Our ACD201 learning guide is very efficient tool in the world. As is known to us, in our modern world, everyone is looking for to do things faster, better, smarter, so it is no wonder that productivity hacks are incredibly popular. So we must be aware of the importance of the study tool. In order to promote the learning efficiency of our customers, our ACD201 Training Materials were designed by a lot of experts from our company. Our ACD201 study materials will be very useful for all people to improve their learning efficiency.

Appian ACD201 Exam Syllabus Topics:

Topic	Details
Topic 1	• Performance and Scalability: This section of the exam measures the skills of Appian Developers and covers designing performant components, building memory-efficient models, conducting database load and automated testing, analyzing server memory and logs for risks, and resolving performance concerns for end users.
Topic 2	• Data Management: This section of the exam measures the skills of Solution Architects and covers designing and documenting data models, recommending record types for optimization and security, working with relational data, and implementing complex models with supporting objects.
Topic 3	• Application Design and Development: This section of the exam measures the skills of Appian Developers and covers translating business requirements into user stories, building end-to-end applications, managing object security, applying design best practices, and ensuring user-centric experiences through proper UX design.
Topic 4	• Advanced Appian Concepts: This section of the exam measures the skills of Solution Architects and covers creating and configuring authentication methods, setting up integration objects, designing APIs, evaluating smart services and plug-ins, and applying SSO mechanisms with SAML and LDAP.

Dumps ACD201 Download, Training ACD201 Kit

The cost for the registration of the certification is considerably expensive, it varies from 100$ to 1000$. That is why DumpStillValid has created budget-friendly and updated prep material compared to other websites that do not assure the passing of the exam. We also assure you that the sum won't be wasted, and you won't have to pay for the certification a second time. For customer satisfaction, we also offer you a demo version of the actual ACD201 Dumps so that you may check their validity before even buying them.

Appian Senior Developer Sample Questions (Q67-Q72):

NEW QUESTION # 67
A seamless user experience (UX) is important for an application so that a user does not feel like they are moving through different applications. Often when many developers are working on the same project all together, this can be a concern.
How should you ensure that a seamless UX is maintained throughout the app?

- A. Create and add reusable interface components to the Design Library so that developers can quickly and easily use reusable interfaces.
- B. Create reusable expression rules to ensure that the same rules are being used throughout.
- C. Allow each developer to copy client provided mock-ups individually.

Answer: A

Explanation:
Creating and adding reusable interface components to the Design Library ensures consistency in look and feel across the application, allowing all developers to easily implement a seamless user experience.

NEW QUESTION # 68
The synced record Task has a self-referential relationship defined in the column parentTaskId. There is a many-to-one record relationship between the id and parentTaskId called parentTask.
For a given task ID, you need to return the task name and the parent task name.
What should you do?

- A. Use a!queryRecordType() with a filter on the task id, with fields specified to return recordType!Task.name and recordType!Task.parentTask.name.
- B. Create a sync-time custom record field on the Task record called parentName. Specify this field to return in the query field selection.
- C. Use a!queryRecordType() filtered on the task id once to return the task name and parent task ID. Query the record again to return the parent task name.

Answer: A

Explanation:
Using a!queryRecordType() with a filter on the task ID and specifying both recordType!Task.name and
recordType!Task.parentTask.name in the fields will efficiently return both the task name and its parent task name in a single query.

NEW QUESTION # 69
You're building an application with a review workflow.
Each submission must be approved by three users who can each approve or reject their request, and leave a comment. This action changes the status of the submission to 'Approved' or 'Rejected' correspondingly, and pushes the review to the previous or next assignee.
Which data model captures the workflow requirements appropriately?

- A. Two tables:
  Review with columns id, statusId, comment, user1, user2, user3
  Ref Status with columns id, value
- B. Three tables:
  Review to store id, statusId, comment
  Ref Status with columns id, value
  Review User with columns id, reviewId, user
- C. Two tables:
  Review with columns id, statusId, comment, user
  Ref Status with columns id, value

Answer: B

Explanation:
Using three tables - Review, Ref Status, and Review User - enables you to track each user's approval or rejection, comments, and

status changes for each review, supporting a flexible, normalized workflow for multiple reviewers.

NEW QUESTION # 70
You need to connect to an external system using OAuth 2.0: SAML Bearer Assertion Flow authentication type, which requests access to an API on of a signed in user.
This standard has several steps involved with the SAML Bearer Assertion Flow.
Which two steps should you perform to connect to the external system? (Choose two.)

- A. Configure SAML for single sign-on (SSO).
- B. Generate a service account key in third-party systems.
- C. Use an a!authorizationLink() on the relevant interface.
- D. Register the connection in the third-party system

Answer: A,D

Explanation:
Configure SAML for single sign-on (SSO).
The bearer-assertion flow relies on an existing SAML SSO configuration so Appian can issue a signed SAML assertion on behalf of the signed-in user.
Register the connection in the third-party system.
You must register (or "trust") Appian's client/certificate with the external system so it will accept the SAML assertion and issue an OAuth 2.0 access-token for the user.

NEW QUESTION # 71
You're redesigning user interfaces to achieve more efficient space usage.
Which layout component is the best choice for displaying an interface with a vertical meaningful order of components?

- A. a!sideBySideLayout()
- B. a!columnsLayout()
- C. a!cardLayout()

Answer: B

Explanation:
a!columnsLayout() is best for organizing and displaying components in a vertical order with efficient space usage, as it supports arranging items in structured, responsive columns.

NEW QUESTION # 72
......

If you buy online classes, you will need to sit in front of your computer on time at the required time; if you participate in offline counseling, you may need to take an hour or two of a bus to attend class. But if you buy ACD201 test guide, things will become completely different. Unlike other learning materials on the market, Appian Senior Developer torrent prep has an APP version. You can download our app on your mobile phone. And then, you can learn anytime, anywhere. Whatever where you are, whatever what time it is, just an electronic device, you can do exercises. With Appian Senior Developer torrent prep, you no longer have to put down the important tasks at hand in order to get to class; with ACD201 Exam Questions, you don't have to give up an appointment for study.
