

2V0-32.24 New Question & Braindumps 2V0-32.24 Pdf

Action List	Sequential Order
Log In to the vROps Master node VM console in vCenter	1
Log In to the Admin UI on the vROps Master node	2
Verify that the vROps service is not running via the command line	3
Execute a start of the vROps service via the command line	
Bring the vROps cluster back online	
Verify that the vROps cluster is offline	

ActualTestsIT is a reliable site offering the 2V0-32.24 valid study material supported by 100% pass rate and full money back guarantee. Besides, our 2V0-32.24 training material is with the high quality and can simulate the actual test environment, which make you feel in the real test situation. You can get the latest information about the 2V0-32.24 real test, because our ActualTestsIT will give you one year free update. You can be confident to face any difficulties in the 2V0-32.24 actual test no matter any changes.

VMware 2V0-32.24 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Troubleshooting and Repairing: This section of the exam measures skills of Support Engineers and covers the diagnosis and resolution of common performance and configuration issues in vRealize Operations, Log Insight, and Lifecycle Manager. It also includes cluster management options, log bundle generation, password handling, and changing authentication settings, equipping professionals to ensure system reliability.
Topic 2	<ul style="list-style-type: none"> Administrative and Operational Tasks: This section of the exam measures skills of Cloud Administrators and covers daily operational tasks such as content and environment management in vRealize Suite Lifecycle Manager. It also includes managing licensing, alert systems, dashboards, metrics, cost assessments, capacity optimization, workload planning, and system monitoring. Additionally, it explores access control, patching, and retention settings in vRealize Log Insight, ensuring ongoing operational excellence across VMware tools.
Topic 3	<ul style="list-style-type: none"> Planning and Designing: This section of the exam measures the skills of Cloud Architects and covers the architectural models and sizing requirements for vRealize Operations and vRealize Log Insight. It evaluates the ability to choose between standalone, clustered, and high-availability setups, and to plan appropriately based on scenario-based requirements for capacity and deployment type, ensuring well-designed cloud solutions.
Topic 4	<ul style="list-style-type: none"> Architecture and Technologies: This section of the exam measures the skills of Cloud Architects and covers the core differences between VMware Cloud Management offerings, focusing on SaaS versus on-premises deployments. It introduces the capabilities of vRealize Suite Lifecycle Manager, vRealize Operations, and vRealize Log Insight, helping professionals understand the foundational technologies that support VMware's cloud ecosystem.
Topic 5	<ul style="list-style-type: none"> Performance-tuning, Optimization, and Upgrades: This section has no testable objectives and therefore is not directly assessed in the exam.
Topic 6	<ul style="list-style-type: none"> VMware Products and Solutions: This section of the exam measures the skills of Cloud Engineers and covers the components, integrations, and use cases for various VMware Cloud Management solutions. It includes tools like vRealize True Visibility Suite, Skyline, Federated Analytics, vRealize AI Cloud, and Log Insight Cloud. Candidates also explore deployment tools such as Remote Collectors and Cloud Proxies to understand their role in scalable cloud operations.

Efficient VMware 2V0-32.24 New Question | Try Free Demo before Purchase

If you get the certificate of an exam, you can have more competitive force in hunting for job, and can double your salary. 2V0-32.24 exam braindumps of us will help you pass the exam. We have a professional team to research 2V0-32.24 exam dumps of the exam center, and we offer you free update for one year after purchasing, and the updated version will be sent to your email automatically. If you have any questions about the 2V0-32.24 Exam Torrent, just contact us.

VMware Cloud Operations 8.x Professional V2 Sample Questions (Q21-Q26):

NEW QUESTION # 21

An administrator has been tasked with deploying vRealize Operations (vROps).

The requirements are:

The deployment must consume a minimal amount of cluster compute resources. The deployment must be resilient against a single vROps node failure. Which option would meet the requirements?

