Choose what BEST describes the reason why querying logs now are very fast.

- A. SmartConsole now queries results directly from the Security Gateway.
- B. Indexing Engine indexes logs for faster search results.
- C. The amount of logs being stored is less than previous versions.
- D. New Smart-1 appliances double the physical memory install.

Answer: B

Explanation:

The reason why querying logs now are very fast is that Indexing Engine indexes logs for faster search results. Indexing Engine is a component of R81 Management that creates and maintains an index of log data, which enables quick and efficient log searches⁴. The other options are not related to the speed of log querying. The amount of logs being stored may vary depending on the log retention settings.
