主題 4	<ul style="list-style-type: none"> Manage compliance by using Microsoft Purview: Implementation of Microsoft Purview information protection and data lifecycle management is discussed in this topic. Moreover, questions about implementing Microsoft Purview data loss prevention (DLP) also appear.

最新的 Microsoft 365 Certified MS-102 免費考試真題 (Q335-Q340):

問題 #335

You have a Microsoft 365 E5 subscription that includes the following active eDiscovery case:

Name: Case1

Included content: Group1, User1, Site1

Hold location: Exchange mailboxes, SharePoint sites, Exchange public folders The investigation for Case1 completes, and you close the case.

What occurs after you close Case1? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Holds are turned off for:

A screenshot of a dropdown menu. The text 'Holds are turned off for:' is to the left. The dropdown menu is open, showing three options: 'User1 only', 'All locations', and 'Site1 and Group1 only'. A watermark 'pdfexamdumps.com' is visible across the image.

Holds are placed on a delay hold for:

A screenshot of a dropdown menu. The text 'Holds are placed on a delay hold for:' is to the left. The dropdown menu is open, showing three options: '30 days', '90 days', and '120 days'. A watermark 'pdfexamdumps.com' is visible across the image.

答案:

解題說明:

Holds are turned off for:

A screenshot of a dropdown menu. The menu is open, showing three options: "User1 only", "All locations", and "Site1 and Group1 only". The "All locations" option is highlighted with a dashed green box.

Holds are placed on a delay hold for:

A screenshot of a dropdown menu. The menu is open, showing three options: "30 days", "90 days", and "120 days". The "30 days" option is highlighted with a dashed green box. A Microsoft logo is visible in the bottom left corner of the screenshot.

Explanation

Graphical user interface, text, application Description automatically generated

Holds are turned off for:

A screenshot of a dropdown menu. The menu is open, showing three options: "User1 only", "All locations", and "Site1 and Group1 only". The "All locations" option is highlighted with a grey background.

Holds are placed on a delay hold for:

A screenshot of a dropdown menu. The menu is open, showing three options: "30 days", "90 days", and "120 days". The "30 days" option is highlighted with a grey background. A Microsoft logo is visible in the bottom left corner of the screenshot.

問題 #336

You have a Microsoft 365 E5 subscription that contains a user named User1 and the administrators shown in the following table. User1 reports that after sending 1,000 email messages in the morning, the user is blocked from sending additional emails. You need to identify the following:

* Which administrators can unblock User1

* What to configure to allow User1 to send at least 2,000 emails per day without being blocked What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Microsoft Defender

Settings > Cloud apps

System

- About
- Organization details
- Mail settings
- Scoped deployment and privacy
- Preview Features
- IP address ranges
- User groups
- API tokens
- SIEM agents
- Playbooks

pdfexamdumps.com

答案:

解題說明:

Microsoft Defender

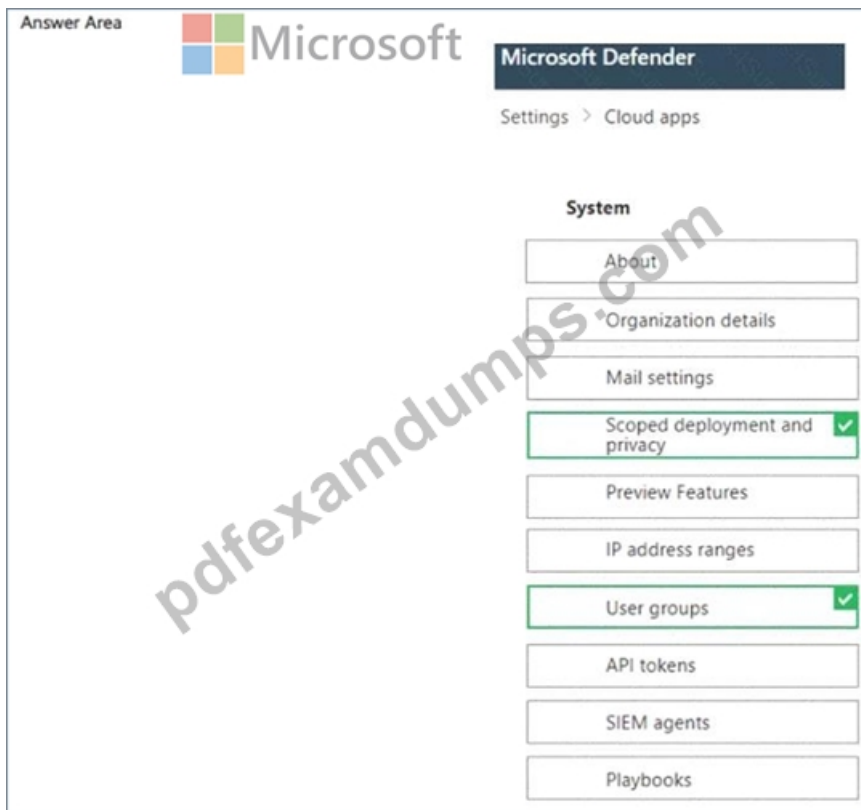

Settings > Cloud apps

System

- About
- Organization details
- Mail settings
- Scoped deployment and privacy ✓
- Preview Features
- IP address ranges
- User groups ✓
- API tokens
- SIEM agents
- Playbooks

Explanation:

問題 #337

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an on-premises Active Directory domain named contoso.com. The domain contains the users shown in the following table.

