High Quality CIPT Test Prep Helps You Pass the Certified Information Privacy Technologist (CIPT) Exam Smoothly

As a responsible company with great reputation among the market, we trained our staff and employees with strict beliefs to help you with any problems about our CIPT Learning materials 24/7. Even you have finished buying activity with us, we still be around you with considerate services on the CIPT Exam Questions. And we will update our CIPT training guide from time to time, once we update our CIPT study guide, we will auto send it to our customers. And you can enjoy our updates of CIPT learning prep for one year after your payment.

The CIPT exam is designed for IT professionals who work in organizations that handle sensitive data, such as healthcare providers,

financial institutions, and government agencies. CIPT exam is also suitable for professionals who work in consulting firms, law firms, and technology companies that provide privacy-related services. The CIPT certification program provides a comprehensive understanding of privacy laws and regulations, as well as the technical skills needed to implement effective privacy programs. By earning the CIPT Certification, IT professionals can demonstrate their expertise in privacy and enhance their career opportunities in the field of information technology.

IAPP Certified Information Privacy Technologist (CIPT) Sample Questions (Q128-Q133):

NEW QUESTION # 128

It is important for a privacy technologist to understand dark patterns. In order to reduce the risk of which of the following?

- A. Illicit collection of personal data.
- B. Breaches of an individual's data.
- C. Manipulation of a user's choice.
- D. Discrimination from profiling.

Answer: C

Explanation:

It is important for a privacy technologist to understand dark patterns in order to reduce the risk of manipulation of a user's choice. Dark patterns are user interface design choices that are intended to manipulate users into taking actions they might not otherwise take.

NEW QUESTION # 129

SCENARIO

Clean-Q is a company that offers house-hold and office cleaning services. The company receives requests from consumers via their website and telephone, to book cleaning services. Based on the type and size of service, Clean-Q then contracts individuals that are registered on its resource database - currently managed in-house by Clean-Q IT Support. Because of Clean-Q's business model, resources are contracted as needed instead of permanently employed.

The table below indicates some of the personal information Clean-Q requires as part of its business operations:

□ Clean-Q has an internal employee base of about 30 people. A recent privacy compliance exercise has been conducted to align employee data management and human resource functions with applicable data protection regulation. Therefore, the Clean-Q permanent employee base is not included as part of this scenario.

With an increase in construction work and housing developments, Clean-Q has had an influx of requests for cleaning services. The demand has overwhelmed Clean-Q's traditional supply and demand system that has caused some overlapping bookings.

In a business strategy session held by senior management recently, Clean-Q invited vendors to present potential solutions to their current operational issues. These vendors included Application developers and Cloud-Q's solution providers, presenting their proposed solutions and platforms.

The Managing Director opted to initiate the process to integrate Clean-Q's operations with a cloud solution (LeadOps) that will provide the following solution on a single online platform: A web interface that Clean-Q accesses for the purposes of resource and customer management. This would entail uploading resource and customer information.

* A customer facing web interface that enables customers to register, manage and submit cleaning service requests online.

* A resource facing web interface that enables resources to apply and manage their assigned jobs.

* An online payment facility for customers to pay for services.

If Clean-Q were to utilize LeadOps' services, what is a contract clause that may be included in the agreement entered into with LeadOps?

- A. A provision that allows Clean-Q to conduct audits of LeadOps' information processing and information security environment, at LeadOps' cost and at any time that Clean-Q requires.
- B. A provision that holds LeadOps liable for a data breach involving Clean-Q's information.
- C. A provision prescribing technical and organizational controls that LeadOps must implement.
- D. A provision that requires LeadOps to notify Clean-Q of any suspected breaches of information that involves customer or resource information managed on behalf of Clean-Q.

Answer: D

Explanation:

When engaging with a cloud service provider like LeadOps, it's critical to include specific clauses in the contract to ensure the protection and management of personal information. Here's why a notification clause is essential:

- * **Data Breach Notification:** A provision requiring LeadOps to notify Clean-Q of any suspected breaches ensures that Clean-Q can take immediate action to mitigate any potential damage, inform affected individuals, and comply with regulatory obligations.
- * **Regulatory Compliance:** Many data protection regulations, such as GDPR and CCPA, mandate timely notification of data breaches to both the regulatory authorities and the affected individuals. Including this clause ensures compliance with such laws.
- * **Risk Management:** Prompt notification allows Clean-Q to manage and address any risks associated with the breach, including public relations issues and potential legal liabilities.
- * **Transparency and Accountability:** This clause promotes transparency and accountability, ensuring that LeadOps maintains a high standard of data security and is responsible for informing Clean-Q about any security incidents.

