CKA Examcollection Vce, CKA Testdump

In order to let you have a deep understanding of our CKA learning guide, our company designed the free demos for our customers. We will provide you with free demos of our study materials before you buy our products. If you want to know our CKA training materials, you can download them from the web page of our company. If you use the free demos of our CKA study engine, you will find that our products are very useful for you to pass your CKA exam and get the certification.

Linux Foundation Certified Kubernetes Administrator (CKA) Program Exam Sample Questions (Q42-Q47):

NEW QUESTION # 42

List all the pods showing name and namespace with a json path expression

Answer:

Explanation:

```
kubectl get pods -o=jsonpath="{.items[*]['metadata.name','metadata.namespace']}"
```

NEW QUESTION # 43

Create and configure the service front-end-service so it's accessible through NodePort and routes to the existing pod named front-end.

Answer:

Explanation:

```
root@node-1:~# k expose po
error: resource(s) were provided, but no name, label selector, or --all flag specified
See 'kubectl expose -h' for help and examples
root@node-1:~# k expose po fron-end --name=front-end-service --port=80 --target-port=80 --t
ype=NodePort
Error from server (NotFound): pods "fron-end" not found
root@node-1:~# k expose po front-end --name=front-end-service --port=80 --target-port=80 --
type=NodePort
service/front-end-service exposed
root@node-1:~# k get svc
NAME                TYPE          CLUSTER-IP      EXTERNAL-IP      PORT(S)          AGE
front-end-service   NodePort      10.103.221.227  <none>           80:31828/TCP     3s
kubernetes          ClusterIP     10.96.0.1       <none>           443/TCP          77d
root@node-1:~#
```

NEW QUESTION # 44

Check the Image version of nginx-dev pod using jsonpath

Answer:

Explanation:

See the solution below.

Explanation

```
kubectl get po nginx-dev -o
```

```
jsonpath='{.spec.containers[].image}' {"\n"}'
```

NEW QUESTION # 45

You are deploying an application on Kubernetes. You need to ensure that a minimum of three pods are always running for this application. How can you achieve this? Describe how to configure the deployment with a replica count and a liveness probe to monitor the health of the pods.

Answer:

Explanation:

See the solution below with Step by Step Explanation.

Explanation:

Solution (Step by Step) :

1. Create a Deployment with a Replica Count:

- Create a YAML file named 'deployment.yaml' with the following content:

```

apiVersion: apps/v1
kind: Deployment
metadata:
  name: myapp-deployment
spec:
  replicas: 3
  selector:
    matchLabels:
      app: myapp
  template:
    metadata:
      labels:
        app: myapp
    spec:
      containers:
        - name: myapp
          image: myapp:latest
          # ... other container configurations ...

```

- Apply the YAML file using 'kubectl apply -f deployment.yaml'. 2. Configure a Liveness Probe: - Update the 'deployment.yaml' file to include a liveness probe. For example, you could use a HTTP probe:

```

# ... other deployment configurations ...
containers:
  - name: myapp
    image: myapp:latest
    # ... other container configurations ...
    livenessProbe:
      httpGet:
        path: /health
        port: 8080
      initialDelaySeconds: 15
      periodSeconds: 20
      failureThreshold: 3

```

- Apply the updated YAML file using 'kubectl apply -f deployment.yaml'. 3. Verify the Deployment: - Check the status of the deployment using 'get deployments myapp-deployment'. - Ensure that three pods are running and that the liveness probe is monitoring their health. You can use 'kubectl describe pod myapp-deployment-XXXX' (where XXXX is the pod name) to see the details of the pod and the liveness probe status.

NEW QUESTION # 46

Create a nginx pod with label env=test in engineering namespace
See the solution below.

- A. `kubectl run nginx --image=nginx --restart=Never --labels=env=test --namespace=engineering --dry-run -o yaml > nginx-pod.yaml`
`kubectl run nginx --image=nginx --restart=Never --labels=env=test --namespace=engineering --dry-run -o yaml | kubectl create -n engineering -f- YAML File:`

```

apiVersion: v1
kind: Pod
metadata:
  name: nginx
  namespace: engineering
labels:
  env: test
spec:
  containers:
    - name: nginx
      image: nginx
      imagePullPolicy: IfNotPresent
      restartPolicy: Never

```

`kubectl create -f nginx-pod.yaml`
- B. `kubectl run nginx --image=nginx --restart=Never --labels=env=test --namespace=engineering --dry-run -o yaml > nginx-pod.yaml`
`kubectl run nginx --image=nginx --restart=Never --labels=env=test --namespace=engineering --dry-run -o yaml | kubectl create -n engineering -f- YAML File:`

```

apiVersion: v1
kind: Pod
metadata:

```

```
name: nginx
namespace: engineering
labels:
env: test
spec:
containers:
- name: nginx
image: nginx
imagePullPolicy: IfNotPresent
restartPolicy: Never
kubectl create -f nginx-pod.yaml
```

Answer: A

NEW QUESTION # 47

.....

Are you IT person? Do you want to succeed? If you want to succeed, please do to buy Pass4Tes's Linux Foundation CKA exam training materials. Our training materials have through the test of practice. it can help you to pass the IT exam. With the SureTorrent's Linux Foundation CKA exam training materials, you will have better development in the IT industry. You can enjoy the treatment of high-level white-collar, and you can carve out a new territory in the intertation. Are you still worried about your exam? SureTorrent's Linux Foundation CKA Exam Training materials will satisfy your desire. We are through thick and thin with you and to accept this challenge together.
