

C-BW4H-2505最新な問題集 & C-BW4H-2505予想試験

BONUS!!! CertShiken C-BW4H-2505ダンプの一部を無料でダウンロード: https://drive.google.com/open?id=10hTgO1PdAS5LkQ_YdDT0tmAQ-TjprhOe

CertShikenのC-BW4H-2505問題集を利用してみたいかどうか。この問題集はC-BW4H-2505試験に関連するすべての参考書の中で一番優秀なものと言えます。なぜならば、次の四つの理由があります。第一に、CertShikenのC-BW4H-2505問題集はIT領域の専門家達が長年の経験を活かして作成されたもので、試験の出題範囲を正確に絞ることができます。第二に、CertShikenのC-BW4H-2505問題集は実際試験に出題される可能性がある問題を全部含んでいます。第三に、CertShikenのC-BW4H-2505問題集は試験の一発合格を保証し、もし受験生が試験に失敗すれば全額返金のことができます。第四に、CertShikenのC-BW4H-2505問題集はPDF版とソフト版という二つのバージョンに分けています。この二つのバージョンを利用して、受験生の皆さんは試験の準備をするときにもっと楽になることができます。

SAP C-BW4H-2505 認定試験の出題範囲:

トピック	出題範囲
トピック 1	• Data Acquisition into SAP BW • 4HANA: This section tests how Data Engineers manage data integration into SAP BW • 4HANA from multiple sources. It covers essential knowledge of tools and processes used for data extraction, transformation, and loading into the SAP environment.
トピック 2	• Fundamentals: This section of the exam measures the foundational understanding of SAP Consultants and covers essential terms and concepts related to SAP BW • 4HANA and SAP Business Data Cloud. It focuses on the core framework and architecture necessary to navigate and work with these platforms.

トピック 3	• SAP BW Query Design: This section of the exam assesses the ability of Data Engineers to create and run queries using SAP BW • 4HANA. It evaluates how well candidates can work with query components to retrieve and structure data effectively for reporting and analysis.
トピック 4	• Data Acquisition into SAP HANA: This section evaluates the capacity of SAP Consultants to integrate various data sources into SAP HANA. It assesses their ability to understand different ingestion techniques and ensure data accessibility for processing.
トピック 5	• SAP BW • 4HANA Data Flow: This section of the exam measures the practical ability of SAP Consultants to load data within the SAP BW • 4HANA environment. It assesses familiarity with data movement and transformation processes across different layers of the system.
トピック 6	• SAP BW • 4HANA Modeling: This section targets the skills of Data Engineers in selecting appropriate modeling options and applying best practices like LSA++ within SAP BW • 4HANA. It focuses on designing scalable, high-performing data models.
トピック 7	• InfoObjects and InfoProviders: This section tests the knowledge of Data Engineers in working with InfoObjects and InfoProviders in SAP BW • 4HANA. It involves handling data structures used for organizing, storing, and accessing analytical data.

試験の準備方法-有効的なC-BW4H-2505最新な問題集試験-便利なC-BW4H-2505予想試験

お客様に最高のサービスを提供するというコンセプトに沿って、当社は専任のサービスチームと成熟した思慮深いサービスシステムを構築しました。クライアントがC-BW4H-2505トレーニング資料を購入する前に無料トライアルを提供するだけでなく、販売後に相談サービスも提供します。クライアントがC-BW4H-2505認定ガイドについて体系的かつ的を絞った学習を行えるように、複数の機能を提供しています。したがって、クライアントは間違いなくC-BW4H-2505試験の教材を信頼できます。

SAP Certified Associate - Data Engineer - SAP BW/4HANA 認定 C-BW4H-2505 試験問題 (Q25-Q30):

質問 # 25

You use a measure with semantic type "Amount with Currency Code" in your SAP HANA HDI calculation view. Which kind of currency reference can be assigned to the measure? Note: There are 2 correct answers to this question.

