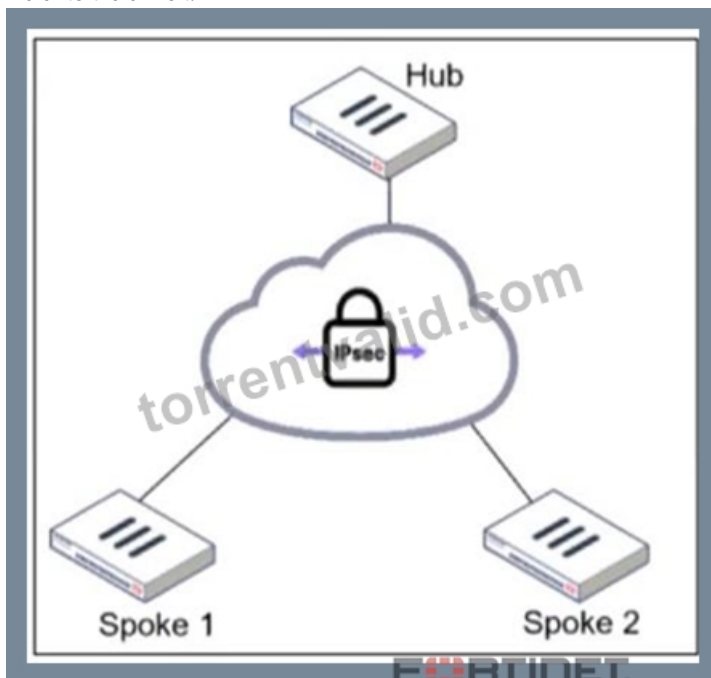

Topic	Details
Topic 1	<ul style="list-style-type: none">Central Management: This section of the exam measures the skills of a Security Operations Manager and covers the implementation of centralized management systems for coordinated control and oversight of distributed Fortinet security infrastructures across enterprise environments.
Topic 2	<ul style="list-style-type: none">Routing: This section of the exam measures the skills of a Network Infrastructure Engineer and covers the implementation of dynamic routing protocols for enterprise network traffic management. It includes configuring both OSPF and BGP routing protocols to ensure efficient and reliable data transmission across complex organizational networks.

Topic 3	<ul style="list-style-type: none"> • Security Profiles: This section of the exam measures the skills of a Threat Prevention Specialist and covers the configuration and management of comprehensive security profiling systems. It includes implementing SSL • SSH inspection, combining web filtering and application control mechanisms, integrating intrusion prevention systems, and utilizing the Internet Service Database to create layered security protections for organizational networks.
Topic 4	<ul style="list-style-type: none"> • VPN: This section of the exam measures the skills of a VPN Solutions Engineer and covers the implementation of various virtual private network technologies. It includes configuring IPsec VPN using IKE version 2 protocols and implementing Automatic Discovery VPN solutions to establish on-demand secure tunnels between multiple sites within an enterprise network infrastructure.
Topic 5	<ul style="list-style-type: none"> • System Configuration: This section of the exam measures the skills of a Network Security Architect and covers the implementation and integration of core Fortinet infrastructure components. It includes deploying the Security Fabric, enabling hardware acceleration, configuring high availability operational modes, and designing enterprise networks utilizing VLANs and VDOM technologies to meet specific organizational requirements.

Fortinet FCSS - Enterprise Firewall 7.6 Administrator Sample Questions (Q19-Q24):

NEW QUESTION # 19

Refer to the exhibit.

An administrator is deploying a hub and spokes network and using OSPF as dynamic protocol. Which configuration is mandatory for neighbor adjacency?

- A. Set bfd enable in the router configuration
- **B. Set network-type point-to-multipoint in the hub interface**
- C. Set rfc1583-compatible enable in the router configuration
- D. Set virtual-link enable in the hub interface

Answer: B

Explanation:

In a hub-and-spoke topology using OSPF over IPsec VPNs, the point-to-multipoint network type is necessary to establish neighbor adjacencies between the hub and spokes. This network type ensures that OSPF operates correctly without requiring a designated router (DR) and allows dynamic routing updates across the IPsec tunnels.

NEW QUESTION # 20

Refer to the exhibit, which shows a physical topology and a traffic log.

The administrator is checking on FortiAnalyzer traffic from the device with IP address 10.1.10.1, located behind the FortiGate ISFW device.

The firewall policy in on the ISFW device does not have UTM enabled and the administrator is surprised to see a log with the action Malware, as shown in the exhibit.

What are the two reasons FortiAnalyzer would display this log? (Choose two.)

- A. The firewall policy in NGFW-1 has UTM enabled.
- B. Security rating is enabled in ISFW.
- C. ISFW is in a Security Fabric environment.
- D. ISFW is not connected to FortiAnalyzer and must go through NGFW-1.

