Oracle Guided Learning Project Management Foundations Associate - Rel 1 Sample Questions (Q65-Q70):

NEW QUESTION # 65
What inputs should be considered when defining your OGL project scope and timelines?

- A. Fusion quarterly release schedule
- B. Email reminders from OGL console
- C. Availability of test user accounts
- D. Team member work schedules

Answer: A

Explanation:
The Fusion quarterly release schedule (option A) is a critical input for defining OGL project scope and timelines, as it dictates

content updates and testing windows. Email reminders (option B), test user availability (option C), and team schedules (option D) are secondary or logistical, not scope-defining. The release schedule ensures alignment with application changes, anchoring the project's temporal framework.

NEW QUESTION # 66
Which of the following is an example of licensed OGL content?

- A. Fusion role mapping
- B. Base guides
- C. Display groups
- D. Process guides
- E. Machine translations

Answer: D

Explanation:
Process Guides (option B) are a prime example of licensed OGL content, provided as prebuilt, Oracle-authored resources within the Oracle Content library. Base Guides (option C) are also licensed but less specific as a standalone answer here, while machine translations (option A), display groups (option D), and Fusion role mapping (option E) are either features or configurations, not content types. Process Guides offer standardized process documentation, reflecting Oracle's licensed offerings to support implementations, making them a clear fit.

NEW QUESTION # 67
Which of the following is not an OGL console role?

- A. Developer
- B. Viewer
- C. Owner
- D. Editor
- E. Analyst

Answer: E

Explanation:
OGL console roles include Owner, Viewer, Developer, and Editor, each with specific permissions. "Analyst" is not a standard OGL role, making it the correct answer.

NEW QUESTION # 68
In the Refine phase, what is the Project Manager responsible for?

- A. Creating a project plan and timeline
- B. Publishing OGL in the production environment
- C. Building and testing custom guides

Answer: A

NEW QUESTION # 69
What type of content can give you advice, best practices, and important documents from the My Oracle Support team?

- A. Oracle Content
- B. Process Guides
- C. Smart Tips

Answer: A

Explanation:
Oracle Content is a prebuilt content library within OGL that includes advice, best practices, and critical documentation sourced from

the My Oracle Support (MOS) team. This library is designed to provide standardized, authoritative resources that save time and ensure consistency across implementations. Smart Tips (option A) are brief, contextual aids for specific actions, not comprehensive documents or best practices from MOS. Process Guides (option B) outline workflows but are typically part of broader content types and not explicitly tied to MOS deliverables. Oracle Content stands out as it integrates MOS resources-like configuration guides, "how-to" articles, and support documentation-making it a go-to for project teams needing reliable, Oracle-endorsed materials. This content type enhances efficiency by centralizing access to expertly curated information, distinguishing it from user-generated or narrowly focused content.