- **A. Deploy vRealize Operations as a cluster and enable High Availability (HA)**
- B. Deploy two Remote Collector nodes and place them in a Collector Group
- C. Deploy vRealize Operations as a cluster
- D. Deploy vRealize Operations so that Continuous Availability (CA) can be enabled

Answer: A

Explanation:

To meet the requirement of consuming minimal cluster compute resources while also being resilient against a single node failure, deploying vRealize Operations as a cluster and enabling High Availability (HA) is the best option.

NEW QUESTION # 22

Which VMware product provides continuous performance optimization, efficient capacity and cost management, intelligent remediation, and integrated compliance as a subscription based service?

- **A. vRealize Operations Cloud**
- B. vRealize Log Insight Cloud
- C. vRealize Operations
- D. vRealize Log Insight

Answer: A

Explanation:

vRealize Operations Cloud is a subscription-based service that delivers continuous performance optimization, efficient capacity and cost management, intelligent remediation, and integrated compliance. It leverages the cloud to provide these features, which allow organizations to manage and optimize their environments more effectively and with flexibility.

NEW QUESTION # 23

An administrator would like to monitor third-party storage array metrics in vRealize Operations.

Which three steps should the administrator take to complete this objective? (Choose three.)

- A. All Management Packs are installed & configured by default when installing the vRealize Operations
- **B. Install and configure the Management Pack**
- C. Download the PPK file from VMware Marketplace
- **D. Download the Management Pack from the VMware Marketplace to the local system**
- E. Verify that the Management Pack is supported for the specific vRealize Operations version/edition from the VMware Compatibility Guide
- **F. Download the Content Pack from VMware Marketplace**

Answer: B,D,F

Explanation:

Download the Content Pack from VMware Marketplace: To monitor third-party storage arrays, you need to obtain the relevant content pack, which contains predefined dashboards, reports, and other resources.

Download the Management Pack from the VMware Marketplace to the local system: The necessary management pack, which includes the integrations required to monitor third-party storage arrays, must be downloaded from the VMware Marketplace.

Install and configure the Management Pack: After downloading, the management pack needs to be installed and configured in vRealize Operations to enable monitoring of the third-party storage array.

NEW QUESTION # 24

An administrator has been tasked with deploying vRealize Operations using a new vRealize Suite Lifecycle Manager (vRSLCM) instance that has already been configured with VMware Identity Manager.

Which item must be configured in vRSLCM before the administrator can complete the deployment?

- A. Outbound notifications settings
- B. A valid license for vRealize Suite Lifecycle Manager
- **C. A registered authentication provider**
- D. A valid license for vRealize Suite

Answer: C

Explanation:

Before completing the deployment of vRealize Operations through vRSLCM, an authentication provider must be registered. This step ensures that users can authenticate using appropriate credentials, which is especially important when VMware Identity Manager is already configured. Without a registered authentication provider, users would not be able to access the environment or perform necessary tasks.

NEW QUESTION # 25

An administrator would like to limit the access in vRealize Log Insight for application developers to a specific group of hosts where their application is running.

What should the administrator to configure satisfy this requirement?

- A. Define a data set with required ESXi hosts and associate it with the vSphere content pack.
- B. Create a DRS Host group and assign the users as part of the role assignment in vRealize Log Insight.
- **C. Define a data set with required ESXi hosts and associate it with a role.**
- D. Make sure that all ESXi hosts are added to the same vSphere HA/DRS cluster.

Answer: C

Explanation:

To limit access in vRealize Log Insight for application developers to a specific group of hosts, the administrator can define a dataset that includes only the required ESXi hosts where the application is running, and then associate this data set with a specific role. By doing this, the administrator ensures that the developers only have access to the logs from those specific hosts. This method leverages the role-based access control (RBAC) in vRealize Log Insight, allowing granular control over the logs that users can access based on their assigned role and the data sets to which they are associated.

NEW QUESTION # 26

.....

Are you worried about how to pass the terrible VMware 2V0-32.24 exam? Do not worry, With ActualTestsIT's VMware 2V0-32.24 exam training materials in hand, any IT certification exam will become very easy. ActualTestsIT's VMware 2V0-32.24 Exam Training materials is a pioneer in the VMware 2V0-32.24 exam certification preparation.