Answer: A,C

Explanation:

From the exhibit, ISFW is part of a Security Fabric environment with NGFW-1 as the Fabric Root. In this architecture, FortiGate devices share security intelligence, including logs and detected threats.

ISFW is in a Security Fabric environment:

Security Fabric allows devices like ISFW to receive threat intelligence from NGFW-1, even if UTM is not enabled locally.

If NGFW-1 detects malware from IP 10.1.10.1 to 89.238.73.97, this information can be propagated to ISFW and FortiAnalyzer.

The firewall policy in NGFW-1 has UTM enabled:

Even though ISFW does not have UTM enabled, NGFW-1 (which sits between ISFW and the external network) does have UTM enabled and is scanning traffic.

Since NGFW-1 detects malware in the session, it logs the event, which is then sent to FortiAnalyzer.

NEW QUESTION # 21

Why does the ISDB block layers 3 and 4 of the OSI model when applying content filtering? (Choose two.)

- A. The ISDB works in proxy mode, allowing the analysis of packets in layers 3 and 4 of the OSI model.
- B. The ISDB limits access by URL and domain.
- C. FortiGate has a predefined list of all IPs and ports for specific applications downloaded from FortiGuard.
- D. The ISDB blocks the IP addresses and ports of an application predefined by FortiGuard.

Answer: C,D

Explanation:

The Internet Service Database (ISDB) in FortiGate is used to enforce content filtering at Layer 3 (Network Layer) and Layer 4 (Transport Layer) of the OSI model by identifying applications based on their predefined IP addresses and ports.

FortiGate has a predefined list of all IPs and ports for specific applications downloaded from FortiGuard:

FortiGate retrieves and updates a predefined list of IPs and ports for different internet services from FortiGuard.

This allows FortiGate to block specific services at Layer 3 and Layer 4 without requiring deep packet inspection.

The ISDB blocks the IP addresses and ports of an application predefined by FortiGuard:

ISDB works by matching traffic to known IP addresses and ports of categorized services.

When an application or service is blocked, FortiGate prevents communication by denying traffic based on its destination IP and port number.

NEW QUESTION # 22

An administrator applied a block-all IPS profile for client and server targets to secure the server, but the database team reported the application stopped working immediately after.

How can an administrator apply IPS in a way that ensures it does not disrupt existing applications in the network?

- A. Limit the IPS profile to server targets only to avoid blocking connections from the server to clients.
- B. Set the IPS profile signature action to default to discard all possible false positives.
- C. Select flow mode in the IPS profile to accurately analyze application patterns.
- **D. Use an IPS profile with all signatures in monitor mode and verify patterns before blocking.**

Answer: D

Explanation:

Applying an aggressive IPS profile without prior testing can disrupt legitimate applications by incorrectly identifying normal traffic as malicious. To prevent disruptions while still monitoring for threats:

Enable IPS in "Monitor Mode" first:

This allows FortiGate to log and analyze potential threats without actively blocking traffic.

Administrators can review logs and fine-tune IPS signatures to minimize false positives before switching to blocking mode.

Verify and adjust signature patterns:

Some signatures might trigger unnecessary blocks for legitimate application traffic.

By analyzing logs, administrators can disable or modify specific rules causing false positives.

NEW QUESTION # 23

A vulnerability scan report has revealed that a user has generated traffic to the website example.com (10.10.10.10) using a weak SSL/TLS version supported by the HTTPS web server.

What can the firewall administrator do to block all outdated SSL/TLS versions on any HTTPS web server to prevent possible attacks on user traffic?

- **A. Configure the unsupported SSL version and set the minimum allowed SSL version in the HTTPS settings of the SSL/SSH inspection profile.**
- B. Enable auto-detection of outdated SSL/TLS versions in the SSL/SSH inspection profile to block vulnerable websites.
- C. Install the required certificate in the client's browser or use Active Directory policies to block specific websites as defined in the SSL/SSH inspection profile.
- D. Use the latest certificate, Fortinet_SSL_ECDSA256, and replace the CA certificate in the SSL/SSH inspection profile.

Answer: A

NEW QUESTION # 24

.....

Although our company has designed the best and most suitable FCSS_EFW_AD-7.6 learn prep, we also do not stop our step to do research about the FCSS_EFW_AD-7.6 study materials. All experts and professors of our company have been trying their best to persist in innovate and developing the FCSS_EFW_AD-7.6 test training materials all the time in order to provide the best products for all people and keep competitive in the global market. We believe that the FCSS_EFW_AD-7.6 Study Materials will keep the top selling products. We sincerely hope that you can pay more attention to our FCSS_EFW_AD-7.6 study questions.
