

Dumps NS0-185 Discount & Reliable NS0-185 Exam Price

DOWNLOAD the newest ExamCost NS0-185 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=12Z2xRqSFU0B-mFOl5YJNa7Us12E085Gd>

Preparing for the exam may be not an easy thing for some candidates, if you choose us, we will do the things for you, what you need to do is practicing. We offer you free demo for NS0-185 training materials, you can have a try before buying. And you will receive the downloading link and password within ten minutes after purchasing the NS0-185 Exam Dumps. In addition, we have after-service stuff to resolve the confusions you have. If you fail to pass the exam, we are money back guaranteed, or if you have other exam to attend, we can also replace other 2 valid exam dumps for you.

Network Appliance NS0-185 Exam Syllabus Topics:

Section	Weight	Objectives
---------	--------	------------

Configuration and Administration	30-35%	- Storage Configuration
		• 1. Aggregate creation and management • 2. Storage efficiency features (deduplication, compression) • 3. Volume creation and configuration
		- Network Configuration
		• 1. Storage VM (SVM) configuration • 2. IPspace and broadcast domains • 3. Physical port assignment • 4. VLAN configuration
		- Data Access Configuration
Upgrade, Migration and Troubleshooting	20-25%	• 1. LUN mapping and igroup management • 2. NAS protocol setup (NFS, SMB/CIFS) • 3. SAN protocol setup (iSCSI, FC)
		- ONTAP Software Updates
		• 1. Upgrade best practices and procedures • 2. Version compatibility verification • 3. Rolling upgrade methodology
		- Data Migration
		• 1. NDMP backup and restore • 2. SnapMirror and data replication • 3. Volume move and migration tools
Security and High Availability	15-20%	- Troubleshooting
		• 1. Common installation issues • 2. NetApp Support tools utilization • 3. Log analysis and debug collection • 4. Hardware diagnostic commands
		- High Availability Setup
		• 1. Failover and giveback procedures • 2. Multi-path HA configuration • 3. HA pair configuration
		- Security Features
Installation and Initialization	20-25%	• 1. Encryption at rest and in transit • 2. Authentication and authorization • 3. Role-based access control (RBAC)
		- Initial Setup Procedures
		• 1. Initial cluster setup wizard • 2. Boot mode selection and configuration • 3. Factory-configured mode installation
		- Pre-installation Planning
		• 1. Network and cabling requirements • 2. Site preparation requirements • 3. Hardware compatibility verification

Reliable Network Appliance NS0-185 Exam Price | NS0-185 Free Dump Download

ExamCost delivers up to date NS0-185 exam products and modify them time to time. Latest NS0-185 exam questions are assembled in our practice test modernizes your way of learning and replaces the burdensome preparation techniques with flexible learning. We accord you an actual exam environment simulated through our practice test sessions that proves beneficial for NS0-185 Exams preparation. Our NS0-185 practice tests provide you knowledge and confidence simultaneously. Candidates who run across the extensive search, ExamCost products are the remedy for their worries. Once you have chosen for our NS0-185 practice test products, no more resources are required for exam preparation.

Network Appliance NetApp Storage Installation Engineer, ONTAP Professional Exam Sample Questions (Q34-Q39):

NEW QUESTION # 34

You are deploying a cluster with four AFF A300 nodes and Cisco 3232C switches. When you arrive at the customer's site, you notice that there are multiple breakout cables and four Cisco 3232C switches. In this scenario, which statement is true?

- A. Your customer ordered a MetroCluster IP configuration.
- B. A 4-node cluster requires four switches.
- C. Cisco best practices require four switches.
- D. Two switches are required for cluster and two for management.

Answer: A

NEW QUESTION # 35

You are expanding an existing cluster that uses BES-53248 cluster interconnect switches. You connected the new controllers to ports 0/17 through 0/20. However, you are unable to join the new nodes to the cluster. Which action must be taken to solve the problem?

- A. Install the CSHM configuration file.
- B. Reboot the controllers.
- C. Install the reference configuration file.
- D. Install the license file.

Answer: C

Explanation:

Broadcom BES-53248 cluster interconnect switches require a Reference Configuration File (RCF) to define supported port roles, speeds, breakout behavior, ISLs, and node-facing ports. By default, only a subset of ports is enabled for cluster connectivity. Ports 0/17 through 0/20 are not active for node connections unless explicitly configured by the correct RCF.

When new controllers are cabled to ports that are not enabled or correctly configured for cluster interconnect traffic, the ONTAP nodes cannot establish cluster LIF communication and therefore cannot join the cluster.

Installing the correct RCF configures these ports with the required VLANs, MTU, flow control, and speed settings so that cluster traffic can pass.

A license file is not required for basic cluster interconnect functionality. The Cluster Switch Health Monitor (CSHM) configuration file enables monitoring, not port functionality. Rebooting controllers does not resolve switch-side configuration issues.

Therefore, installing the reference configuration file is the required corrective action.

NEW QUESTION # 36

You have completed a NetApp ONTAP installation and the customer asks you how they can open a PI case with NetApp Support. In this scenario, what should you tell the customer?

- A. Request a call back using the autosupport trigger command.

- B. Contact NetApp Support online at mysupport.netapp.com.
- C. Contact support through the NetApp Digital Advisor.
- D. Use the telephone to call NetApp Support.

Answer: B

Explanation:

NEW QUESTION # 37

You are preparing to physically install a new AFF A400 cluster into a customer's racks. All equipment has been delivered to the customer's site. Which three tools do you need to complete this installation? (Choose three.)

- A. cable management tray
- B. additional network cables
- C. Phillips #2 screwdriver
- D. laptop computer
- E. slide rail kit

Answer: B,C,D

Explanation:

NEW QUESTION # 38

After the successful installation of a NetApp ONTAP cluster, the customer wants to know how to view telemetry data. The customer also wants to receive online information about any risks with the cluster and potential best-practice gaps. Which tool satisfies the customer's requirements?

- A. Cloud Manager
- B. Spot by NetApp
- C. Active IQ Digital Advisor
- D. Interoperability Matrix Tool

Answer: C

Explanation:
