Pegasystems Certified Pega Lead System Architecture (LSA) Exam 23 Sample Questions (Q35-Q40):

NEW QUESTION # 35
When App Studio is used, in which schema is a data type table created?

- A. PegaDATA schema
- B. ClientData schema
- C. CustomerData schema
- D. PegaRULES schema

Answer: C

NEW QUESTION # 36
What is the primary goal of designing and automating testing strategies? (Select all that apply)

- A. Minimizing the need for code reviews and inspections.
- B. Reducing the time and effort required for manual testing.
- C. Ensuring that no defects are present in the software.
- D. Facilitating faster and more reliable releases.
- E. Eliminating the need for end-user acceptance testing (UAT).

Answer: B,C,D

NEW QUESTION # 37
What user type would exclusively use App Studio?

- A. Citizen Developers
- B. Application developers
- C. Technical architects
- D. Lead System Architects

Answer: A

NEW QUESTION # 38

In the design of Pega enterprise applications, the Lead System Architect must prioritize Microjourneys according to Pega Express best practices. Which two of the following statements accurately describe the concept of Microjourneys in Pega implementations? (Choose Two)

- A. Microjourneys represent the life cycles, or units of work, that yield a significant outcome for customers and users.
- B. Microjourneys are the life cycles, or units of work, that yield a significant reusable asset for citizen developers to improvise the functionality.
- C. Microjourneys are data objects in the overall customer journey that achieve all or a subset of the required data manipulations.
- D. Microjourneys constitute a segment of the overall customer journey that accomplishes all or a subset of the necessary business outcomes.

Answer: A,D

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
Microjourneys are a core concept in Pega Express, as taught in Pega Academy's Application Design Mission and the Pega Certified Lead System Architect Study Guide. They represent focused, outcome-driven segments of a customer journey, designed to deliver value quickly and align with business objectives.
* Option A (Correct): Microjourneys are segments of the customer journey that accomplish specific business outcomes, such as completing a loan application or resolving a complaint. This aligns with Pega Express's focus on breaking down complex journeys into manageable parts, as outlined in the Microjourney Design module.
* Option B (Correct): Microjourneys represent case life cycles or units of work that deliver significant outcomes for customers and users, such as approving a claim or onboarding a client. This is a key principle of Pega's case-centric design, per the Application Design module.
* Option C (Incorrect): Microjourneys are not about creating reusable assets for citizen developers.
While reusable assets may support Microjourneys, their primary purpose is delivering business outcomes, not enabling improvisation, as clarified in the Pega Express guidelines.
* Option D (Incorrect): Microjourneys are not data objects; they are process-driven case life cycles, not data manipulation constructs. Data objects support Microjourneys but are distinct, per the Data Modeling module.
:
Pega Academy: Application Design Mission (covers Microjourneys and Pega Express).
Pega Community: Microjourney Design (details on outcome-driven design).
Pega Certified Lead System Architect Study Guide (v23): Section on Application Design (emphasizes Microjourneys).

NEW QUESTION # 39

Which of the following are considered production deployment best practices? (Select all that apply)

- A. Performing deployments during peak business hours to reduce downtime.
- B. Conducting thorough testing in a production-like environment before deployment.
- C. Implementing rollback mechanisms to revert to the previous version if issues arise.
- D. Manually applying changes directly to the production environment.
- E. Using version control to track changes and manage releases.

Answer: B,C,E
