EC-COUNCIL 712-50 Test Testking | Mock 712-50 Exams

Our product's passing rate is 99% which means that you almost can pass the test with no doubts. The reasons why our 712-50 study materials' passing rate is so high are varied. Firstly, our test bank includes two forms and they are the PDF test questions which are selected by the senior lecturer, published authors and professional experts and the practice test software which can test your mastery degree of our 712-50 Study Materials at any time. The two forms cover the syllabus of the entire test. Our questions and answers include all the questions which may appear in the exam and all the approaches to answer the questions. So we provide the strong backing to help clients to help them pass the test.

EC-COUNCIL EC-Council Certified CISO (CCISO) Sample Questions (Q284-Q289):

NEW QUESTION # 284

Quantitative Risk Assessments have the following advantages over qualitative risk assessments:

- A. They are objective and can express risk / cost in real numbers
- B. They are subjective and can be completed more quickly
- C. They are objective and express risk / cost in approximates
- D. They are subjective and can express risk / cost in real numbers

Answer: A

NEW QUESTION # 285

What is the MOST critical output of the incident response process?

- A. Lessons learned from the incident, so they can be incorporated into the incident response processes
- B. A complete document of all involved team members and the support they provided
- C. Clearly defined documents detailing standard evidence collection and preservation processes
- D. Recovery of all data from affected systems

Answer: A

Explanation:

The most critical output of the incident response process is the lessons learned. These lessons help refine incident response plans, prevent recurrence, and improve organizational resilience. While documenting team activities, recovering data, and detailing evidence processes (A, B, D) are important, they do not provide the proactive improvement that lessons learned offer for future incident handling.

NEW QUESTION # 286

Which of the following areas are beyond the duties of the CISO?

- A. Information Technology (IT) portfolio management
- B. Cybersecurity policy
- C. IT security compliance
- D. Network monitoring

Answer: A

NEW QUESTION # 287

The Security Operations Center (SOC) just purchased a new intrusion prevention system (IPS) that needs to be deployed in-line for best defense. The IT group is concerned about putting the new IPS in-line because it might negatively impact network availability. What would be the BEST approach for the CISO to reassure the IT group?

- A. Explain to the IT group that the IPS will fail open once in-line however it will be deployed in monitor mode for a set period of time to ensure that it doesn't block any legitimate traffic
- B. Explain to the IT group that the IPS won't cause any network impact because it will fail open
- C. Explain to the IT group that this is a business need and the IPS will fail open however, if there is a network failure the CISO will accept responsibility
- D. Work with the IT group and tell them to put IPS in-line and say it won't cause any network impact

Answer: A

Explanation:

* Deploying the IPS in monitor mode first allows the SOC to assess its behavior and ensure it does not block legitimate traffic, addressing IT's concerns about network availability.

* Configuring the IPS to fail open ensures that in the event of a failure, the network remains operational.

Why Other Options Are Less Effective:

* A. Simply assert no network impact: This approach does not provide tangible reassurance or evidence to address concerns.

* B. Fail open alone: Focusing only on the fail-open capability does not address IT's concerns about testing or monitoring.

* C. Accept responsibility for failure: While demonstrating accountability, this approach does not mitigate risks proactively.

EC-Council CISO Reference: The curriculum emphasizes collaboration with IT teams and phased deployment strategies, such as using monitor mode, to ensure smooth implementation of new technologies without operational disruption.

NEW QUESTION # 288

Which business stakeholder is accountable for the integrity of a new information system?

- A. Board of directors
- B. Compliance Officer
- C. Project manager

- D. CISO

Answer: D
