

New 300-540 Braindumps, Free 300-540 Test Questions

What's more, part of that TestKingIT 300-540 dumps now are free: <https://drive.google.com/open?id=1Cj9Jc1cVuDc6DM7EBKdwk0gaBIEdJVEd>

You must make a decision as soon as possible! I don't know where you heard about 300-540 actual exam, but you must know that there are many users of our 300-540 study materials. Some of these users have already purchased a lot of information. They completed their goals with our 300-540 learning braindumps. Now they have a better life. As you know the company will prefer to employ the staffs with the 300-540 certification.

Under coordinated synergy of all staff, our 300-540 guide materials achieved to a higher level of perfection by keeping close attention with the trend of dynamic market. They eliminated stereotypical content from our 300-540 practice materials. And if you download our 300-540 study quiz this time, we will send free updates for you one year long since we promise that our customers can enjoy free updates for one year.

Free Cisco 300-540 Test Questions | Valid 300-540 Dumps Demo

The desktop practice test format comes with all features of the web-based practice exam. TestKingIT has made all of the different formats so the exam applicants won't face any additional issues and prepare themselves with the real questions and crack Cisco 300-540 Certification test for the betterment of their futures. One can set the time and questions numbers of practice exams (desktop and web-based) according to their needs. TestKingIT is giving multiple mock exams to the customers so they can practice

and make themselves perfect.

Cisco Designing and Implementing Cisco Service Provider Cloud Network Infrastructure Sample Questions (Q81-Q86):

NEW QUESTION # 81

VNF data plane redundancy can be achieved by:

- A. Disabling network resiliency features
- B. Placing all VNFs on a single host
- C. Using placement strategies and network resiliency
- D. Limiting the use of redundant hardware

Answer: C

NEW QUESTION # 82

Cloud edge facilities are designed to:

- A. Increase the physical storage capacity for cloud providers
- B. Reduce latency by bringing cloud resources closer to the end-user
- C. Centralize cloud operations in a single location
- D. Provide backup power solutions for data centers

Answer: B

NEW QUESTION # 83

An engineer must implement a public cloud solution that enables a company to place all its infrastructure and its end-user applications in the cloud, eliminating the need for software application management and maintenance. Which cloud service model must be used?

- A. SaaS
- B. FaaS
- C. IaaS
- D. PaaS

Answer: A

Explanation:

Comprehensive and Detailed Explanation (Cisco Cloud Model Knowledge)

The requirement states:

- * All infrastructure in the cloud
- * All applications delivered from the cloud
- * No software management
- * No maintenance by the customer

This matches Software as a Service (SaaS).

SaaS provides:

- * Fully managed applications
- * No patching, upkeep, installation, or infrastructure maintenance
- * End-to-end cloud delivery

PaaS and IaaS still require some software/application management.

FaaS is event-driven serverless compute, not full application hosting.

Therefore, the correct answer is A. SaaS.

NEW QUESTION # 84

An engineer must implement a solution on a Cisco ASR 1000 Series router to protect against DDoS attacks.

DDoS traffic must be dropped by transmitting Flowspec attributes to edge routers, instructing them to generate an ACL via class-maps and policy-maps. The engineer already configured BGP neighbors. Which action must be taken next?

- A. Activate the BGP neighbors
- **B. Configure Flowspec for the BGP address-family**
- C. Set the BGP routing process
- D. Configure the route reflector

Answer: B

Explanation:

Comprehensive and Detailed Explanation

BGP Flowspec allows routers to distribute traffic-filtering rules using BGP NLRI.

To enable Flowspec, after neighbors are configured, the essential next step is:

#Activate the Flowspec address-family under BGP

Example:

```
router bgp 65000
address-family ipv4 flowspec
neighbor X.X.X.X activate
exit-address-family
```

This enables:

- * FlowSpec NLRI exchange
- * Distribution of drop rules (rate-limit, redirect, null route, etc.)
- * Automatic ACL/class-map/policy-map generation on edge routers

Why the other options are incorrect:

- * B. Set BGP routing process# already done when neighbors were configured
- * C. Activate neighbors# only makes sense inside an address-family; flowspec AF must be enabled first
- * D. Configure route reflector# optional and not required for Flowspec to operate Thus, the correct next step is A. Configure Flowspec for the BGP address-family.

NEW QUESTION # 85

Direct Connect as a WAN infrastructure connectivity option is preferable for scenarios requiring:

- A. Public internet access to cloud resources
- B. Minimal bandwidth and maximum costs
- **C. High throughput and low latency**
- D. Low security and high latency

Answer: C

NEW QUESTION # 86

.....

With TestKingIT, you do not have to spend extra because we offer up to 12 months of free Cisco 300-540 valid dumps updates. These free updates of actual Cisco 300-540 Dumps will help you keep studying as per the 300-540 new examination content. Our free 300-540 actual dumps updates will remain valid for up to 12 months.
