A Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam (NCP-EUC) practice questions is a helpful, proven strategy to crack the Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam (NCP-EUC) exam successfully. It helps candidates to know their weaknesses and overall performance. BraindumpsPrep software has hundreds of Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam (NCP-EUC) exam dumps that are useful to practice in real-time.

The NCP-EUC Certification Exam is a vendor-neutral certification exam, meaning that it is not tied to any specific vendor or technology. This makes the certification a valuable asset for IT professionals who want to work with different VDI solutions. Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam certification also proves that the candidate has a deep understanding of VDI concepts and can apply them to various VDI solutions.

Related NCP-EUC Exams, Excellect NCP-EUC Pass Rate

Contrary to the high prices of the other exam materials available online, our NCP-EUC exam questions can be obtained on an affordable price yet their quality and benefits beat all similar products of our competitors. Some of our customer will be surprised to find that the price of our NCP-EUC Study Guide is too low to believe for they had been charged a lot before on the other websites. But after they passed their exams with our NCP-EUC preparation materials. They said that our NCP-EUC simulating exam is proved the best alternative of the time and money.

Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam Sample Questions (Q14-Q19):

NEW QUESTION # 14

Which method of creating desktops is recommended when using Ommissa Horizon for non-persistent task worker desktops on Nutanix?

- A. Manual Desktops
- **B. Instant Clones**
- C. Linked Clones
- D. Full Clones

Answer: B

Explanation:

In the "Ommissa Horizon on Nutanix Best Practices" (formerly VMware Horizon), the recommended provisioning method for non-persistent desktops (specifically for task workers who do not need to retain user-installed apps) is Instant Clones. Instant Clones (vmFork technology) allow for the rapid provisioning of desktop VMs that share a base image and memory footprint, offering high

storage efficiency and fast deployment times. Nutanix AHV and AOS are fully optimized to support Instant Clones (often utilizing Shadow Clones for caching the replica disk).

Linked Clones (Option D) are considered a legacy technology and are deprecated in modern versions of Horizon. Full Clones (Option C) are typically reserved for persistent, power-user use cases where storage efficiency is less of a priority than persistence.

NEW QUESTION # 15

Where should an administrator configure AWS, Azure, and Google accounts within Frame?

- A. accounts
- B. Customers
- C. Organizations
- **D. Cloud Account**

Answer: D

Explanation:

Frame is a cloud-native desktop-as-a-service platform that delivers virtual apps and desktops from multiple public clouds¹. Frame allows administrators to manage various components of their cloud accounts easily from the Frame console¹.

A cloud account is a logical grouping of resources that are associated with a specific cloud provider (such as AWS, Azure, or Google) and region¹. A cloud account can have multiple virtual networks, master images, and instance types that can be used to create and run virtual apps and desktops¹.

To configure AWS, Azure, and Google accounts within Frame, an administrator needs to go to the Cloud Accounts section of the Frame console¹. There, the administrator can add new cloud accounts or edit existing ones by providing the required credentials and settings for each cloud provider^{1,2}.

NEW QUESTION # 16

An administrator has a cluster that is RDMA-enabled, and has been tasked with configuring network segmentation with RDMA over Converged Ethernet. While attempting to make this configuration change, it is observed that the option is greyed out in Prism. Which condition needs to be resolved in order to proceed?

- A. NIC cards are mixed across nodes in the cluster.
- B. All nodes in the cluster need two RDMA-capable NICs.
- **C. Connected NIC speeds are a mix of 10Gb and 25Gb.**
- D. CVM memory reservation needs to be at least 64GB.

Answer: C

Explanation:

According to the Nutanix Network Configuration and RDMA guidelines, uniformity of the physical network layer is a strict requirement for enabling RDMA over Converged Ethernet (RoCE).

Specifically, Nutanix does not support mixing network cards with different speeds within the same cluster when RDMA is involved. If the cluster contains a mix of nodes where some are connected at 10 Gbps and others at 25 Gbps (or higher), the Prism interface will disable (grey out) the RDMA configuration options to prevent an unsupported or unstable fabric configuration. To resolve this and proceed with enabling RDMA network segmentation, the administrator must ensure that all RDMA-capable NICs across all nodes are operating at the same supported speed (typically 25 Gbps or higher).

NEW QUESTION # 17

The operations team have been tasked with increasing overall datacenter efficiency with a target minimum of 80% CPU, memory, and storage capacity utilization. They are requesting usage data from all application owners be sent on a monthly basis to be ingested into their capacity management software.

An administrator has an implementation of four Nutanix clusters under the management of a single Prism Central Instance.

How should the administrator best provide the data needed to the operations team to ensure adherence to the datacenter utilization directive?

- A. Create a Metric Chart in Prism Central with CPU, Memory, and Storage usage across all clusters and export the data to be sent to the operations team,

- B. Review the VM Efficiencies widget in Prism Central and export the data to a comma delimited file to be sent to the operations team.
- **C. Schedule a monthly email report with CPU, Memory, and Storage Usage data across all clusters under the Reporting facility in Prism Central.**
- D. Export the CPU Memory and Storage Usage metrics under Virtual Infrastructure/VMs in Prism Central and FTP the file to the operations team's FTP server.

Answer: C

Explanation:

This option allows you to create a custom report with the required metrics for all VMs across all clusters and send it automatically to the operations team via email. This way, you don't have to manually export or FTP the data every month.

NEW QUESTION # 18

An administrator is creating a plan for Citrix DaaS disaster recovery on either Amazon Web Services or Azure. At a minimum, how many Cloud Connectors in each resource location must be created?

- A. 0
- **B. 1**
- C. 2
- D. 3

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract of Nutanix and Citrix DaaS documents:

According to Citrix Cloud and Nutanix DR best practices:

* High Availability Requirement: Citrix strongly recommends and practically enforces a requirement of at least two (2) Cloud Connectors per Resource Location (RL).

* Reasoning: Cloud Connectors are "evergreen" components that update automatically from the cloud.

During an update, a connector may reboot. If only one connector exists (Option A), the Resource Location would go offline, severing connectivity for the DR site.

* Production vs. DR: A Disaster Recovery (DR) site is treated as a production Resource Location because it must be ready to accept user connections instantly during a failover. Therefore, the minimum N+1 redundancy rule applies, requiring 2 connectors.

NEW QUESTION # 19

.....

Applying the international recognition third party for payment for NCP-EUC exam cram, and if you choose us, your money and account safety can be guaranteed. And the third party will protect the interests of you. In addition, NCP-EUC learning materials are edited and verified by professional experts who possess the professional knowledge for the exam, and the quality can be guaranteed. We are pass guarantee and money back guarantee and if you fail to pass the exam, we will give you full refund. We provide free update for 365 days for NCP-EUC Exam Materials for you, so that you can know the latest information for the exam, and the update version will be sent to your email automatically.
