They are a bunch of courteous staff waiting for offering help 24/7. You can definitely contact them when getting any questions related with our CAD practice materials. If you haplessly fail the exam, we treat it as our blame then give back full refund and get other version of practice material for free.

ServiceNow Certified Application Developer-ServiceNow Sample Questions (Q172-Q177):

NEW QUESTION # 172
Which one of the following is a benefit of creating an Application Properties page for each application you develop?

- A. Application Properties allow a developer to override the application properties inherited from ServiceNow
- B. An Application Properties page is a good landing page for an application
- C. Application users know to go to the Application Properties page to change the appearance of an application
- D. Application Properties allow a developer or admin to make changes to an application's behavior without modifying application artifacts

Answer: D

Explanation:
A benefit of creating an Application Properties page for each application you develop is that Application Properties allow a developer or admin to make changes to an application's behavior without modifying application artifacts. Application Properties are system properties that store configuration information for a specific application. They can be used to control various aspects of the application, such as feature flags, default values, thresholds, or URLs. By creating an Application Properties page, you can group and display all the properties related to your application in one place and make them easy to access and update. This way, you can avoid hard-coding static data in your application code and make your application more flexible and maintainable. NEW QUESTION # 173
Is it possible to change an application's scope?

- A. Yes. but only from private scope to global scope
- B. Yes it's possible.
- C. No, it's not possible.
- D. Yes, but only from global scope to private scope

Answer: B

Explanation:
It is possible to change an application's scope in ServiceNow, either from global to private or from private to global. However, changing the scope of an application may affect its functionality and compatibility with other applications. Therefore, it is recommended to test the application thoroughly before and after changing its scope.

NEW QUESTION # 174
What is the REST API Explorer used to do?

- A. Create sample code for sending REST requests to ServiceNow
- B. Convert SOAP Message functions to REST methods
- C. Practice using REST to interact with public data providers
- D. Find resources on the web for learning about REST

Answer: A

Explanation:
One of the uses of the ServiceNow REST API Explorer is to create sample code for sending REST requests to ServiceNow. The REST API Explorer is a tool that allows you to discover and test the ServiceNow REST APIs. You can select an API endpoint, set the HTTP method, parameters, headers, and body, and then execute the request. The REST API Explorer will show you the response status, headers, and body, as well as generate sample code for various languages and frameworks, such as cURL, Java, JavaScript, Node.js, Python, Ruby, and more. NEW QUESTION # 175
Which method call returns true only if the currently logged in user has the catalog_admin role and in no other case?

- A. g_user.hasRoleOnly('catalog_admin')
- B. g_user.hasRoleExactly('catalog_admin')
- C. g_user.hasRole('catalog_admin')
- D. g_user.hasRoleFromList('catalog_admin')

Answer: B

Explanation:
The method call that returns true only if the currently logged in user has the catalog_admin role and in no other case is g_user.hasRoleExactly('catalog_admin'). This method checks if the user has exactly one role, and returns true if it matches the argument. The other methods return true if the user has one or more roles, or if the user has any role from a list of arguments.

NEW QUESTION # 176
Which of the following statements is true for the Form Designer?
a) To add a field to the form layout, drag the field from the Fields tab to the desired destination on the form.
b) To create a new field on a form's table, drag the appropriate data type from the Field Types tab to the form and then configure the new field.
c) To remove a field from the form layout, hover over the field to enable the Action buttons, and select the Delete (X) button.
d) To add a section to the form layout, drag it from the Field Types tab to the desired destination on the form.

- A. b, c, and d
- B. a, b, c, and d
- C. a, b, and c
- D. a, b, and d

Answer: C

Explanation:
https://docs.servicenow.com/bundle/tokyo-platform-administration/page/administer/form-administration/concept/c_FormDesign.html
The Form Designer is a graphical interface for creating and customizing forms. The following statements are true for the Form Designer:
To add a field to the form layout, drag the field from the Fields tab to the desired destination on the form. This will add the field to the form view without changing the table definition.
To create a new field on a form's table, drag the appropriate data type from the Field Types tab to the form and then configure the new field. This will create a new column on the table and add the field to the form view.
To remove a field from the form layout, hover over the field to enable the Action buttons, and select the Delete (X) button. This will remove the field from the form view but not from the table definition.
The following statement is false for the Form Designer:
To add a section to the form layout, drag it from the Field Types tab to the desired destination on the form. This is incorrect because sections are not available in the Field Types tab. To add a section, click the Add Section button on the toolbar or right-click on the form and select Add Section.
