C_THR92_2505 Actual Exam Dumps, C_THR92_2505 Valid Test Sample

If you get our C_THR92_2505 training guide, you will surely find a better self. As we all know, the best way to gain confidence is to do something successfully. With our C_THR92_2505 study materials, you will easily pass the C_THR92_2505 examination and gain more confidence. As there are three versions of our C_THR92_2505 praparation questions: the PDF, Software and APP online, so you will find you can have a wonderful study experience with your favorite version.

SAP C_THR92_2505 Exam Syllabus Topics:

Topic	Details

Topic 1	• Advanced Reporting Tool with Replicated Data: This section targets a Reporting Specialist and covers leveraging advanced reporting tools that operate on replicated data. It includes knowledge of data replication concepts and using these tools to perform comprehensive reporting that supports detailed analysis.
Topic 2	• Story Reports: This section of the exam measures skills of a Report Creator and covers the creation and management of Story Reports within SAP SuccessFactors. It emphasizes designing queries, configuring pages with widgets, and managing report permissions to generate insightful visualizations.
Topic 3	• Detailed Reporting Tool with Live Data: This section assesses the skills of an Advanced Report Developer and involves working with detailed reports that use live data feeds. It includes building customizable queries and using reporting tools to deliver real-time, actionable data to stakeholders.
Topic 4	• Report Consumers: This domain evaluates the understanding of a Business User and focuses on how report consumers interact with and utilize generated reports. It highlights user roles, permissions, and effective report sharing practices to ensure reports serve decision-making needs.
Topic 5	• Canvas Reports and Page Designer: This part measures the capabilities of a Report Administrator and involves creating and customizing reports using Canvas Reports and Page Designer. It covers advanced query construction, formatting, pivot creation, and report distribution to enhance data presentation and usability.
Topic 6	• Tile-Based Dashboard Framework: This domain targets a Dashboard Designer and covers building and managing tile-based dashboards. It encompasses creating tiles, assigning access, applying filters on dashboard data, and sharing dashboards to provide users with interactive and visually engaging insights.

SAP Certified Associate - SAP SuccessFactors People Analytics: Reporting Sample Questions (Q17-Q22):

NEW QUESTION # 17
You are using a Multi-Dataset table report without Business Intelligence Reporting Tools (BIRT). What are characteristics of the report output? Note: There are 2 correct answers to this question.

- A. Data is joined in the query.
- B. Report results are shown on separate tabs in the output.
- C. Report results are shown on a single tab in the output.
- D. Data is NOT joined in the query.

Answer: B,D

Explanation:
When using a Multi-Dataset Table Report without Business Intelligence Reporting Tools (BIRT), the following characteristics apply:
* Report results are shown on separate tabs in the output (A):
* Each dataset's output is displayed on its respective tab. This is because the data is not integrated or merged in the query.
* Data is NOT joined in the query (D):
* Multi-dataset reports without BIRT do not perform data joins. Each dataset is treated independently.

NEW QUESTION # 18
You are creating a Story report on Job Classifications. You have configured the chart, table, and input control on the canvas, as displayed in the screenshot. How do you set the input control?

- A. Configure it for Linked Analysis.
- B. Create the corresponding filter on each chart.
- C. Convert it to a Story Filter.
- D. Enable Cascading Effects.

Answer: A

Explanation:
* Linked Analysis
* Configuring input controls for Linked Analysis allows interactions between components (charts, tables) on the same canvas, enabling filters to apply only to selected visuals.
* Why This is Correct
* In the scenario, the input control must affect only the charts and not the table. Linked Analysis ensures this targeted filtering behavior.
* Why Other Options are Incorrect
* B (Create Filters): Manually adding filters is redundant when Linked Analysis can automate the behavior.
* C (Enable Cascading Effects): Cascading effects affect hierarchical filters but are unrelated to input control behavior here.
* D (Convert to Story Filter): A Story Filter would apply globally, affecting all elements, which is not desired.