Name	UPN suffix
User1	Contoso.com
User2	fabrikam.com

The domain syncs to an Azure AD tenant named contoso.com as shown in the exhibit. (Click the Exhibit tab.)

PROVISION FROM ACTIVE DIRECTORY

Azure AD Connect cloud provisioning

This feature allows you to manage provisioning from the cloud.

[Manage provisioning \(Preview\)](#)

Azure AD Connect sync

Sync Status	Enabled
Last Sync	Less than 1 hour ago
Password Hash Sync	Enabled

USER SIGN-IN

Federation	Disabled	0 domains
Seamless single sign-on	Enabled	1 domain
Pass-through authentication	Enabled	2 agents

User2 fails to authenticate to Azure AD when signing in as user2@fabrikam.com.

You need to ensure that User2 can access the resources in Azure AD.

Solution: From the Microsoft Entra admin center, you assign User2 the Security Reader role. You instruct User2 to sign in as user2@contoso.com.

Does this meet the goal?

- A. Yes
- B. No

答案: B

解題說明:

This is not a permissions issue so you do not need to assign the Security Reader role.

The on-premises Active Directory domain is named contoso.com. User2 could sign on as user2@contoso.com but you would first need to change the UPN of User2 to user2@contoso.com.

問題 #338

You have a Microsoft 365 E5 tenant.

You configure a device compliance policy as shown in the following exhibit.

Compliance settings [Edit](#)

Microsoft Defender ATP

Require the device to be at or under the machine risk score: **Low**

Device Health

Rooted devices **Block**
Require the device to be at or under the Device Threat Level

System Security

Require a password to unlock mobile devices **Require**
Required password type **Microsoft**
Encryption of data storage on device. **Require**
Block apps from unknown sources **Block**

Actions for noncompliance [Edit](#)

Action	Schedule
Mark device noncompliant	Immediately
Retire the noncompliant device	Immediately

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

The screenshot shows two configuration items with dropdown menus:

- Statement: "When a device reports a medium threat level, the device will" followed by a dropdown menu with options: "be locked remotely", "display a notification", "marked as compliant", "marked as noncompliant", and "removed from the database".
- Statement: "Rooted devices will be" followed by a dropdown menu with options: "allowed to access company resources", "marked as compliant", "prevented from accessing company resources", and "reported with a low device threat".

答案:

解題說明:

When a device reports a medium threat level, the device will

- be locked remotely
- display a notification
- marked as compliant
- marked as noncompliant
- removed from the database

Rooted devices will be

- allowed to access company resources
- marked as compliant
- prevented from accessing company resources
- reported with a low device threat

Explanation:

When a device reports a medium threat level, the device will

- be locked remotely
- display a notification
- marked as compliant
- marked as noncompliant
- removed from the database

Rooted devices will be

- allowed to access company resources
- marked as compliant
- prevented from accessing company resources
- reported with a low device threat

問題 #339

You have a Microsoft 365 E5 subscription that uses Microsoft Intune and contains the devices shown in the following table.

Name	Platform	Intune
Device1	iOS	Enrolled
Device2	macOS	Not enrolled

You need to onboard Device1 and Device2 to Microsoft Defender for Endpoint.

What should you use to onboard each device? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Device1: Microsoft Endpoint Manager

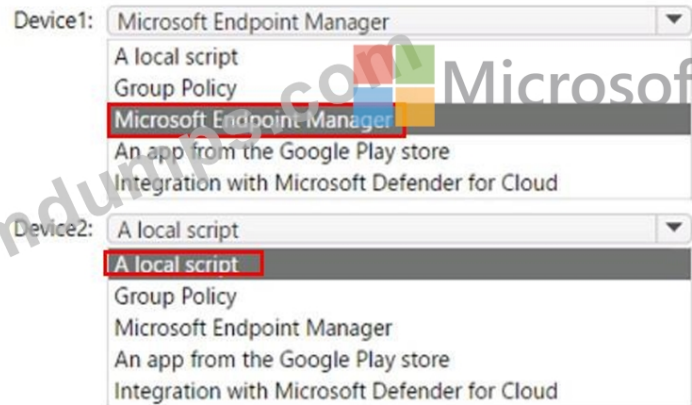

- A local script
- Group Policy
- Microsoft Endpoint Manager
- An app from the Google Play store
- Integration with Microsoft Defender for Cloud

Device2: A local script

- A local script
- Group Policy
- Microsoft Endpoint Manager
- An app from the Google Play store
- Integration with Microsoft Defender for Cloud
