It ensures that candidates understand how the framework standardizes compliance and risk management processes.</li> </ul>

## Excellent Web-Based HITRUST CCSFP Practice Exam

In this age of knowledge competition, we must keep up with the pace of the times, otherwise we will be eliminated. How to improve your ability and how to prove your ability is crucial. The answer is CCSFP Certification can help you prove your strength and increase social competitiveness. Although it is not an easy thing for somebody to pass the exam, but our CCSFP Exam Torrent can help aggressive people to achieve their goals. This is the reason why we need to recognize the importance of getting the test CCSFP certification.

### HITRUST Certified CSF Practitioner 2025 Exam Sample Questions (Q48-Q53):

#### NEW QUESTION # 48

An r2 Requirement Statement that scores at a 37 would yield which result?

- A. Function Gap
- **B. Gap with possible required CAP**
- C. No Gap
- D. HITRUST Certification
- E. Risk Acceptance

**Answer: B**

Explanation:

HITRUST uses a scoring scale from 0 to 100, with categories for Fully Compliant, Mostly Compliant, Partially Compliant, Somewhat Compliant, and Non-Compliant. A score of 37 falls into the "Somewhat Compliant" category. This reflects significant weaknesses in Policy, Procedure, or Implementation maturity levels. Such a low score indicates a gap that must be addressed. Depending on whether the control is required for certification, HITRUST may require a Corrective Action Plan (CAP). CAPs are required when certification-critical controls score below thresholds (e.g., Implementation not at 100% where required). Therefore, a Requirement Statement score of 37 would be treated as a gap with a possible required CAP, depending on its criticality within the certification process.

#### NEW QUESTION # 49

In an i1 assessment a Control Reference score of 62 would yield which result?

- **A. A required CAP for all gaps within the associated Requirement Statements**
- B. A Control Reference gap
- C. An optional CAP for all gaps within the associated Requirement Statements
- D. A HITRUST certification

**Answer: A**

Explanation:

In an i1 assessment, scoring follows a pass/fail logic tied to CAP requirements. If a Control Reference scores below the defined threshold (typically 83 for i1 assessments), any gaps within its requirement statements must be addressed with a required Corrective Action Plan (CAP). A score of 62 is below the threshold, meaning it cannot be accepted without remediation. This ensures organizations remediate key cybersecurity hygiene gaps, even in a moderate assurance assessment. Optional CAPs are not used in i1 assessments, as the assurance program emphasizes mandatory remediation for below-threshold controls. Certification cannot be granted with unresolved required CAPs. Therefore, the correct outcome for a score of 62 in an i1 Control Reference is a required CAP.

#### NEW QUESTION # 50

What are HITRUST Assurance Advisories designed to provide? (Select all that apply) [0051]

- A. Updates related to the HITRUST Assurance Program
- B. End-of-Life progression for older framework versions
- C. Solicitations for assessor input
- D. List of all new and updated authoritative sources associated with a framework version update
- E. All of the above

**Answer: A,B,C,D,E**

Explanation:

HITRUST Assurance Advisories (HAAs) are official communications issued by HITRUST to:

Provide program updates.

Communicate framework updates (new/updated authoritative sources).

Define end-of-life progression for older framework versions.

Occasionally solicit assessor input or feedback.

Thus, they serve as a broad communication tool covering all listed items.

Extract Reference (HITRUST CSF Assurance Program Guidance [0051]):

Assurance Advisories communicate program updates, authoritative source changes, version end-of-life details, and solicit input from stakeholders.

#### NEW QUESTION # 51

Which version of the CSF supports a traversable requirement statement portfolio?

- A. v9.2
- B. 0
- C. v9.4
- D. v9.6.1

**Answer: B**

#### NEW QUESTION # 52

How is the sample of Requirement Statements within an interim assessment selected for testing?

- A. Any with associated gaps
- B. Randomly by the MyCSF tool
- C. Any with required CAPs
- D. By client personnel
- E. By the assessor personnel

**Answer: A,B,C**

Explanation:

During an interim assessment for r2 certifications, only a subset of Requirement Statements is retested. This sample is not determined manually by assessors or clients but is systematically generated by MyCSF. The tool ensures randomness and fairness while including mandatory items such as:

\* Requirement Statements with open gaps from the prior validated assessment.

\* Requirement Statements with active Corrective Action Plans (CAPs).

\* A random selection of additional requirements to confirm continued control performance.

This approach balances efficiency and assurance. It ensures that areas of previously identified weakness are re-examined while still sampling across the broader control set. By automating sample selection, HITRUST prevents bias and ensures consistency across interim reviews.
