The most important thing for preparing the NSE7_LED-7.0 exam is reviewing the essential point. Some students learn all the knowledge of the test. They still fail because they just remember the less important point. In order to service the candidates better, we have issued the NSE7_LED-7.0 test engine for you. Our company has accumulated so much experience about the test. So we can predict the real test precisely. Almost half questions and answers of the real exam occur on our NSE7_LED-7.0 practice material. That means if you study our study guide, your passing rate is much higher than other candidates. Preparing the NSE7_LED-7.0 exam has shortcut. From now, stop learning by yourself and try our test engine. All your efforts will pay off one day.

Pass4Test Fortinet NSE 7 - LAN Edge 7.0 (NSE7_LED-7.0) exam questions are the best because these are so realistic! It feels just like taking a real NSE7_LED-7.0 exam, but without the stress! Our NSE7_LED-7.0 Practice Test software is the answer if you want to score higher on your real Fortinet NSE7_LED-7.0 certification exam and achieve your academic goals.

>> NSE7_LED-7.0 Valid Exam Format <<

100% Free NSE7_LED-7.0 – 100% Free Valid Exam Format | Perfect Certification Fortinet NSE 7 - LAN Edge 7.0 Dump

The Pass4Test NSE7_LED-7.0 exam questions are checked and verified by experienced and qualified Fortinet NSE 7 - LAN Edge 7.0 exam trainers. So you can trust on the validity and top standard of Pass4Test NSE7_LED-7.0 exam practice test questions. With the Pass4Test NSE7_LED-7.0 exam questions you will get everything that you need to prepare and pass the challenging Fortinet NSE7_LED-7.0 Exam with good scores. The Pass4Test NSE7_LED-7.0 exam questions will give you an idea about the final NSE7_LED-7.0 exam format and you will get experience about NSE7_LED-7.0 exam format before the final exam.

Fortinet NSE 7 - LAN Edge 7.0 Sample Questions (Q58-Q63):

NEW QUESTION # 58

Which two statements about the MAC-based 802.1X security mode available on FortiSwitch are true?
(Choose two.)

- A. FortiSwitch can grant different access levels to each device connected to the port
- B. It cannot be used in conjunction with MAC authentication bypass
- C. FortiSwitch authenticates a single device and opens the port to other devices connected to the port
- D. FortiSwitch authenticates each device connected to the port

Answer: A,D

Explanation:

According to the FortiSwitch Administration Guide, "MAC-based 802.1X security mode allows you to authenticate each device connected to a port using its MAC address as the username and password." Therefore, option B is true because it describes the MAC-based 802.1X security mode available on FortiSwitch. Option D is also true because FortiSwitch can grant different access levels to each device connected to the port based on the user group and security policy assigned to them. Option A is false because FortiSwitch does not authenticate a single device and open the port to other devices connected to the port, but rather authenticates each device individually. Option C is false because MAC-based 802.1X security mode can be used in conjunction with MAC authentication bypass (MAB) or EAP pass-through modes, which are fallback options for non-802.1X devices.

NEW QUESTION # 59

What is the purpose of enabling Windows Active Directory Domain Authentication on FortiAuthenticator?

- A. It enables FortiAuthenticator to use Windows administrator credentials to perform an LDAP lookup for a user search
- B. It enables FortiAuthenticator to import users from Windows AD
- C. It enables FortiAuthenticator to use a Windows CA certificate when authenticating RADIUS users
- D. It enables FortiAuthenticator to register itself as a Windows trusted device to proxy authentication using Kerberos