- A. Another column of the same SAP HANA view
- B. A variable in the same SAP HANA view
- C. A column from another SAP HANA view
- D. A fixed currency from table TCURC

正解: A、B

質問 # 26

The Database Explorer in the Web IDE for SAP HANA provides a data file import wizard to create a table in SAP HANA from a flat file. What are possible actions after the system suggests the target structure? Note:

There are 3 correct answers to this question.

- A. Adjust the suggested data type of the target table fields.

- B. Define sorting properties for a target table field.
- C. Change the order of the fields in the target table.
- D. Remove leading zeroes for a target table field.
- E. Switch the table type between row store and column store.

正解: A、C、D

質問 # 27

You are involved in an SAP BW/4HANA project focusing on General Ledger reporting want to use the SAP ERP standard DataSource OFI_GL_14 (New GL Items) which is not active in your SAP ERP system.

Which transactions can be used to activate this DataSource? Note: There are 2 correct answers to this question.

- A. Transaction RSDS (DataSource Repository) in the SAP BW/4HANA system
- B. Transaction RSA5 (Installation of DataSource from Business Content) in the SAP ERP system
- C. Transaction RSORBCT (Data Warehousing Workbench: BI Content) in the SAP BW/4HANA system
- D. Transaction RSA2 (DataSource Repository) in the SAP ERP system

正解: B、D

解説:

To activate a standard DataSource like OFI_GL_14 (New GL Items) in an SAP ERP system, you need to use transactions that are specifically designed for managing and activating DataSources within the ERP system.

Below is a detailed explanation of the correct answers:

* Explanation: This transaction is used in the SAP BW/4HANA system to activate or install BI Content objects such as InfoProviders, Transformations, and DTPs. However, it does not activate DataSources in the source SAP ERP system. Activation of DataSources must occur in the ERP system itself.

* RSORBCT is part of the BW/4HANA environment and is unrelated to activating DataSources in the ERP system.

Option B: Transaction RSA5 (Installation of DataSource from Business Content) in the SAP ERP system
Explanation: RSA5 is used in the SAP ERP system to activate standard DataSources delivered by SAP. When you run this transaction, you can search for and activate specific DataSources, such as OFI_GL_14, from the Business Content. This ensures that the DataSource becomes available for extraction.

Reference: RSA5 is a key transaction for enabling standard DataSources in SAP ERP systems. It is essential for preparing the ERP system to deliver data to SAP BW/4HANA.

Option C: Transaction RSA2 (DataSource Repository) in the SAP ERP system
Explanation: RSA2 provides access to the DataSource repository in the SAP ERP system. While it does not directly activate DataSources, it allows you to view, maintain, and manage the status of DataSources. You can also trigger the activation of DataSources from this transaction.

Reference: RSA2 is often used alongside RSA5 to verify the status of DataSources and ensure they are correctly configured for extraction.

Option D: Transaction RSDS (DataSource Repository) in the SAP BW/4HANA system
Explanation:

RSDS is used in the SAP BW/4HANA system to view and manage DataSources that have been replicated from the source system. However, it cannot activate DataSources in the SAP ERP system. Activation must occur in the ERP system using transactions like RSA5 or RSA2.

Reference: RSDS is limited to managing DataSources within the BW/4HANA environment and does not interact with the ERP system's DataSource activation process.

Summary To activate the OFI_GL_14 DataSource in the SAP ERP system:

RSA5: Activates standard DataSources from Business Content.

RSA2: Provides access to the DataSource repository and supports maintenance tasks.

These transactions ensure that the DataSource is properly enabled in the ERP system, allowing it to deliver data to SAP BW/4HANA.

質問 # 28

Why should you run an SAP HANA delta merge? Note: There are 2 correct answers to this question.

- A. To improve the read performance of InfoProviders
- B. To decrease memory consumption
- C. To combine the query cache from different executions
- D. To move the most recent data from disk to memory

正解: A、B

You create a DataStore object (advanced) using the "Data Mart DataStore Object" modeling property. Which behaviors are specific to this modeling property? Note: There are 2 correct answers to this question.

- 正解：A、C
