

# High Pass Rate WGU Managing Cloud Security (JY02) Test Torrent is Convenient to Download - Pass4suresVCE

2026 Latest Pass4suresVCE Managing-Cloud-Security PDF Dumps and Managing-Cloud-Security Exam Engine Free Share:  
[https://drive.google.com/open?id=1fHx6sI593n\\_8dBOqNAQa7xxYYSRXVaje](https://drive.google.com/open?id=1fHx6sI593n_8dBOqNAQa7xxYYSRXVaje)

Our Managing-Cloud-Security study tool boost three versions for you to choose and they include PDF version, PC version and APP online version. Each version is suitable for different situation and equipment and you can choose the most convenient method to learn our Managing-Cloud-Security test torrent. For example, APP online version is printable and boosts instant access to download. You can study the Managing-Cloud-Security Guide Torrent at any time and any place. The PC version of Managing-Cloud-Security study tool can stimulate the real exam's scenarios. We provide 365-days free update and free demo available.

Our Managing-Cloud-Security guide questions are suitable for various people. No matter you are students, office workers or common people, you can have a try. For our Managing-Cloud-Security practice braindumps are famous for the reason that they are high-effective. We can claim that if you study with them for 20 to 30 hours, then you can take part in the Managing-Cloud-Security Exam confidently if you finish all learning tasks. The Managing-Cloud-Security certificate issued by official can inspire your enthusiasm.

## Updated Managing-Cloud-Security Testkings, Managing-Cloud-Security Reliable Test Online

Each format of the WGU Certification Exams not only offers updated exam questions but also additional benefits. A free trial of the WGU Managing Cloud Security (JY02) (Managing-Cloud-Security) exam dumps prep material before purchasing, up to 1 year of free updates, and a money-back guarantee according to terms and conditions are benefits of buying WGU Managing Cloud Security (JY02) (Managing-Cloud-Security) real questions today. A support team is also available 24/7 to answer any queries related to the WGU Managing-Cloud-Security exam dumps.

## WGU Managing Cloud Security (JY02) Sample Questions (Q200-Q205):

### NEW QUESTION # 200

A governmental data storage organization plans to relocate its primary North American data center to a new property with larger acreage. Which defense should the organization deploy at this location to prevent vehicles from causing harm to the data center?

- A. Cameras
- B. Fences
- C. Bollards
- D. Locks

**Answer: C**

Explanation:

Bollards are physical barriers designed to prevent vehicles from ramming into or breaching secure facilities.

They are often placed at entrances, around perimeters, or in front of critical infrastructure like data centers.

Locks, cameras, and fences provide important physical security, but they cannot stop a high-speed vehicle from causing damage. Cameras record activity, fences create boundaries, and locks secure access points, but only bollards physically block or mitigate vehicle attacks.

Governmental and critical infrastructure sites commonly deploy bollards to protect against both accidental collisions and deliberate vehicle-borne attacks. Combined with layered security measures—such as surveillance and fencing—they enhance resilience against physical threats to sensitive data centers.

### NEW QUESTION # 201

A cloud provider that processes third-party credit card payments is unable to encrypt its customers' cardholder data because of constraints on a legacy payment processing system. What should it implement to maintain Payment Card Industry Data Security Standard (PCI DSS) compliance?

- A. Compensating control
- B. Privacy control
- C. Risk acceptance
- D. Protection levels

**Answer: A**

Explanation:

When a required PCI DSS control cannot be implemented due to technical limitations, the organization must apply a compensating control. A compensating control is an alternative safeguard that meets the intent and rigor of the original requirement.

Risk acceptance is insufficient under PCI DSS, as compliance demands enforceable safeguards. Privacy controls and protection levels may enhance data security but do not formally replace mandatory encryption requirements.

For example, a provider may use strict access controls, network segmentation, or monitoring to mitigate risks from unencrypted cardholder data. Documenting these compensating controls is essential during audits, ensuring compliance despite system limitations.

### NEW QUESTION # 202

Which technology prevents the environment from being over-controlled with performance-degrading security measures for applications?

- A. Quality of Service (QoS)
- B. Runtime Application Self-Protection (RASP)
- C. Distributed Denial of Service (DDoS)
- D. Intrusion Detection System (IDS)

**Answer: B**

Explanation:

Runtime Application Self-Protection (RASP) prevents environments from being over-controlled with performance-degrading security measures. Managing Cloud guidance explains that RASP operates from within the application, monitoring behavior and responding to threats in real time.

Because RASP provides contextual awareness of application logic, it reduces the need for excessive external security controls such

as heavy network filtering or constant scanning. This minimizes performance impact while maintaining effective protection against attacks like injection, unauthorized access, and misuse of application functions. QoS manages traffic prioritization, DDoS describes an attack type, and IDS detects threats but does not prevent over-control. Therefore, RASP is the correct technology.

#### NEW QUESTION # 203

Which action should be taken to preserve forensic evidence for collection?

- A. Enforcing mutable servers
- **B. Pausing the virtual machine**
- C. Enabling threat modeling
- D. Implementing serverless architectures

**Answer: B**

Explanation:

Pausing the virtual machine is the correct action to preserve forensic evidence for collection. Managing Cloud guidance explains that pausing a VM maintains its current memory and disk state, preventing changes that could alter or destroy evidence. This approach allows investigators to capture volatile data, analyze system state, and perform forensic imaging without introducing new activity. Preserving the environment is critical for maintaining chain of custody and ensuring the integrity of evidence. The other options do not preserve evidence. Serverless architectures reduce server management, threat modeling is a design activity, and mutable servers increase configuration changes. Therefore, pausing the virtual machine is the correct answer.

#### NEW QUESTION # 204

Which tier from Uptime Institute's Data Center Site Infrastructure Tier Standards is considered to be the most secure, reliable, and redundant in design and operational elements?

- A. Tier I
- **B. Tier IV**
- C. Tier III
- D. Tier II

**Answer: B**

Explanation:

Tier IV is the highest level in the Uptime Institute's Data Center Site Infrastructure Tier Standards and is considered the most secure, reliable, and redundant. Managing Cloud documentation explains that Tier IV data centers provide fault tolerance with multiple independent systems.

This tier includes fully redundant components, multiple active power and cooling distribution paths, and continuous operation even during maintenance or failure events. Tier IV environments are designed for mission-critical systems requiring maximum uptime. Tier I through Tier III offer increasing levels of redundancy but do not provide full fault tolerance. Therefore, Tier IV is the correct answer.

#### NEW QUESTION # 205

.....

As a worldwide leader in offering the best Managing-Cloud-Security test torrent, we are committed to providing comprehensive service to the majority of consumers and strive for constructing an integrated service. What's more, we have achieved breakthroughs in Managing-Cloud-Security certification training application as well as interactive sharing and after-sales service. A good deal of researches has been made to figure out how to help different kinds of candidates to get WGU Managing Cloud Security (JY02) certification. We revise and update the WGU Managing Cloud Security (JY02) guide torrent according to the changes of the syllabus and the latest developments in theory and practice. We base the Managing-Cloud-Security Certification Training on the test of recent years and the industry trends through rigorous analysis.