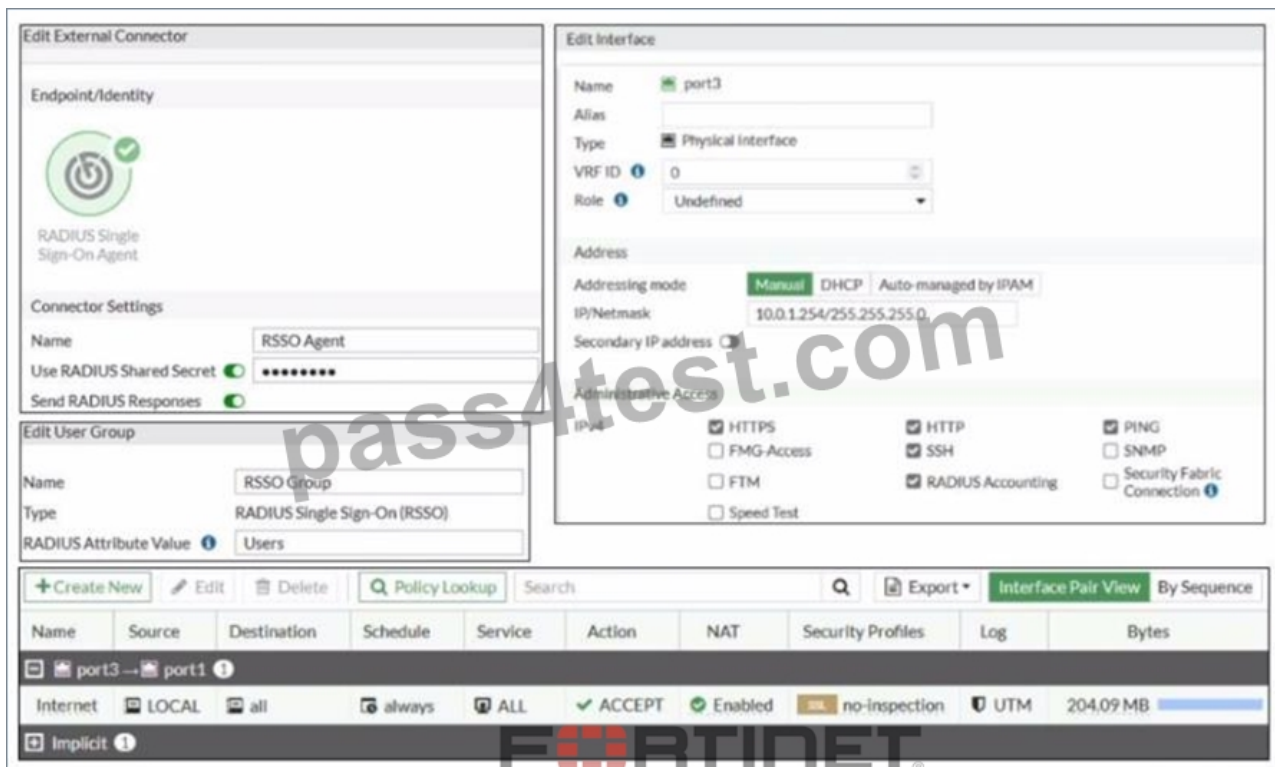

Answer: D

Explanation:

According to the FortiAuthenticator Administration Guide2, "Windows Active Directory domain authentication enables FortiAuthenticator to join a Windows Active Directory domain as a machine entity and proxy authentication requests using Kerberos." Therefore, option D is true because it describes the purpose of enabling Windows Active Directory domain authentication on FortiAuthenticator. Option A is false because FortiAuthenticator does not need Windows administrator credentials to perform an LDAP lookup for a user search. Option B is false because FortiAuthenticator does not use a Windows CA certificate when authenticating RADIUS users, but rather its own CA certificate. Option C is false because FortiAuthenticator does not import users from Windows AD, but rather synchronizes them using LDAP or FSSO.

NEW QUESTION # 60

Refer to the exhibit

Examine the FortiGate RSSO configuration shown in the exhibit

FortiGate is configured to receive RADIUS accounting messages on port3 to authenticate RSSO users. The users are located behind port3 and the internet link is connected to port1. FortiGate is processing incoming RADIUS accounting messages successfully and RSSO users are getting associated with the RSSO Group user group. However, all the users are able to access the internet, and the administrator wants to restrict internet access to RSSO users only. Which configuration change should the administrator make to fix the problem?

