It is an advanced-level certification that is highly sought after by organizations looking for skilled security professionals to manage their security posture.

Trend Micro Certified Professional for Deep Security Sample Questions (Q46-Q51):

NEW QUESTION # 46

The details for an event are displayed in the exhibit. Based on these details, which Protection Module generated the event?

- A. Firewall
- B. Integrity Monitoring
- C. Intrusion Prevention
- D. Log Inspection

Answer: D

Explanation:

The event details show a "Reason" referencing an Active Directory event (Success Audit), a "Description" that notes "Active directory Success Audit event," and a "ProgramName" of "syslogd." This matches the operation of the Log Inspection module, which monitors logs from operating system and application sources and reports events such as authentication failures, system errors, and audit events.

The other modules do not generate events based on log entries in this manner.

Reference:Trend Micro Deep Security Administrator's Guide, Log Inspection Module Section

NEW QUESTION # 47

Which of the following are valid methods for pre-approving software updates to prevent Application Control Events from being triggered by the execution of the modified software? Select all that apply.

- A. Edit the inventory database file (AC.db) on the Agent computer to include the hash of the newly updated software. Save the change and restart the Deep Security Agent. The software updates will now be approved.
- B. Maintenance mode can be enabled while completing the updates.
- C. Software updates performed by a Trusted Updater will be automatically approved.
- D. Once the inventory scan has run when Application Control is first enabled, there is no way to update the inventory to incorporate modified software.

Answer: B,C

Explanation:

Normally, you will want Application Control to alert you when there are any unexpected software updates. However, some updates

are expected and you will need provide allowances for these up-dates. Two methods for pre-approving software updates includes maintenance mode and trusted installers.

Explication: Study Guide - page (303-304)

NEW QUESTION # 48

Which of the following are valid methods for forwarding Event information from Deep Security? Select all that apply.

- A. Amazon Simple Notification Service (SNS)
- B. Deep Security Application Programming Interface (API)
- C. Security Information and Event Management (SIEM)
- D. Simple Network Management Protocol (SNMP)

Answer: A,C,D

Explanation:

You can configure Deep Security Manager to instruct all managed computers to send logs to a SI-EM, Amazon Simple Notification Service or SNMP computers.

Explication: Study Guide - page (322)

NEW QUESTION # 49

A collection of servers protected by Deep Security do not have Internet access. How can Smart Scan be used on these computers.

- A. Install a Smart Protection Server in the environment and set it as the source for File Reputation information.
- B. Smart Scan must contact the Smart Protection Network to function. Any servers without Internet access will be unable to use Smart Scan.
- C. Smart Scan can be configured to use a local pattern file containing the same information as the Smart Protection Network.
- D. Promote one of the Deep Security Agents on the air gapped computers to become a Re-lay.

Answer: A

Explanation:

Agent-airgapped

NEW QUESTION # 50

Based on the configuration setting highlighted in the exhibit, what behavior can be expected during a malware scan?

- A. With the highlighted setting enabled, Deep Security Agents will scan files for viruses and malware using supplementary aggressive detection pattern files.
- B. With the highlighted setting enabled, Deep Security Agents will scan files for known viruses and malware using patterns and any files deemed suspicious will be submitted to a configured Deep Discovery Analyzer for further analysis.
- C. With the highlighted setting enabled, Deep Security Agents will scan files for unknown malware using Predictive Machine Learning.
- D. With the highlighted setting enabled, Deep Security Agents will scan files for known malware as well as newly encountered malware by accessing the Suspicious Objects List.

Answer: D