Reference: The IAPP Information Privacy Technologist documentation emphasizes the importance of data breach notification clauses in contracts with third-party service providers to ensure regulatory compliance and effective risk management.

NEW QUESTION # 130

Many modern vehicles incorporate technologies that increase the convenience of drivers, but collect information about driver behavior in order to Implement this. What should vehicle manufacturers prioritize to ensure enhanced privacy protection for drivers?

- A. Provide easy to read, in-vehicle instructions about how to use the technology.
- B. Share the sensitive data collected about driver behavior with the driver.
- C. Derive implicit consent for the processing of sensitive data by the continued use of the vehicle.
- **D. Obtain affirmative consent for processing of sensitive data about the driver.**

Answer: D

Explanation:

vehicle manufacturers should prioritize obtaining affirmative consent for processing sensitive data about drivers in order to ensure enhanced privacy protection. Affirmative consent involves obtaining explicit agreement from individuals before collecting or processing their personal data.

NEW QUESTION # 131

SCENARIO

WebTracker Limited is a cloud-based online marketing service located in London. Last year, WebTracker migrated its IT infrastructure to the cloud provider AmaZure, which provides SQL Databases and Artificial Intelligence services to WebTracker. The roles and responsibilities between the two companies have been formalized in a standard contract, which includes allocating the role of data controller to WebTracker.

The CEO of WebTracker, Mr. Bond, would like to assess the effectiveness of AmaZure's privacy controls, and he recently decided to hire you as an independent auditor. The scope of the engagement is limited only to the marketing services provided by WebTracker, you will not be evaluating any internal data processing activity, such as HR or Payroll.

This ad-hoc audit was triggered due to a future partnership between WebTracker and SmartHome - a partnership that will not require any data sharing. SmartHome is based in the USA, and most recently has dedicated substantial resources to developing smart refrigerators that can suggest the recommended daily calorie intake based on DNA information. This and other personal data is collected by WebTracker.

To get an idea of the scope of work involved, you have decided to start reviewing the company's documentation and interviewing key staff to understand potential privacy risks.

The results of this initial work include the following notes:

- * There are several typos in the current privacy notice of WebTracker, and you were not able to find the privacy notice for SmartHome.
- * You were unable to identify all the sub-processors working for SmartHome. No subcontractor is indicated in the cloud agreement with AmaZure, which is responsible for the support and maintenance of the cloud infrastructure.
- * There are data flows representing personal data being collected from the internal employees of WebTracker, including an interface from the HR system.
- * Part of the DNA data collected by WebTracker was from employees, as this was a prototype approved by the CEO of WebTracker.
- * All the WebTracker and SmartHome customers are based in USA and Canada.

Based on the initial assessment and review of the available data flows, which of the following would be the most important privacy risk you should investigate first?

- A. Confirm whether the data transfer from London to the USA has been fully approved by AmaZure and the appropriate institutions in the USA and the European Union.
- **B. Evaluate and review the basis for processing employees' personal data in the context of the prototype created by**

WebTracker and approved by the CEO.

- C. Verify that WebTracker's HR and Payroll systems implement the current privacy notice (after the typos are fixed).
- D. Review the list of subcontractors employed by AmaZure and ensure these are included in the formal agreement with WebTracker.

Answer: B

NEW QUESTION # 132

Which of the following suggests the greatest degree of transparency?

- A. A privacy notice accommodates broadly defined future collections for new products.
- B. After reading the privacy notice, a data subject confidently infers how her information will be used.
- C. A privacy disclosure statement clearly articulates general purposes for collection
- D. The data subject has multiple opportunities to opt-out after collection has occurred.

Answer: B

Explanation:

After reading the privacy notice, a data subject confidently infers how her information will be used suggests the greatest degree of transparency³