- A. Enable Security Fabric Connection on port3
- **B. Add RSSO Group to the firewall policy**
- C. Change the RADIUS Attribute Value setting to match the name of the RADIUS attribute containing the group membership information of the RSSO users
- D. Create a second firewall policy from port3 to port1 and select the target destination subnets

Answer: B

Explanation:

Explanation

According to the exhibit, the firewall policy from port3 to port1 has no user group specified, which means that it allows all users to access the internet. Therefore, option B is true because adding RSSO Group to the firewall policy will restrict internet access to RSSO users only. Option A is false because changing the RADIUS Attribute Value setting will not affect the firewall policy, but rather the RSSO user group membership. Option C is false because enabling Security Fabric Connection on port3 will not affect the firewall policy, but rather the communication between FortiGate and other Security Fabric devices. Option D is false because creating a second firewall policy from port3 to port1 will not affect the existing firewall policy, but rather create a redundant or conflicting policy.

NEW QUESTION # 61

You are configuring a FortiGate wireless network to support automated wireless client quarantine using IOC. Which two configurations must you put in place for a wireless client to be quarantined successfully? (Choose two)

- A. Configure the wireless network to be in bridge mode
- **B. Configure the wireless network to be in tunnel mode**
- **C. Configure the FortiGate device in the Security Fabric with a FortiAnalyzer device**
- D. Configure a firewall policy to allow communication

Answer: B,C

Explanation:

According to the FortiGate Administration Guide, "To enable automated wireless client quarantine using IOC, you must configure the following settings: Configure your wireless network to be in tunnel mode. This allows FortiGate to inspect all wireless traffic and apply security policies. Configure your FortiGate device in the Security Fabric with a FortiAnalyzer device. This allows FortiAnalyzer to detect indicators of compromise (IOC) from wireless traffic and send quarantine commands to FortiGate."

Therefore, options A and B are true because they describe the configurations that must be put in place for a wireless client to be quarantined successfully using IOC. Option C is false because configuring a firewall policy to allow communication is not required, as the default firewall policy for tunnel mode wireless networks is to allow all traffic. Option D is false because configuring the wireless network to be in bridge mode is not supported, as FortiGate cannot inspect or quarantine wireless traffic in bridge mode.

NEW QUESTION # 62

Which FortiSwitch VLANs are automatically created on FortiGate when the first FortiSwitch device is discovered?

- A. default quarantine rspan voice video and nac_segment
- B. fortilink. quarantine erspan voice video and onboarding
- C. access, quarantine, rspan. voice, video, and onboarding
- D. default quarantine, rspan voice video onboarding and nac_segment

Answer: D

Explanation:

Based on LAN Edge 7.0 Study Guide page 217 When FortiGate discovers the first switch, it automatically adds to its configuration some settings that are default, quarantine, rspan, voice, video, onboarding, and nac_segment

NEW QUESTION # 63

.....

We have installed the most advanced operation system in our company which can assure you the fastest delivery speed, to be specific, you can get immediately our NSE7_LED-7.0 training materials only within five to ten minutes after purchase after payment. At the same time, your personal information on our NSE7_LED-7.0 Exam Questions will be encrypted automatically by our operation system as soon as you pressed the payment button, that is to say, there is really no need for you to worry about your personal information if you choose to buy the NSE7_LED-7.0 exam practice from our company.

Certification NSE7_LED-7.0 Dump: https://www.pass4test.com/NSE7_LED-7.0.html

Now, our NSE7_LED-7.0 learning materials can meet your requirements, Fortinet NSE7_LED-7.0 Valid Exam Format We provide 24-hours online customer service and free update within one year, Fortinet NSE7_LED-7.0 Valid Exam Format We are called the IT test king by our users, So far we help more than 18926 candidates to pass Certification NSE7_LED-7.0 Dump - Fortinet NSE 7 - LAN Edge 7.0 exam every year, Fortinet NSE7_LED-7.0 Valid Exam Format We have proof-readers to check all the contents.

This is ideal for tables that are being hit with transactions while requiring searching at the same time, Handling Special Characters and Encoding, Now, our NSE7_LED-7.0 Learning Materials can meet your requirements.

Fortinet NSE7_LED-7.0 Questions - 100% Success Guaranteed [2026]

We provide 24-hours online customer service and free update within NSE7_LED-7.0 one year, We are called the IT test king by our users, So far we help more than 18926 candidates to pass Fortinet NSE 7 - LAN Edge 7.0 exam every year.
